- (1) Qualitative Information on the Consolidated Operating Results:

#### Overview of Operating Results in General

The Japanese economy during the first quarter of the fiscal year under review showed a sign of moving gradually towards recovery as exports and house construction began to pick up though the employment situation still remained severe.

In the food and fresh meats industry, prices of domestic beef and imported beef have continued to remain firm since the previous fiscal year. The volume of beef imported from the United States, on which the age restriction was relaxed in February, has increased favorably since April but beef prices have not specifically been affected. Prices of domestic pork and poultry were higher than those for the corresponding period of the previous fiscal year but the magnitude of improvement was minute and the market was sluggish overall.

On the other hand, business conditions remained tough due to continuing cost rises, such as rising prices of raw materials and fuel and higher prices of feedstuffs arising from higher prices of grains, as well as intensifying sales completion amid the still-going deflationary trend.

Under these circumstances, the Nippon Ham Group, with its "New Medium-Term Management Plan Part IV", which commenced in April 2012, has conducted business activities based on its three management policies "Brush up the concept of Management for No. 1 Quality", "Allocate management resources in prioritized areas" and "Enhance the Group brand value" to pursue the theme listed in the plan "Improve the profitability of domestic operations and reinforce the foundation of overseas operations". To be specific, the Group has implemented various measures, including the strengthening of its marketing bases in Vietnam and the Philippines, reinforcing of its domestic farm business, continuation of restructuring, development and sales expansion of new products, promotion of brand management and cultivation of human resources.

As a result of these activities, for the first-quarter cumulative period of the fiscal year under review, on a consolidated basis, net sales amounted to \$265,651 million, up 9.3% from the corresponding period of the previous fiscal year. Operating income amounted to \$4,476 million, down 13.3% from the corresponding period of the previous fiscal year. However, due partly to improvements in foreign exchange gains/loss, income before income taxes and equity in earnings of associated companies amounted to \$4,583 million, up 10.7% from the corresponding period of the previous fiscal year. Net income attributable to Nippon Meat Packers, Inc. amounted to \$3,197 million, up 66.2% from the corresponding period of the previous fiscal year.

#### **Overview of Operating Segments**

#### **Processed Foods Business Division**

In its hams and sausages business, sales of "Mou Kittemasu-yo! Yakibuta" have continued to increase strongly since the previous fiscal year. Sales of "SCHAU ESSEN" series and "Irodori Kitchen Loin Ham" series, for which the Group put on TV commercials, also increased. Consequently, overall sales exceeded those in the corresponding period of the previous fiscal year.

In its processed foods business, sales of new products, such as "Chuka Meisai: Shiromizakana no Amazu-ankake" and chilled pancake "Sucre et Sucre" series, increased strongly and sales of "Torokeru 4-shu-Cheese-no Hamburger" increased favorably in volume. Sales of commercial-use products also were improving. Consequently, overall sales exceeded those in the corresponding period of the previous fiscal year.

With regard to profits, due to the impact of higher prices of raw meats, raw materials and fuel, which offset the progress of cost reduction measures as planned and the effect of sales increases, profitability fell in comparison with the corresponding period of the previous fiscal year.

As a result, for the first-quarter cumulative period of the fiscal year under review, on a consolidated basis, net sales of the processed foods business division amounted to ¥81,937 million, up 4.3% from the corresponding period of the previous fiscal year, and operating income amounted to ¥487 million, down 73.0% from the corresponding period of the previous fiscal year.

#### Fresh Meats Business Division

In Japan, the Group focused its efforts on sales of domestic beef, which resulted in an increase in sales volume. In addition, sales of domestic poultry, for which the Group strengthened its upstream business, steadily increased in volume, as well as in figures. Sales of Australian brand beef "Whyalleaf", which the Group had focused efforts since the previous fiscal year, as well as Australian brand beef "Oomugi gyu" increased and sales of its domestic brand poultry "Sakurahime" increased strongly in volume.

With regard to profits, prices of crude oil and grains, which affect production cost, have remained high and the domestic farm business has been under severe pressure. On the other hand, the domestic market for fresh meats, specifically for imports, remained higher in comparison with the corresponding period of the previous fiscal year and profitability improved in domestic sales. Overseas, the business in Americas remained in a difficult situation as pork prices remained weak. However, in the business in Australia, profitability improved due to reductions in cost of purchase and efforts on marketing brand fresh meats for domestic and overseas markets.

As a result, for the first-quarter cumulative period of the fiscal year under review, on a consolidated basis, net sales of the fresh meats business division amounted to ¥185,574 million, up 14.0% from the corresponding period of the previous fiscal year and operating income amounted to ¥3,420 million, up 17.1% from the corresponding period of the previous fiscal year.

#### Affiliated Business Division

In its marine products business, the Group promoted sales focused on its priority items, such as shrimps and salmons. The Group also actively promoted its selling activities targeted at the volume retailers channel and increased sales of raw materials to food manufacturers. Consequently, sales volume increased overall.

