Basic Views About and Approach to Sustainability

Forward-looking statements included in this section were made by the Group based on certain assumptions as of the end of the fiscal year ended March 31, 2023 and may differ significantly from actual results due to a number of factors.

(1) The Group's basic views about sustainability

In March 2021, the Group formulated Vision 2030 as a milestone in efforts to achieve its corporate philosophy. This is a vision of where we want to be in 2030. In addition to our existing values of safety and reliability and deliciousness, it represents our desire to expand the possibilities of protein by thinking outside the box to create a variety of food scenes that respond to changes in the social environment and people's lifestyles and to continue to support happy daily eating.

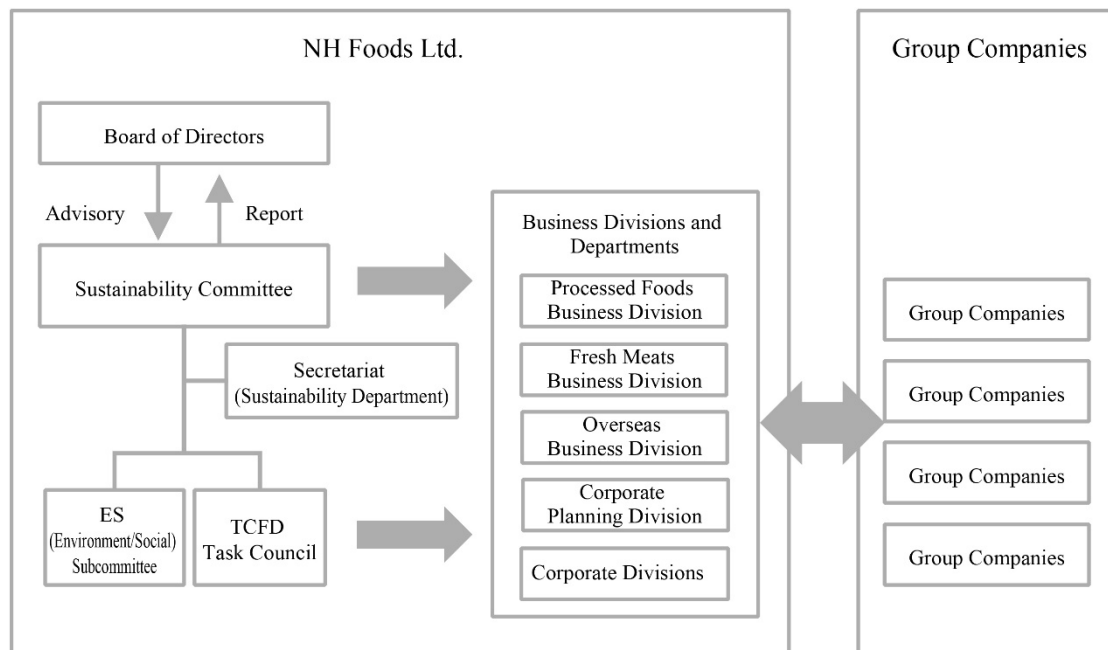

On the occasion of the formulation of this vision, we reviewed the previous Five CSR Material Issues and re-identified the Five Materialities as the social issues to be solved on a priority basis toward the realization of Vision 2030.

The Group aims to achieve these Five Materialities to realize a sustainable society.

1) Governance

The Group has established a Sustainability Committee with its members consisting of Directors, Executive Officers, and outside experts appointed by the President and Representative Director of the Company. In principle, the committee meets at least once every quarter in order to hear the opinions of outside experts and Outside Directors who have expertise in ESG matters and to carry out activities such as formulating sustainability policies and strategies, and checking the progress being made by each Group company. Details of these discussions are reported to the Board of Directors, which makes decisions if necessary.

The ES (Environment/Social) Subcommittee and TCFD Task Council, operating under the Sustainability Committee, comprise the Director in charge of sustainability and the heads of related departments and divisions. They have been tasked with formulating specific strategies based on the results of discussions by the committee and developing measures to be carried out by business divisions.

2) Strategies

The Group has identified the Five Materialities for realizing Vision 2030 and we are working to continuously enhance corporate value by combining sustainability strategy with business strategy. We will strive to solve social issues through our business and contribute to the formation of a sustainable society by implementing a range of measures in line with the Five Materialities through a series of dialogues with various stakeholders.

For details of these measures, refer to "4) Indicators and targets" below.

3) Risk management

The overall risk management for the Group is as outlined in "Business Risks, (1) Risk management system." We basically manage

risks relating to sustainability under the same risk management framework. However, more specifically, the TCFD Task Council is responsible for identifying climate change related risks and opportunities and discussing strategies and concrete measures, while the Board of Directors makes deliberations and decisions following discussions at the Sustainability Committee, the upper organization for the TCFD Task Council.

4) Indicators and targets

The Group has developed measures and indicators for each of the material issues in line with the Five Materialities, while the divisions executing business operations periodically report the progress of such measures and indicators to the Board of Directors.

Five Materialities		Indicators & targets, and measures
Stable procurement and supply of proteins		
	Stable procurement and supply of proteins	Improve protein intake as a power of life (in Japan)
		Control livestock diseases
		Promote sustainable procurement (inform critical primary suppliers of policies and have 100% SAQ implementation, disseminate policies to critical secondary suppliers and implement SAQ by FY2030)
		Carry out due diligence on suppliers regarding human rights
		Promote initiatives that take animal welfare into consideration *1 Elimination of gestation crates on all farms in Japan (pigs) (by the end of FY2030) Installation of drinking water facilities in lairage pens at all meat processing plants in Japan (pigs and cattle) (by the end of FY2023) Installation of cameras on all farms and meat processing plants in Japan to ensure environmental quality (by the end of FY2023)
		Develop and utilize new technologies such as smart livestock farming
	Greater choice of protein	Expand sales of plant-derived protein products (FY2030 shipment amount: ¥10 billion)
		Develop alternative meat technologies
	Food safety and reliability	Promote acquisition of third-party certification (FSSC22000, SQF, BRC, JFS, etc.)
		Develop human resources through specialized technical certification and other training •Number of employees who have taken e-learning courses (FY2030 target: 67,000) •Number of employees who have completed basic technical training (FY2030 target: 2,400) •Number of employees who have passed the professional certification examination (FY2030 target: 90) •Number of employees who have passed the Food Labeling Examination (Intermediate) (FY2030 target: 800) • Number of employees who have passed the Food Labeling Examination (Advanced) (FY2030 target: 100)
Food diversification and health		
	Food allergy support	Expand our lineup of food allergy-related products (FY2030 shipment amount: ¥4 billion) and raise awareness of food allergies
		Research and disseminate information on food allergies
	Health promotion	Research and commercialize new ingredients for improving cognitive function (supply the equivalent of 3 million meals per year by FY2026)
		Develop products that contribute to health
		Disseminate information on extending healthy life expectancy
	Food diversification	Develop and sell products that respond to a diverse range of cultures, religions, etc.

