- 1. Qualitative Information on the Consolidated Business Results and Others for the Third Quarter of the Fiscal Year under Review
- (1) Qualitative Information on the Consolidated Operating Results:

#### Overview of Operating Results in General

The Japanese economy during the third-quarter cumulative period of the fiscal year under review continued to remain sluggish due to deceleration of the global economy attributable to deceleration of the Chinese economy, a prolonged stagnation in the U.S. economy and the financial crisis in Europe while demand for recovery from the Great East Japan Earthquake was propping up the economy. However, as the consistent appreciation of the yen had turned around towards the end of the year since October, the Nikkei Stock Average increased significantly and there were hopeful signs in some sectors.

In the food and fresh meats industry, while prices of domestic beef have shown a tone of recovery in comparison with the corresponding period of the previous fiscal year, prices of domestic pork and poultry also have been back on course for recovery. However, due to intensifying sales competition in the continued deflationary trend, a rise in prices of feedstuff arising from steep rises in grain prices caused by drought in the United States and a slump in the gift market in general in the sluggish economy, among others, business conditions have continued to remain very difficult.

Under these circumstances, the Nippon Ham Group has inaugurated a "New Medium-Term Management Plan Part IV", commencing from the fiscal year under review. The Group has conducted business activities based on its three management policies "Brush up the concept of 'Management for No. 1 Quality'", "Allocate management resources in prioritized areas" and "Enhance the Group brand value" to pursue the theme listed in the plan "Improve Profitability of Domestic Operations and Reinforce the Foundation of Overseas Operations". To be specific, the Group has implemented various measures, including the strengthening of its domestic upstream business, sales expansion of new products, cultivation of human resources and the relocation of the head office to strengthen collaboration among the Group.

As a result of these activities, for the third-quarter cumulative of the fiscal year under review, on a consolidated basis, net sales amounted to ¥787,802 million, down 0.3% from the corresponding period of the previous fiscal year. Operating income amounted to ¥25,662 million, down 2.8% from the corresponding period of the previous fiscal year. However, due partly to improvements in foreign exchange gains/loss, income before income taxes and equity in earnings of associated companies amounted to ¥24,447 million, up 2.6% from the corresponding period of the previous fiscal year. Net income attributable to Nippon Meat Packers, Inc. amounted to ¥13,899 million, up 27.2% from the corresponding period of the previous fiscal year.

#### Overview of Operating Segments

#### Processed Foods Business Division

In its hams and sausages business, sales of a new product "Mou Kittemasu-yo!

Jikabi-yaki Yakibuta" increased strongly. For the "SCHAU ESSEN" and "Irodori Kitchen Loin Ham" series, the Group put on TV commercials to raise their profiles and expand sales. In the summer and year-end gift seasons, the Group actively engaged in TV commercials and promotional activities at retailers' stores for its flagship brand of gift products "Utsukushi-no-Kuni," among others. Consequently, sales of hams and sausages successfully increased. In its processed foods business, sales of new products of hamburgers and meatballs, including "Torokeru 4-shu-Cheese-no Hamburger" were strong and sales of "Chuka Meisai" and chilled pizza series were favorable as well. However, due to intensified competition in its industrial channels, sales in general leveled off.

With regard to profits, due to cost reductions by enhanced productivity and improvement effects by the SCM reform in spite of higher prices of fuel and materials, revenues exceeded those in the corresponding period of the previous fiscal year.

As a result, for the third-quarter cumulative period of the fiscal year under review, on a consolidated basis, net sales of the processed foods business division amounted to ¥262,916 million, down 1.5% from the corresponding period of the previous fiscal year, and operating income amounted to ¥9,870 million, up 19.2% from the corresponding period of the previous fiscal year.

#### Fresh Meats Business Division

Prices of domestic pork and poultry fell below those in the corresponding period of the previous year as production of domestic pork and poultry continued to exceed that in the corresponding period of the previous year throughout the third-quarter cumulative period of the fiscal year under review. Prices of domestic beef, which had remained stagnant in the corresponding period of the previous fiscal year, showed a sign of recovery but prices of fresh meats in general remained weaker than those in the corresponding period of the previous year. On the other hand, prices of crude oil and grains, which could have impacts on production cost, remained high. Specifically, drought in the United States had a severe impact, causing a steep rise in prices of feedstuff in the United States.

Under these harsh circumstances, the Group, by taking advantage of its global procurement capabilities covering a full line of livestock and nationwide marketing capabilities of its sales companies in Japan, engaged in aggressive expansion of sales in and outside of Japan and successfully increased sales volume in comparison with the corresponding period of the previous fiscal year. However, due to a decline in unit sales prices of fresh meats in comparison with those in the corresponding period of the previous fiscal year, sales fell below those in the corresponding period of the previous year.

With regard to profits, the domestic farm business came under severe pressure in general with prices of fresh meats stagnating. Sales of imported fresh meats began to recover in the third quarter of the fiscal year under review, while prices of fresh meats remained weak in Japan. Consequently, profitability dropped from the corresponding period of the previous fiscal year.

