1. Qualitative Information on the Statement of Accounts for the Third Quarter of the Fiscal Year under Review

(1) Explanation on the Operating Results

Overview of Operating Results in General

The Japanese economy during the third quarter of the fiscal year under review showed some signs of recovery as the difficult situation caused by COVID-19 gradually eased. However, there are growing concerns about the resurgence of infections caused by variants.

The food and fresh meats industry showed some positive signs of recovery, while the outlook remained unpredictable due to the continued downturn of commercial-use products, which was caused by the slump in demand from restaurants affected by the prolonged declaration of a state of emergency or the quasi-emergency measures. Other factors causing uncertainty include rising costs owing to increased global demand for raw materials and soaring grain prices.

Under these circumstances, NH Foods Ltd. and its subsidiaries (the “Group”) promoted business development based on our four management policies: “Shift to a sustainable business model that can generate profits,” “Build a growth model for the overseas business,” “Provide new value through new products and services,” and “Strengthen corporate functions to achieve the vision” under the “Medium-Term Management Plan 2023” that commenced in April 2021 as a milestone in pursuing our “ideals for 2030”: NH Foods Group “Vision 2030”—“Unleash new potentials for protein.” In the third quarter of the fiscal year under review, our continuous initiatives in Japan included maintaining a stable supply system through thorough countermeasures against COVID-19, and strengthening our procurement, production, logistics, and sales structures to flexibly respond to changes in the environment against the backdrop of the establishment of a new lifestyle and growing awareness of social issues such as ESG aiming to achieve SDGs. In addition, we worked on the challenges of new areas such as the launch of “*IMIDEA*,” a food with functional claims that helps reduce fatigue and maintain memory, and initiatives for Direct to Consumer (D2C), the Hokkaido project with an eye to the opening of the new stadium in 2023, and the promotion of Digital Transformation (DX) to strengthen our management base. Overseas, the Group continued to take measures to minimize the impact of COVID-19 and worked to secure suppliers for a stable supply to Japan. Regarding the cross-group initiatives, the Group made efforts to enhance them in accordance with “NH Foods Group Fundamental Policy on Corporate Governance.” Such efforts include activities to raise group employees’ awareness of our initiative for “Vision 2030”—“Unleash new potentials for protein” and to promote ROIC-based management by managing KPIs linked with various measures of the “Medium-Term Management Plan 2023.”

As a result of these activities, for the third quarter of the fiscal year under review on a consolidated and cumulative basis, net sales increased by 5.6% from the same period of the previous fiscal year to ¥953,239 million. Business profit increased by 0.5% to ¥44,130 million, profit before tax increased by 13.2% to ¥50,237 million, and profit attributable to owners of the parent increased by 28.9% to ¥36,747 million, compared to the same period of the previous fiscal year.

## Overview of Operating Segments

From the cumulative first quarter of the fiscal year under review, the Company discloses the Baseball and Ballpark Business and the New Business, etc. in the “Others” category for the purpose of expanding into new business areas.

### (Processed Foods Business Division)

In the hams and sausages business, sales to mass retailer channels decreased from the same period of the previous fiscal year despite our efforts to make up for the impact of COVID-19, by such measures as promoting sales of the main product “*SCHAU ESSEN*” and launching advertisements on social networking services to attract younger customers. Sales to commercial-use channels increased year on year thanks to the increased demand as the infection situation subsided. Overall sales of year-end gifts decreased from the same period of the previous fiscal year although sales of brand-name gifts were strong, remaining the same level as the market.

In the processed foods business, sales to mass retailer channels increased making up for the impact of COVID-19 last year. This was attributable to the significant growth in the main product “*Ishigama Kobo*,” due to the increased demand for snacks, and the addition of the new product “*Ajiwai Range*,” which can be stored at room temperature. Moreover, sales of products to commercial-use channels including extracts and primary processed products recovered, resulting in an increase in the overall sales from the same period of the previous fiscal year.