Contributing to a sustainable environment		
	Responding to climate change	Reduce CO ₂ emissions from fossil fuels*2
	Resource saving and recycling	Reduce waste emissions in Japan (FY2030 target: 5% per production unit compared to FY2019)
	Addressing biodiversity	Increase the number of products certified for sustainable fishery resources (MSC/ASC)
Co-creation and shared prosperity with local communities and society as a whole through food and sports		
Local community development		Promote activities for co-creation with local communities through sports (new HOKKAIDO BALLPARK, sports/food education classes, etc.)
		Promote community contribution activities, including cultural activities (cooperation and clean-up activities for local events, etc.)
		Promote social welfare activities through food (supplying food to food banks and “Kodomo Shokudo” (initiatives that provide meals to children in need), etc.)
		Support the development of the next generation through food and dietary education, etc. (in-class lessons, career development support, etc.)
Employee development and respect for diversity*3		
	Enhancing job satisfaction for employees	Support job satisfaction, foster a corporate culture that encourages employees to take on challenges, etc.
	Respect for diversity	Ensure respect for human rights (carry out human rights education), establish a human rights due diligence framework, etc.

- (Notes) 1. SAQ stands for Self-Assessment Questionnaire
2. Those subject to *1 are consolidated subsidiaries of the Group
3. For details of *2, refer to “Basic Views About and Approach to Sustainability, (2) Responses to TCFD Recommendations.”
4. For details of *3, refer to “Basic Views About and Approach to Sustainability, (3) Human capital.”

(2) Responses to TCFD recommendations

The Group re-identified the social issues that should be prioritized to realize our “Vision 2030” as “Five Materialities.”

We believe that addressing climate change is inevitable not only for realizing our corporate philosophy but also for realizing a sustainable society. It is becoming more and more important as we can tell from the Paris Agreement in 2015, the Special Report on Global Warming of 1.5°C of the Intergovernmental Panel on Climate Change (IPCC) in 2018, and the Glasgow Climate Pact adopted at COP26 in 2021. Given these circumstances, in 2020, ahead of the world’s major meat companies, we declared support for TCFD recommendations. After a preliminary disclosure in October 2021, we started the disclosure of TCFD-based information in May 2022 and updated the information in June 2023.

1) Governance

The NH Foods Group has identified “contributing to a sustainable environment” as one of our materialities. Policies on sustainability and measures regarding climate change, etc., are discussed by the internal Sustainability Committee. The committee is chaired by the President and consists of directors, general managers of business divisions, outside directors, and outside experts, who are all open in widely sharing their opinions. The results of discussions held by the Sustainability Committee are then reported to the Board of Directors for deliberation and decision.

Established in fiscal 2021 as a subcommittee of the Sustainability Committee, the TCFD Task Council is composed of the director in charge of sustainability, officers in charge of overall management at each business division, the person in charge of the corporate staff unit, and the person in charge of the Research and Development Center. The TCFD Task Council identifies risks and opportunities related to climate change, analyzes scenarios, and examines the effects of business impacts and the status of responses on a company-wide level.

Furthermore, the Sustainability Department, which serves as secretariat for these committees, is located within the Corporate Planning Division, and the director in charge is responsible for overseeing the sustainability field.

Review Process

In fiscal 2022, seven TCFD Task Council meetings were held, and seven meetings were held between the business divisions and the secretariat for further deliberation, examining and discussing measures for risks and opportunities. The progress of deliberations are reported to the Sustainability Committee, etc.

Timing	Name of meeting body	Main points of discussion
April 2022	TCFD Task Council	Shared ongoing measures, initiatives, and issues from the previous year and confirmed the promotion system
May	TCFD Task Council	Of the response and adaptation measures, it was decided to limit the increase in production procurement costs and focus on low-carbon and decarbonization measures. It was agreed to hold a separate meeting to discuss specific measures in detail.
July	TCFD Task Council	Shared progress of each measure and potential forms for disclosure
August	TCFD Task Council	Explained the results of analysis of storm surge risks, and confirmed the response and situation for the applicable sites
October	TCFD Task Council	Confirmed progress on measures for feed and livestock growth and reviewed draft disclosure documents (1)
November	Sustainability Committee	Progress report on the status of responses discussed at the TCFD Task Council
January 2023	TCFD Task Council	Confirmed progress on measures and reviewed draft disclosure documents (2)
February	TCFD Task Council	Agreed on a disclosure outline and shared how to proceed with next year's TCFD Task Council
June		Disclose what was discussed and promoted at the TCFD Task Council

2) Strategy

With regard to climate change, which is a particularly important aspect of our sustainability strategies, we conducted scenario analyses on the risks and opportunities posed by climate change for major businesses of the Group, based on the Paris Agreement of 2015 and the IPCC's Special Report on Global Warming of 1.5°C in 2018. As a result, we found that the business environment for livestock and meat could change significantly in the medium to long term and identified one particularly important physical risk being that rising temperatures could have a significant impact on feed grain yield and livestock growth in the medium to long term.