Overseas business continued to remain in a very difficult situation as prices of fresh meats remained weak and prices of feedstuff rose in connection with the farm business in the

United States in spite of cost-reduction effects in the business in Australia.

As a result, for the third-quarter cumulative period of the fiscal year under review, on a consolidated basis, net sales of the fresh meats business division amounted to ¥515,848 million, down 0.5% from the corresponding period of the previous fiscal year and operating income amounted to ¥12,698 million, down 19.8% from the corresponding period of the previous fiscal year.

#### Affiliated Business Division

In its marine products business, the Group actively promoted its selling activities targeted at the mass-retail channel, especially in the year-end sales season and focused efforts on trade in Russian fish eggs. Consequently, sales volume increased. However, unit sales prices decreased due to a decline in the prices of salmons and crabs, among others and sales stayed at the same level as in the corresponding period of the previous fiscal year.

In its dairy products business, with regard to yogurts and lactic acid probiotic beverages, sales of its mainstay "Vanilla Yogurt" in the mass-retail channel and drink yogurts in the convenience store channel increased. Consequently, sales increased in all of its major channels. With regard to cheese, sales increased substantially in the convenience store channel and consumer-use product channel in which the Group had enhanced its efforts. However, the Group had a hard time in sales to its bakery and restaurant channels. Consequently, sales decreased slightly.

With regard to profits, in the marine products business, a decline in the prices of some fishes resulted in the contraction of gross profits margins and a trading loss and profitability dropped from the corresponding period of the previous fiscal year. In the dairy products business, profitability exceeded that for the corresponding period of the previous fiscal year due to sales expansion and the accompanying enhancement of productivity as prices of raw materials remained relatively stable.

As a result, for the third-quarter cumulative period of the fiscal year under review, on a consolidated basis, net sales of the affiliated business division amounted to \$108,223 million, up 2.8% from the corresponding period of the previous fiscal year and operating income amounted to \$1,755 million, down 22.3% from the corresponding period of the previous fiscal year.

#### (2) Qualitative Information on the Consolidated Financial Position:

#### <Financial position>

At the end of the third quarter of the fiscal year under review, total assets increased by 5.1% from the end of the previous fiscal year to account for ¥619,079 million, as trade notes and accounts receivable increased by ¥40,666 million from the end of the previous fiscal year due principally to year-end seasonal factors, though cash and cash equivalents decreased by ¥22,339 million from the end of the previous fiscal year. Liabilities increased by 10.6% from the end of the previous fiscal year to account for ¥328,440 million as long-term debt increased by ¥27,593 million due to the issuance of bonds and the raising of

long-term loans, among others and trade notes and accounts payable increased by \$18,736 million, though current maturities of long-term debt decreased by \$21,017 million from the end of the previous fiscal year due to the redemption of bonds, among others. Interest-bearing debt increased by \$14,324 million from the end of the previous fiscal year to account for \$153,511 million.

Total Nippon Meat Packers, Inc. shareholders' equity decreased by 0.6% from the end of the previous fiscal year to account for ¥288,231 million. In addition, total assets increased due to year-end seasonal factors, the Nippon Meat Packers, Inc. shareholders' equity ratio decreased by 2.6 points from the end of the previous fiscal year to 46.6%.

#### <Cash flows>

With regard to operating activities, while trade notes and accounts receivable increased by \$40,285 million due to year-end seasonal factors, trade notes and accounts payable increased by \$18,544 million, amortization amounted to \$14,625 million and net income amounted to \$14,108 million. As a result, net cash from operating activities amounted to \$6,448 million.

With regard to investing activities, capital expenditures amounted to ¥15,803 million and short-term investments increased by ¥8,925 million, among others. As a result, net cash from investing activities amounted to a negative ¥23,389 million.

With regard to financing activities, while proceeds of ¥43,987 million were provided from debt, repayments of debt, acquisition of treasury stock and cash dividends amounted to ¥30,227 million, ¥13,477 million and ¥3,886 million, respectively. As a result, net cash from financing activities amounted to a negative ¥5,724 million.

As a result, cash and cash equivalents at end of the third quarter of the fiscal year under review decreased by \(\frac{\pma}{2}2,339\) million in comparison with the end of the previous fiscal year to amount to \(\frac{\pma}{4}1,312\) million.

#### (3) Qualitative Information on the Forecast of Consolidated Business Results:

With regard to the forecast of consolidated business results for the whole-year period of the year ending March 31, 2013, the Company has made no adjustment to the forecast publicized in the "Notice of Amendment to the Content of Transfer of Hams and Sausages Factories to Consolidated Subsidiary by Company Split and Adjustment to the Forecasts of Business Results in Connection therewith" on August 9, 2012.