In the dairy products business, sales of the main product “*Vanilla Yoghurt*” remained strong, and sales of commercial-use cheese to restaurant channels and food companies increased. As a result, sales were higher than that of the same period of the previous year.

In the marine products business, we worked to expand sales of sushi toppings and our own factory products, mainly diced salmon, and sales to mass retailer channels grew. Further, sales to restaurant channels including sushi restaurants also increased. As a result, sales were higher than that of the same period of the previous year.

Profit of the Processed Foods Business Division as a whole decreased due to rising labor costs associated with an increase in production volume and increased upfront costs for the development of DX, in addition to a sharp rise in raw material costs and fuel costs, which was higher than expected.

As a result, for the third quarter of the fiscal year under review on a consolidated and cumulative basis, net sales of the Processed Foods Business Division increased by 1.5% from the same period of the previous fiscal year to ¥382,846 million, and business profit decreased by 11.8% to ¥14,133 million.

### (Fresh Meats Business Division)

In the sales division, the restaurant and wholesale markets showed signs of recovery due to the lifting of the declaration of a state of emergency. Meanwhile, procurement prices, especially for imported products, rose, and we negotiated to reflect the increases in sales prices. However, profit declined as consumers continued to be budget-conscious on household foods purchased mainly at mass retailers in terms of demand for dining at home. Under such circumstances, we worked to expand our sales channels and profits by strengthening proposals

for restaurants and drugstores, holding seminars for the press to promote the food culture of eating mutton, and actively proposing a rebranded domestic “*Genmai Beef*.”

In the procurement division, we experienced confusion in procuring products due to domestic demand expansion and labor shortages in the main countries of origin, rising global transportation costs, container shortages, and delays in ship arrivals. Under these circumstances, we strived to maintain a stable supply of products while making full use of various procurement methods such as procuring products from third countries, including beef from Uruguay, in order to contribute to healthy dietary lifestyles through the reliable supply of protein. We also worked to expand sales channels and items for the export of domestic beef, pork, and chicken, and as a result, we secured profit.

In the production division, profit decreased affected by the surge in the feed market although we worked to improve internal costs or the factory utilization rate of in-house processing plants with a thorough preventive system against infection in place.

As a result, for the third quarter of the fiscal year under review on a consolidated and cumulative basis, net sales of the Fresh Meats Business Division increased by 3.6% from the same period of the previous fiscal year to ¥522,693 million, and business profit decreased by 5.9% to ¥30,460 million.

(Overseas Business Division)

In Asia and Europe operations, net sales were higher than that of the same period of the previous year due to strong sales of chicken in Turkey and strong meat exports in the U.K. while sales of processed foods were on a par with the previous year in ASEAN and decreased in Greater China. Profit increased due to sustained high sales prices in Turkey, which more than offset some decrease in profit caused by high prices of raw materials for processed products in Thailand and decreased sales volume in Greater China.

In Americas operations, net sales were higher than that of the same period of the previous year due to steady growth in the volume of pork exports and sales volumes of processed food at mass retailers in the U.S. as well as an increase in the volume of pork exports from Chili and Mexico. Profit declined, however, due to sustained high raw material prices of pork for exports and processed food in the U.S.

In Australia operations, net sales were higher than that of the same period of the previous year due to favorable sales prices for both exports and domestic sales, as well as steady sales to China in Uruguay, despite the struggles with collecting cattle in Australia. Profit increased due to favorable sales prices in Australia and efforts to improve the efficiency of factory operations although cattle collection prices remained high in Australia. Uruguay also posted an increase in profit due to continued high prices for sales to China and other markets.

As a result, for the third quarter of the fiscal year under review on a consolidated and cumulative basis, net sales of the Overseas Business Division increased by 17.4% from the same period of the previous fiscal year to ¥199,323 million, and business profit increased by 575.5% to ¥2,209 million.