In response, the NH Foods Group is working to improve the feed conversion ratio (*) by changing feed formulations and improving technology for controlling the breeding environment. We are also building a stable supply system for flood disasters. Regarding water stress, we are setting and promoting environmental targets for water conservation and the effective use of water.

*Adjusting the composition of grains, etc., in a compound feed to be suitable for growth and promote efficient weight gain.

As a key transition risk, we also identified increases in energy costs from the introduction of carbon taxes meant to achieve decarbonization. Furthermore, we recognize the possibility that the recent sharp increases in energy and grain feed prices will continue for an extended period of time, and that the reduction of greenhouse gas emissions from livestock in the livestock industry are also important issues, and we are conducting research and development in collaboration with outside research institutes to reduce these emissions.

On the other hand, considering the impact of increases in demand for protein due to population growth, changes in consumer attitudes, and technological innovations associated with the transition to a low-carbon society, we have identified the growth of the market for new proteins as an important business opportunity in addition to meat. We are proceeding with research and development regarding protein derived from plants such as soybeans and microorganisms, as well as cellular foods (cultured meat). These will be reflected in our materialities and medium-term management plans.

3) Risk management

We regard the identification and management of climate-related risks to be an important issue for "contributing to a sustainable environment". As part of these efforts, the TCFD Task Council identifies risks and opportunities and considers strategies and specific measures. Those items are then deliberated at the Sustainability Committee, which is the next level up, before being deliberated once more and decided upon by the Board of Directors. In addition, in fiscal 2022, company-wide climate change risks were identified by the Risk Management Committee (*) in a risk map, wherein risks were classified by frequency of occurrence, level of impact, etc.,

and specific measures to address climate change risks were discussed and promoted by the TCFD Task Council.

*A committee established as a forum to comprehensively cover company-wide risks, identifying and assessing various risks, identifying priority risks, and considering response policies. Based on the policies of the committee, each business department and unit conduct risk control activities related to their business areas and duties, and the results of these activities are reported to the Board of Directors through the committee, wherein actions are taken as necessary.

4) Indicators and targets

The NH Foods Group's Medium-Term Management Plan 2023 sets forth a management policy of shifting to a sustainable business model with profitability. In addition, in order to realize our materiality of “contributing to a sustainable environment”, we have set a medium- to long-term environmental target of reducing fossil fuel-derived CO₂ emissions with a view to fiscal 2030. In fiscal 2022, we set overseas environmental targets with a goal of fiscal 2030. Going forward, we will further promote initiatives aimed at creating a sustainable society from a more global perspective, aiming to achieve carbon neutrality by 2050.

We have also identified water stress as a physical risk, have set medium- to long-term environmental targets for fiscal 2030 as indicators for this in the same way as reducing CO₂ emissions in order to effectively utilize water resources.

Indicator	FY2030 target	Subject	FY2021 results
Fossil fuel-derived CO₂ emissions	Reduce by 46% or more (compared to fiscal 2013)	All sites in Japan	Reduction: 70,453 t-CO ₂ Progress rate: 27.8%
	Reduce by 24% or more (compared to fiscal 2021)	All sites overseas	-
Water consumption per unit of production	Reduce by 5% (compared to fiscal 2019) FY2030 target reduction: 0.8 m ³ /t	Processing and production sites in Japan	Reduction: 0.2 m ³ /t Progress rate: 25.0%
	Reduce by 5% (compared to fiscal 2021)	Overseas processing and production sites	-

As one of the largest protein suppliers in Japan (*), we believe it is our mission to pursue a more environmentally friendly livestock industry. The Group visualizes and discloses greenhouse gas emissions from livestock. To reduce greenhouse gas emissions, we plan to promote research and development aimed at reducing emissions from pigs in Japan and cattle overseas in cooperation with outside research institutes, introducing measures that have proven effective on our own farms.

*Estimated by the NH Foods Group using data for the weight of products handled, and external data

Scenario analyses

With regard to previous scenario analyses based on the two climate change scenarios of the 1.5°C/2°C increase scenario and the 4°C increase scenario, we have continued to delve into the content, particularly the status of our response.

In our scenario analyses, we refer to the Intergovernmental Panel on Climate Change (IPCC)'s RCP 2.6 (sub-2°C scenario) and RCP 8.5 (4°C scenario), and the International Energy Agency (IEA)'s Net Zero by 2050 (1.5°C scenario).

The scenario analyses conducted in fiscal 2021 identified the following as key risks and opportunities regarding climate change for the NH Foods Group.

Important risks and opportunities		Impact/ Prospect	Status of response
Physical risks	Increase and instability in feed costs	Large	• Improving feed conversion ratio
	Effect of rising temperatures on livestock growth	Medium	• Improving feed with in-house formulations and by strengthening cooperation with feed companies • Considering new procurement of meat from low-risk areas
	Higher risk of disasters at sites	Small	• Strengthening equipment against flood risks
	Greater water stress at sites	Small	• Strengthening product supply systems in times of disaster • Efficient use of water resources at sites with high water stress risks
Transition risks	Rising energy costs from the introduction of a carbon tax	Large	• Efficient energy use and fuel conversion in processing and manufacturing processes • Expanding use of renewable energy • Reducing logistics emissions by converting to low-emission vehicles and improving logistics efficiency
Opportunities	Increase in environmentally conscious consumption	Medium	• Developing products with high sustainability value
	Growth of the market for new proteins	Large	• Product development using new proteins • Research and development of new proteins

a. Increase and instability in feed costs

[Current status]

In the future, supply and demand for grain feed is expected to become tighter, as the demand for food will increase due to population growth and the yield of grain feed will not increase significantly due to climate change. It has also been pointed out that the increasing frequency of local droughts associated with climate change may become a major destabilizing factor in the feed grain supply. If such destabilizing factors materialize, it could lead to an increase in feed prices, which could have a significant impact on the NH Foods Group's meat production costs. In addition, due to the recent destabilization of the situation in grain exporting countries, grain prices have risen, and feed prices have risen accordingly. This trend is likely to continue into the future, so we have started considering measures.