In its dairy products business, with regard to yogurts and lactic acid probiotic beverages, the Group conducted active promotional activities for its mainstay "Vanilla Yogurt" in the volume retailers channel, especially. However, due partly to sluggish sales of new products during the fiscal year under review, sales of yogurts and lactic acid probiotic beverages overall fell in comparison with the corresponding period of the previous fiscal year. With regard to cheese, sales of commercial-use products to its major bakery and restaurant channels increased in volume and sales of consumer products on which its efforts had been focused increased. Consequently, sales of the dairy products business in general exceeded those in the corresponding period of the previous fiscal year.

With regard to profits, in both the marine products business and the dairy products business, revisions of selling prices lagged behind increases in prices of major raw materials and purchase prices of imported products due partly to the effects of foreign exchange. In addition, promotion cost to expand its sales operations targeted at the volume retailers channel, as well as electric power and other expenses, increased. Consequently, profitability fell in comparison with the corresponding period of the previous fiscal year.

As a result, for the first-quarter cumulative period of the fiscal year under review, on a consolidated basis, net sales of the affiliated business division amounted to \(\frac{\pmathbf{33}}{33,865}\) million, up 4.2% from the corresponding period of the previous fiscal year and operating loss amounted to \(\frac{\pmathbf{31}}{31}\) million (an operating income of \(\frac{\pmathbf{246}}{246}\) million for the corresponding period of the previous fiscal year).

#### (2) Qualitative Information on the Consolidated Financial Position:

#### <Financial position>

At the end of the first quarter of the fiscal year under review, total assets increased by 3.6% from the end of the previous fiscal year to account for ¥632,218 million, as inventories, marketable securities and trade notes and accounts receivable increased by ¥20,281 million, ¥7,947 million and ¥5,539 million, respectively from the end of the previous fiscal year, though cash and cash equivalents decreased by ¥7,767 million from the end of the previous fiscal year. Liabilities increased by 6.6% from the end of the previous fiscal year to account for ¥334,844 million as short-term bank loans and trade notes and accounts payable increased by ¥12,895 million and ¥8,038 million, respectively from the end of the previous fiscal year. Interest-bearing debt increased by ¥12,128 million from the end of the previous fiscal year to account for ¥161,949 million.

Total Nippon Meat Packers, Inc. shareholders' equity increased by 0.4% from the end of the previous fiscal year to account for \(\frac{4}{2}94,631\) million. However, due partly to an increase in total assets, the Nippon Meat Packers, Inc. shareholders' equity ratio decreased by 1.5 points from the end of the previous fiscal year to 46.6%.

#### <Cash flows>

With regard to operating activities, while trade notes and accounts payable increased by ¥8,033 million and accrued expenses and other current liabilities increased by ¥7,109 million, inventories increased by ¥20,644 million and trade notes and accounts receivable increased by ¥5,667 million. As a result, net cash from operating activities amounted to a negative ¥9,328 million.

With regard to investing activities, capital expenditures amounted to ¥6,015 million and short-term investments increased by ¥4,141 million, among others. As a result, net cash from investing activities amounted to a negative ¥8,396 million.

With regard to financing activities, while repayments of debt and cash dividends amounted to \$5,264 million and \$4,782 million, respectively, short-term bank loans increased by \$11,835 million and proceeds of \$7,978 million were provided from debt. As a result, net cash from financing activities amounted to \$9,763 million.

As a result, cash and cash equivalents at end of the first quarter of the fiscal year under review decreased by \(\frac{\pmathbf{7}}{767}\) million in comparison with the end of the previous fiscal year to amount to \(\frac{\pmathbf{2}}{28,708}\) million.

#### (3) Qualitative Information on the Forecast of Consolidated Business Results:

In consideration of the recent developments of its operating results, the Company will make adjustment to the forecast of consolidated business results for the second-quarter cumulative period of the year ending March 31, 2014 publicized on May 13, 2013 in the Brief Statement of Accounts for the Year ended March 31, 2013, as described below. (Notes)

- 1. "Eliminations, adjustments and others" includes unallocated items and intersegment eliminations.
- 2. Except for a few unallocated items, corporate overhead expenses and profit and loss of certain subsidiaries are allocated to each reportable operating segment. These subsidiaries provide indirect services and operational support for the companies included in each reportable operating segment.
- 3. Operating income is calculated by deducting cost of goods sold and selling, general and administrative expenses from net sales.
- 4. As of April 1, 2013, some changes were made in the business divisions to supervise the subsidiaries. Consequently, the relevant reportable operating segments are reclassified for the consolidated first-quarter cumulative period of the previous fiscal year.
- (7) Note on Material Change (if Any) in the Amount of Shareholders' Equity:

Not applicable.