#### Cautionary notice on information about the future:

The plans, forecast of operating results and other prospects for the future described in this brief statements of accounts are based on the information currently available to the Company and certain assumptions considered reasonable by the Company and are not contemplated to ensure the fulfillment thereof. The actual results in the future may materially differ from such plans and forecast, depending on various factors including risk factors in business. The Company, therefore, wishes to caution that readers should not place undue reliance on these descriptions to make investment decisions. Further, unless obligated

by laws or ordinances or the rules of financial instruments exchanges, the Company will not necessarily, or is not obligated to, revise such descriptions about the future, including the forecast of business results notwithstanding any information or event in the future or any result arising therefrom, or publicize such revised information.

- 2. Other Information
- (1) Changes in Significant Subsidiaries during the Period under Review:

None

(2) Application of Simplified Accounting Treatments and Special Accounting Treatments:

None

(3) Changes in Accounting Policies:

As from the consolidated first-quarter cumulative period of the fiscal year under review, the Company has applied the Accounting Standards Update ("ASU") No. 2011-05 and ASU No. 2011-12, which have updated the FASB Accounting Standards Codification (ASC) 220 "Comprehensive Income".

These updates eliminate the option to report other components of comprehensive income in the consolidated statement of changes in equity and requires an entity to report total comprehensive income, components of net income and other components of comprehensive income in either a continuous statement of comprehensive income or two separate but consecutive statements.

As a result of the application of these updates, the Company, as from the consolidated first-quarter cumulative period of the fiscal year under review, has adopted the method of reporting other components of comprehensive income in the two separate but consecutive statements to present the same in its consolidated quarterly statement of comprehensive income and applies the method retrospectively to all periods reported.

(4) Basis of Preparation of Consolidated Financial Statements:

The consolidated quarterly financial statements of the Company are prepared in accordance with the accounting principles generally accepted in the United States.

As from the consolidated first-quarter cumulative period of the fiscal year under review, the Company has changed the method of presentation in its consolidated quarterly statement of income.

Previously, the Company has presented total "revenues" and total "cost and expenses" and reported insignificant items included in revenues and cost and expenses, respectively, as "other". However, the Company now does not present total "revenues" and total "cost and

expenses", and categorizes "other" items included in revenues and cost and expenses as "other operating expenses (revenues) - net" and "other revenues (expenses) - net", respectively, according to their nature for presentation.

The Company regards the change, by which operating expenses other than "cost of goods sold" and "selling, general and administrative expenses" are specified, is a useful change for readers of these consolidated quarterly financial statements.

The Company has revised the presentation for the consolidated third-quarter cumulative period of the previous fiscal year and the consolidated third-quarter period of the previous fiscal year to comply with the presentation for the consolidated third-quarter cumulative period of the fiscal year under review and the consolidated third-quarter period of the fiscal year under review.

Effective from April 1, 2012, Nippon Meat Packers, Inc. and its domestic subsidiaries have changed their depreciation method of property, plant, and equipment (mainly for manufacturing facilities of hams and sausages and processed foods) from the declining-balance method to the straight-line method.

In order to accelerate manufacturing efficiency based on selection and concentration, the Companies are considering the restructuring of ham and sausage's manufacturing bases, and proceeding with collection and integration of manufacturing items and lines for hams and sausages and processed foods. They leveled out the usage of manufacturing facilities over the estimated useful lives, and led to the environment where straight-line method became suitable.

In addition, the estimated useful lives were revised according to the actual status of use as well.

Under ASC Topic 250, "Accounting Changes and Error Corrections," this change is treated on a prospective basis as a change in estimate.

The change in the cumulative third-quarter consolidated period caused an increase in "income from continuing operations before income taxes and equity in earnings (losses) of associated companies", "net income attributable to Nippon Meat Packers, Inc. shareholders" and "diluted earnings per share attributable to Nippon Meat Packers, Inc. shareholders" by \(\frac{\pmathbf{3}}{3}\),346 million, \(\frac{\pmathbf{2}}{2}\),075 million, \(\frac{\pmathbf{9}}{9}\).88 and \(\frac{\pmathbf{8}}{8}\).90, respectively. The change also caused an increase in "income from continuing operations before income taxes and equity in earnings (losses) of associated companies", "net income attributable to Nippon Meat Packers, Inc. shareholders" and "diluted earnings per share attributable to Nippon Meat Packers, Inc. shareholders" by \(\frac{\pmathbf{1}}{1}\),257 million, \(\frac{\pmathbf{7}}{3}\) million, \(\frac{\pmathbf{3}}{3}\), respectively, in the consolidated third-quarter period.

- (Notes) 1. "Eliminations, adjustments and others" includes unallocated items and intersegment eliminations.
  - 2. Except for a few unallocated items, corporate overhead expenses and profit and loss of certain subsidiaries are allocated to each reportable operating segment. These subsidiaries provide indirect services and operational support for the companies included in each reportable operating segment.
  - 3. Operating income is calculated by deducting cost of goods sold and selling, general and administrative expenses from net sales.
- (7) Note on Material Change (if Any) in the Amount of Shareholders' Equity:

Not applicable.