In addition, Japan's main sources of feed corn are the U.S. and Brazil, and the results of analyses of water stress in both countries indicate that while water stress levels are low in Brazil now and will likely continue to be so in the future, water stress in the U.S. is forecast to worsen in major feed producing states. The U.S. is also a major supplier of beef and pork, and poor feed grain crops could affect the meat supply. We believe that these environmental changes may pose long-term risks to feed procurement costs and to meat procurement costs from outside the Group.

[Status of response]

The NH Foods Group has been working to improve the feed conversion ratio (the amount of feed required per unit of animal weight gain) for some time as a countermeasure against the rising price of grain feed, and is working to reduce feed costs through technological development. We will continue our efforts to improve the feed conversion ratio. In addition, we are taking measures together with feed companies to ensure stable feed procurement in the event of shortages or rising imported feed grain prices. Specifically, we are testing measures to ensure a stable supply of feed by providing feed that expands the use of domestic ingredients, such as brown rice, through joint development of proprietary feed formulations.

Furthermore, in order to respond to the impact of rising costs and shortages in meat procurement from outside the Group, we are working to identify suppliers of meat taking climate change into consideration. In order to maintain a stable supply, we are expanding our procurement sources by developing new suppliers in the same countries and regions, building a more stable meat procurement network.

b. Effect of rising temperatures on livestock growth

[Current status]

The environment, such as temperature and humidity, greatly affects the growth of livestock. Based on our analyses in Japan, Australia, and Turkey, where the NH Foods Group's production and breeding sites are located, we are implementing mitigation measures in fattening because daily weight gain may deteriorate by several percentage points as temperatures rise due to climate change.

We also continue to believe that rising temperatures will pose a potential long-term risk to meat procurement costs from outside the Group.

[Status of response]

Of the NH Foods Group's farms, domestic pig and poultry farms (Japan Clean Farm and Japan White Farm) and overseas Turkish poultry farms (Ege-Tav Ege Tarım Hayvancılık Yatırım Ticaret ve Sanayi Anonim Şirketi) are expected to face risks due to rising summer temperatures. To reduce these risks, we have installed cooling facilities at some of our business sites. Farms in Australia also continue to take measures against the heat by installing sunshades to protect cows from the sun and ultraviolet rays. We will continue to take steps to improve production efficiency.

[Case examples]

To combat the heat in poultry farming, all poultry houses in Turkey are equipped with cooling pads (*1) and all poultry houses in Japan are equipped with measures tailored to the characteristics of the area in which they are located. For example, cooling pads or misting equipment (*2) have been installed in all of the poultry houses in Miyazaki and Niigata prefectures, and in Hokkaido approximately 67% of the poultry houses scheduled for installation have such devices. We plan to proceed with installation for the remaining poultry houses and verify their effectiveness. On the other hand, in Aomori Prefecture, humidity is high in the summer, and in semi-windowless poultry houses, which are the main poultry house structure, the humidity in the house increases when misting equipment is used, which is expected to affect the growth of chickens. For this reason, in the Tohoku region, windows are opened and blowers are used as heat shielding measures.

In the future, we will further improve ventilation and breeding management, and study the development of technology to improve production performance under hot conditions.

*1 Cooling pads

Cooling pads are moistened pads placed at the outside air intakes to cool the air using the heat of vaporization as outside air passes through.

*2 Misting equipment

Misting equipment sprays misty water into a poultry house, and by evaporating the misty water, the heat of vaporization lowers the air temperature.

c. Higher risk of disasters at sites

[Current status]

It is said that the risk of severe disasters will increase as extreme weather increases due to climate change. Of the Group's total of 226 (206 domestic and 20 overseas) farms, processing and production plants, and logistics centers, the NH Foods Group confirmed that 6 domestic and 7 overseas sites are located in areas at high risk of flooding.

In fiscal 2022, we newly confirmed risks associated with storm surges, and found that 2 domestic and 3 overseas sites were located in high-risk areas.

In our evaluations, we refer to hazard maps for domestic sites and the World Resources Institute's Aqueduct tool for overseas sites.

[Status of response]

For the 6 domestic and 7 overseas sites located in areas at high risk of flooding, the impact of flooding was still deemed to be minimal based on the analyses conducted in fiscal 2022 and the results of interviews conducted with the sites. In addition, although in fiscal 2021 our evaluation was that we were responding by providing insurance coverage for domestic flood damage, we found that some of the coverage might not be sufficient. We will once again consider how to handle this issue.

In terms of dealing with storm surges, we confirmed that two of our domestic sites could be supplied major products from other production sites in the event of a disaster, and so it would not pose a major risk. Two of the three overseas sites are at risk of flooding in addition to storm surges, but the impact is judged to be minimal due to past disaster conditions and flood control measures. The other site is a processing plant in Australia. In Australia, the locations of our three processing plants are dispersed, and we believe that if a natural disaster were to affect operations, the impact would be minimal. Flooding and storm surges are expected to be minor risks, but we will continue to monitor them.

Our response status to each is described in the table below.

	Country/region	Number of sites	Number of sites in high-risk areas	Status of response	Risk assessment
Flood risks	Domestic	206	6	<ul style="list-style-type: none"> • Review of BCP, including the supply structure of major products • Considering how to deal with water damage coverage, as it may not be adequately covered depending on the site 	Minimal
	Overseas	20	7	<ul style="list-style-type: none"> • Measures such as raising the floor level of equipment have been implemented (3 sites) • Measures are in place at an industrial park (1 site) • Local interviews and past disaster situations make the likelihood of occurrence low (3 sites) 	Minimal
Storm surge risks	Domestic	206	2	<ul style="list-style-type: none"> • Review of BCP, including the supply structure of major products 	Minimal
	Overseas	20	3	<ul style="list-style-type: none"> • Same sites as those with high flood risks, minor due to past disaster situation and flood control measures taken (2 sites) • Since the locations of the three processing plants in Australia are dispersed, even if some of them are damaged the impact on operations will be minor 	Minimal

d. Greater water stress at sites

[Current status]

Using the World Resources Institute's Aqueduct water stress index, we conducted initial water stress assessments at a total of 226 Group farms, processing and production plants, and distribution centers (206 domestic and 20 overseas sites).