(Others)

Hokkaido Nippon-Ham Fighters, representing the Baseball and Ballpark Business, finished the 2021 regular-season in fifth place in the Pacific League. The Business saw increases in both net sales and profit from the same period of the previous fiscal year as the team was able to host games with thorough countermeasures against infectious diseases in place, although attendance was sluggish due to restrictions on the number of spectators caused by COVID-19. With the new manager Tsuyoshi Shinjo joining the team next season, we will build up a new team through the upcoming camp and make every effort so that the team will be fully prepared for the start of the next season, while continuously taking measures against infectious diseases.

In the health support business operated by the Research & Development Center, we actively promoted sales in Japan by exhibiting at the Food Development Exhibition 2021 to introduce functional food ingredients and food inspection kits. In addition, in the health food category, we launched a food with functional claims “*IMIDEA*” on our own ecommerce site. Overseas, we exhibited at Bio Asia-Taiwan 2021 held in Taipei, where we introduced functional food ingredients and conducted business negotiations online.

In the New Business, etc., we accelerated efforts in new growth areas with an eye on future changes in the environment, promoted their actual commercialization and foster a culture of challenge in the Group. To this end, the Group established the New Business Development Department on April 1, 2021 and has been studying products and services to attract new customer segments.

As a result, for the third quarter of the fiscal year under review on a consolidated and cumulative basis, net sales of the Others segment increased by 20.1% from the same period of the previous fiscal year to ¥11,361 million, and business loss amounted to ¥208 million (a business loss of ¥805 million for the same period of previous fiscal year).

## (2) Explanation on the Financial Position

### <Financial position>

At the end of the third quarter of the fiscal year under review, total assets increased by 9.3% from the end of the previous fiscal year to ¥902,437 million, as trade and other receivables and inventories increased by ¥62,287 million and ¥18,509 million, respectively, although cash and cash equivalents and right-of-use assets decreased by ¥23,877 million and ¥3,973 million, respectively. Liabilities increased by 13.0% from the end of the previous fiscal year to ¥430,744 million, as interest-bearing liabilities and trade and other payables increased by ¥24,094 million and ¥30,513 million, respectively although income taxes payable decreased by ¥8,077 million. Interest-bearing liabilities stood at ¥217,844 million.

<Cash flows>

With regard to operating activities, profit before tax amounted to ¥50,237 million, and the increase in trade and other payables amounted to ¥30,809 million, while the increase in trade and other receivables amounted to ¥62,610 million, the increase in inventories amounted to ¥18,640 million, and income tax paid amounted to ¥20,193 million. As a result, net cash used by operating activities amounted to ¥5,293 million.

With regard to investing activities, acquisition of fixed assets amounted to ¥34,862 million. As a result, net cash used in investing activities amounted to ¥30,449 million.

With regard to financing activities, cash dividends amounted to ¥9,610 million and repayments of debt amounted to ¥38,809 million, while the increase in short-term bank loans amounted to ¥36,719 million, and proceeds from debt amounted to ¥23,024 million. As a result, net cash provided by financing activities amounted to ¥11,695 million.

As a result, cash and cash equivalents at the end of the third quarter of the fiscal year under review decreased by ¥23,877 million from the end of the previous fiscal year to ¥59,954 million.

(3) Explanation on the Forward-looking Information such as Forecast of Consolidated Business Results

There are no changes to the forecast of the whole-year period of the year ending March 31, 2022 from the future outlook announced in the “Brief Statement of Accounts for the Year Ended March 31, 2021” dated May 10, 2021.

Cautionary notice on information about the future

The plans, forecast of operating results and other prospects for the future described in this brief statement of accounts are based on the information currently available to the Company and certain assumptions considered reasonable by the Company and are not contemplated to ensure the fulfillment thereof. The actual results in the future may materially differ from such plans and forecast, depending on various factors including risk factors in business. The Company, therefore, wishes to caution that readers should not place undue reliance on these descriptions to make investment decisions. Further, unless obligated by laws or ordinances or the rules of financial instruments exchanges, the Company will not necessarily, or is not obligated to, revise such descriptions about the future, including the forecast of business results notwithstanding any information or event in the future or any results arising therefrom, or publicize such revised information.