[Status of response]

As a result of the initial assessment, all domestic sites were assessed as unlikely to be significantly affected by water stress. That said, it has been found that 9 sites in the 1.5/2°C increase scenario and 8 sites in the 4°C increase scenario are likely to experience high water stress, but we have confirmed that all of these sites will only be minimally impacted. When we checked the situation again in fiscal 2022, there was no change.

With regard to water stress, we have expanded the scope of target setting based on our materiality of "contributing to a sustainable

environment” to include overseas countries, and are working to reduce water use and effectively utilize water resources.

We will continue to monitor risks related to water stress. We will also continue our efforts to achieve our medium- to long-term environmental targets.

	Country/region	Number of sites	Number of sites in high-risk areas	Status of response	Risk assessment
Water stress	Domestic	206	0	-	Minimal
	Overseas	20	8 (2°C scenario) 9 (4°C scenario)	<ul style="list-style-type: none"> • Minimal impact from the perspective of the scale of operations (4 sites) • Based on the business impact of past water stress and on-site interviews, the risk was judged to be minimal (5 sites) 	Minimal

e. Higher costs due to carbon tax

[Current status]

We calculated the business impact of the introduction of a carbon tax on fossil fuel-derived CO₂ emissions. In terms of CO₂ emissions from Group business sites, we compared the calculation based on emissions in fiscal 2021 with the case where the reduction targets for fiscal 2030 were achieved. The carbon tax price was calculated as \$130 USD/t-CO₂ for fiscal 2030 and \$250 USD/t-CO₂ for fiscal 2050 in accordance with the IEA’s World Energy Outlook 2021 Net Zero by 2050 scenario (equivalent to a 1.5°C target).

As a result, it was identified that a carbon tax introduced in the 1.5°C scenario could have a significant impact on business. In addition, taking into account the current carbon tax systems in developed countries, this assessment covers only fossil fuel-derived CO₂ emissions. However, in the medium to long term, there is a possibility of introducing a carbon tax on emissions from livestock, and we will consider measures to reduce these emissions.

The price of fossil fuels also continues to rise due to the impact of the international situation. If this situation continues to 2030, domestic electricity prices could be affected by about 1 to 2 billion yen per year compared to 2022.

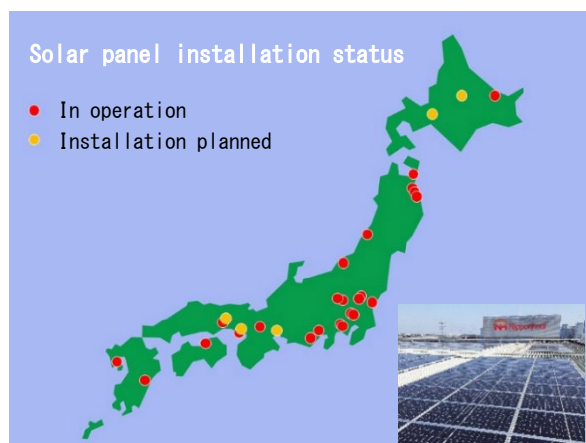

Scenario	Item	2030	2050
Assuming 2021 emissions	Carbon tax impact (hundreds of millions of yen)	107	206
	Emissions (thousand t-CO ₂)	633	633
	Carbon tax amount (USD/t-CO ₂)	130	250
Assuming 2030 reduction targets are achieved (horizontal reduction from 2030)	Carbon tax impact (hundreds of millions of yen)	68	132
	Emissions (thousand t-CO ₂)	405	405
	Carbon tax amount (USD/t-CO ₂)	130	250

1 USD = 130 yen

[Status of response]

To reduce fossil fuel-derived CO₂ emissions, the NH Foods Group is introducing energy-saving equipment, including replacing aging facilities, and increasing the use of renewable energy. For example, we have focused on the installation of solar panels on our own premises and the utilization of biomass resources generated from the production process, and a wastewater biogas plant is operating in Australia. In Japan, waste oil boilers that use waste oil from deep fryers in the processed food business and oil recovered from wastewater as fuel are expected to reduce CO₂ emissions by about 2,600 tons per year.

As of April 2023, solar power generation systems were installed at 24 sites in Japan, and annual power generation is expected to be approximately 6,400 MWh. In addition, plans are underway to install a solar power facility in the town of Nanporo, Hokkaido, which will generate approximately 3,000 MWh of electricity annually,

and the electricity generated by the facility will be supplied to the Group's pig farming facilities. We are also planning to install a solar power facility that will generate approximately 1,100 MWh in Asahikawa, Hokkaido. Furthermore, since fiscal 2023, our Group has adopted the concept of Internal Carbon Pricing (ICP) when installing and updating equipment above a certain amount.

Waste oil boiler/solar panel installation status

Initiative	Number of sites for installation	CO ₂ reduction
Solar panels	Operating: 24 sites (6,400 MWh)	2,400 t-CO ₂
	Operation planned: 5 sites (5,500 MWh)	2,000 t-CO ₂
Waste oil boilers	6 sites	2,600 t-CO ₂

We are also promoting specific measures to reduce greenhouse gas emissions from livestock. In the Australian cattle business, we are verifying the suppression of fermentation methane in the digestive tract by adding additives to feed, as well as the effects on cattle fattening and meat quality. The domestic pig farming business also uses biogas generated from waste and wastewater treatment as energy. In addition, we are collaborating with Hokkaido University, Osaka University, and Tokushima University on research that will help reduce methane emissions from livestock.

Partner	Research theme
Hokkaido University	Development of methane emission suppression method in bovine lumen
Osaka University	Study of porous organic salts with specific adsorption ability for methane
Tokushima University	Research on greenhouse gas emissions in pigs

f. Increase in environmentally conscious consumption

[Current status]

In a decarbonized society, concern over climate change is expected to increase, making it easier to select companies and products that are more environmentally friendly. The NH Foods Group recognizes the growing importance of realizing sustainability values and communicating them to consumers.

For this reason, we aim to provide sustainable products and services by promoting initiatives throughout the Group aimed at creating a sustainable society. Furthermore, in order to meet consumer expectations, we are actively working on sustainable packaging and developing products with a low environmental impact.

[Status of response]

The NH Foods Group continues to focus on flagship brands that use large amounts of packaging. In fiscal 2021, *SCHAU ESSEN* was changed from having drawstring pouch packaging to Eco-Pirottype packaging, and in fiscal 2022, the Group introduced non-tray packaging for *Chuka Meisai*. Through the reduction of plastic use, this is expected to reduce CO₂ emissions by approximately 4,380 tons. Furthermore, we will continue our efforts to reduce CO₂ emissions by switching to Eco-Pirottype packaging for our sausage products such as *Houjun*, switching from plastic to paper containers with our *Isey SKYR* series, and reducing the amount of plastic we use for other products by reviewing packaging sizes, reducing plastic trays, and switching to paper trays.

We are also expanding the use of plastics made from biomass as part of our raw materials in some packaging for processed foods as well as in some packaging for our *Sakurahime* chicken.

In order to reduce food loss, we are also stepping up our efforts regarding products that can be stored at room temperature for extended periods, such as the *Ajiwai Range* series, as a focus area under the Medium-Term Management Plan 2023. In addition to expanding these initiatives, we will work to develop products with clearer sustainability value.

Chuka Meisai

Eliminated trays from packaging and reduced the weight of packaging materials by approximately 19% (*)

*Based on in-house research and 2021 shipment volumes of *Chuka Meisai* sweet and sour pork, babaocai, pepper steak, and twice cooked pork.

Houjun

Switching to Eco-Pirottype packaging reduces plastic use by 22% (*)

*Compared with conventional products

Isey SKYR

Switching to paper containers reduces plastic use by 94.1% (*)

*Compared with conventional products

Sakurahime

Biomass material used for part of the packaging

g. Growth of the market for new proteins

[Current status]

In the future, the market is expected to expand, including new proteins in addition to the meat market, against the backdrop of increasing demand for protein due to global population growth. More specifically, the market for new proteins is expected to grow significantly due to changes in consumer attitudes and technological innovations associated with the transition to a decarbonized society. Although estimates of the future market size for new proteins published by external organizations vary, in a scenario where the ongoing transition to decarbonization continues, the global market is expected to exceed several tens of trillions of yen. As such, we continue to engage in research and development as we expect large business opportunities to arise in the medium to long term.

[Status of response]

The NH Foods Group has already expanded its *NatuMeat* range of plant-based products to consumers, restaurants, and distribution companies, and is promoting sales in Japan. It is also sold overseas as PBF (Plant-Based Food) originating from Japan.

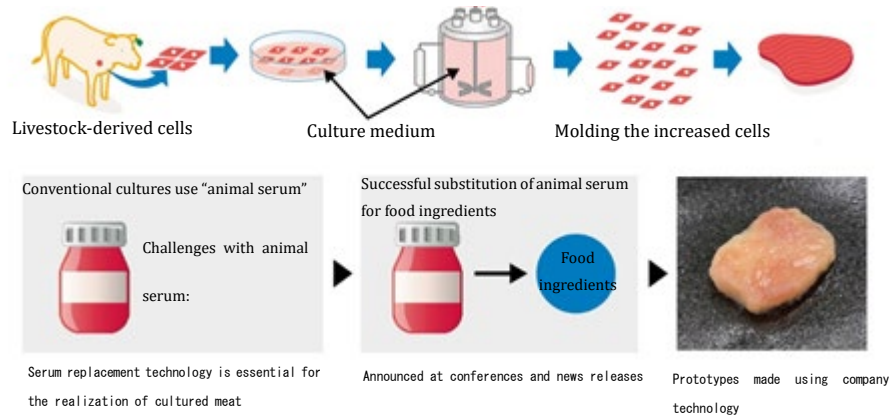

As for new proteins, we are not only developing alternatives for livestock meat, but also for marine products in light of the depletion of marine resources, and we are marketing fish-style fried foods to the food service industry and consumers in Japan. In light of the recent situation regarding the procurement of raw materials from overseas, we are also advancing research and development of products using domestic materials. The NH Foods Group is developing and expanding sales of plant-based protein products with the goal of achieving sales of 10 billion yen by fiscal 2030.

The NH Foods Group is pursuing research and development with a view to utilizing a diverse range of proteins, not limited to just those derived from plants. We are conducting joint research with IntegriCulture Inc. regarding cellular foods (cultured meat) made from a large number of livestock-derived cells. We are also pursuing research for future commercialization, including the development of a cheaper method to grow cells using food-based culture media instead of costly animal serum. Moreover, we are testing the potential of applying new proteins, including those derived from microorganisms, to food products.

We will expand the potential of proteins, including new proteins based on meat-derived proteins, in order to provide a stable supply and diverse range of food options.

Production image of cellular food

(3) Human capital

One of the NH Foods Group's corporate philosophies is for the Company to be a place where employees can feel truly happy and fulfilled. We have defined "human capital" as our human resources that are an important driving force for maximizing our corporate value, and have formulated our Human Resource Strategy to maximize the value of the human capital.

In addition, we have sought to achieve personal and organizational growth (human resource development) as well as the growth of the Group (improvement in corporate value), by linking our management and business strategies.

We believe three pillars essential to achieving these goals are: personal growth; organizational growth; and diversity, equity, and inclusion. In fact, we have pushed forward with initiatives linked to the target outcomes of each of the pillars by way of making investments in human capital.

(i) Strategies

a. Human resource development policies

With a focus on new discoveries and ideas unleashed through the exchange of diverse values, experiences, and knowledge, we will work on initiatives to increase the diversity of human resources within our organizations and to create networking opportunities for such diverse human resources.

As for career development, we have supported our employees in switching their mindset from "career is what is guided by the company" to "career is what each employee develops through coordination with the company" so they can draw and develop their career paths on their own to help them achieve career autonomy.

We also recognize that challenges provide each of our employees with opportunities to improve their job satisfaction as well as to grow. We therefore believe that taking up challenges represents the mindset and actions of our employees that lead to value creation for both each of our organizations and the entire Group. Based on this belief, we have encouraged/motivated our employees to take up challenges by providing them with a variety of relevant opportunities and frameworks.

b. Policies on establishing internal environments

We will seek to realize diversity, equity, and inclusion by ensuring that individuals can work energetically and with a sense of psychological safety in an environment of respect for diverse values

We will move forward with workstyle reforms, learning reforms, and initiatives that support balancing work and life to enable our employees to choose from diverse career paths and workstyles. At the same time, we will strive to create an environment in which our employees can unlock their unique potential, experiences, and skills so they can grow together.

We will also focus on promoting health management.

(ii) Indicators and targets

Indicators	FY2022 results	FY2030 targets
Percentage of female managers	9.8%	At least 20.0%
Employment rate of people with disabilities	2.6%	At least 2.3%*
Total working hours	1,970 hours	1,870 hours
Hours of overtime work	226 hours	200 hours
Rate of follow-up action after physical examinations	81.0%	100%
Ratio of smokers	23.6%	12.0%
Stress check examination rate	97.9%	100%

(Notes) 1. The figures above are results and targets for NH Foods Ltd.

2. * represents the target that may be revised as appropriate when the mandatory percentage is revised.

Business Risks

Of the matters related to Overview of Business and Financial Information stated in this Annual Financial Report, the management has recognized that the items listed below constitute major risk factors that may have a material impact on the financial position, operating results, and cash flows of its consolidated companies.

Forward-looking statements included in this section were made by the Group as of the end of the fiscal year ended March 31, 2023, unless otherwise noted.

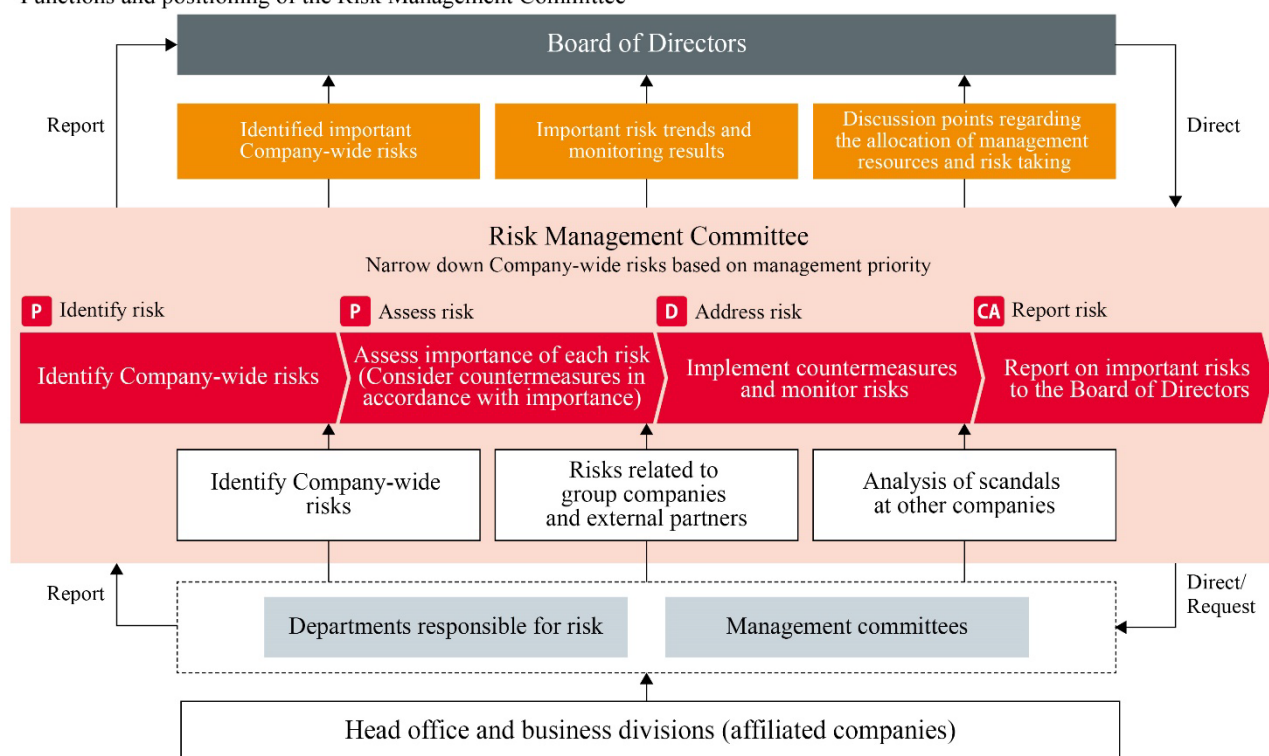

(1) Risk management system

The risk management systems adopted by the Company are based on the Risk Management Rules outlining basic policies and management systems concerning risk management, with the President and Representative Director as the highest management executive.

The Risk Management Committee established by the President and Representative Director is the central organization for Group-wide risk management. It works to identify and assess various risks, as well as specify priority risks, and consider countermeasures. Based on the policies of the Committee, individual business divisions and departments coordinate risks relating to their own particular business domains and functions. Results are reported to the Board of Directors through the Committee. The Board of Directors considers responses to important risks that the Committee thinks may have a significant impact on the Group's business activities. When an important risk is recognized to be manifesting, units for taking countermeasures tailored to the expected severity are organized, and prompt and appropriate action is undertaken.

In addition to the above, product market risks arising from daily business activities are handled by individual business divisions, and financial risks by the Accounting & Finance Department and related business divisions.

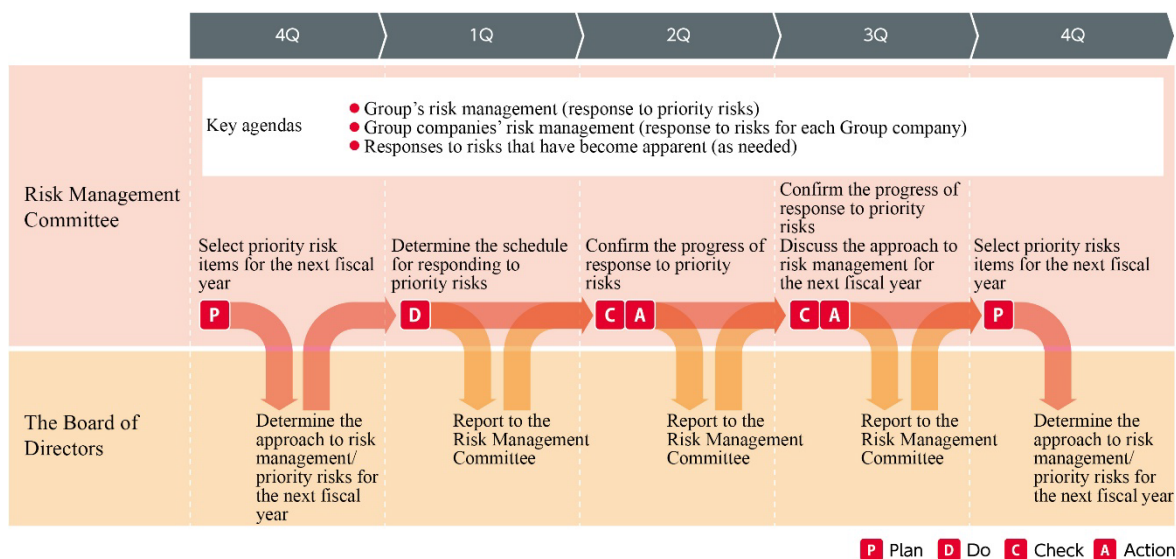

Functions and positioning of the Risk Management Committee

(2) Risks affecting business operations

Annual risk management schedule

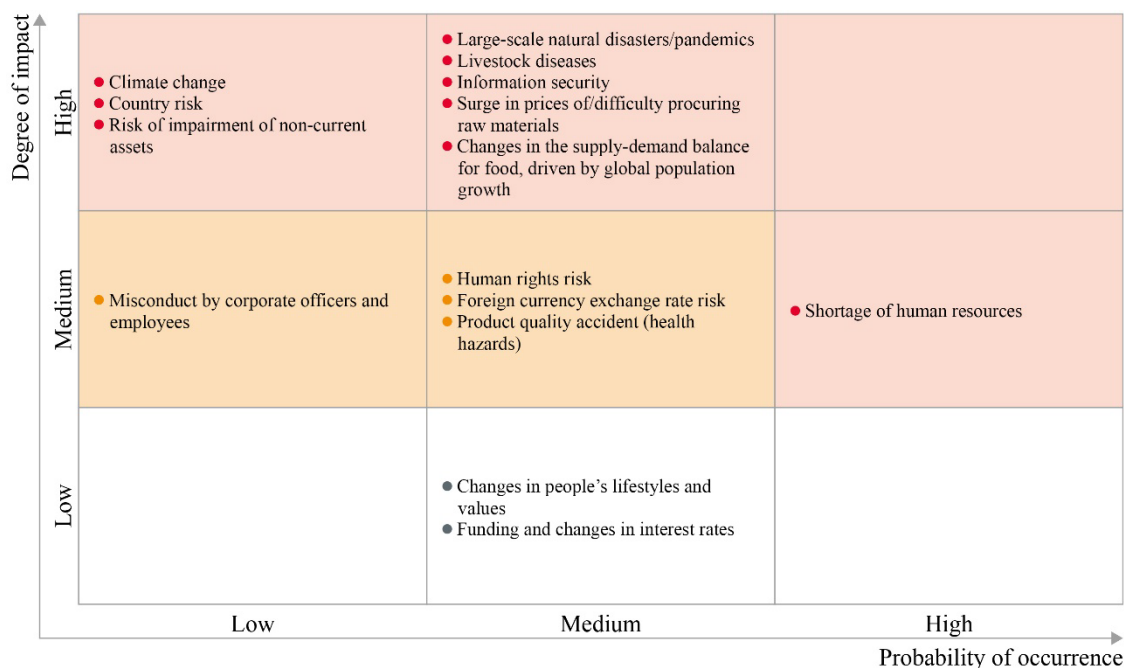

At the Company, the Risk Management Committee identifies priority risks that the Group should address, and deals with these risks in the order of priority throughout a year.

Out of all risks surrounding the Group, we have extracted those that could materially affect our operations and plotted them onto a risk map (see the chart below).

When we identify priority risks that the Group should address, we take into consideration this risk map, social circumstances, and the status of the Group. We also supervise risk management by each Group company, with the Risk Management Committee discussing risks that have become apparent as needed, to address these risks across the Group.

Details of risk items on the risk map are as provided below. The Group has determined these risk items based on its status as of the end of the fiscal year ended March 31, 2023.

Risk item	Changes in people's lifestyles and values
Probability of occurrence: Medium	Degree of impact: Low
Description of the risk	
<p>Changes in people's lifestyles and values have created the need for diverse food solutions. In fact, we are now prompted to meet more diversified and fragmented needs, such as the need for addressing food allergy, providing gluten-free products, providing low-salt or low-carb products amid health-conscious trends; responding to emerging values that have taken root by providing vegan, halal, or organic products; and catering to new food lifestyles for people working from home. Our continued efforts to meet such diversifying needs could result in increased product lines and consequently declined productivity, or our inability to adapt to a dizzying pace of change in consumer needs. As a result, these needs could affect the Group's operating results and financial position.</p>	
Responses to the risk	
<p>Factors that affect people's lifestyles and values are wide-ranging, from economic fluctuations, the global situation to global warming. Also, values are expected to keep on diversifying in the future. The Company has established a structure in which various divisions and departments collaborate each other to understand and satisfy customer needs. Such divisions and departments include those responsible for communication with customers, those responsible for analyzing a variety of eating habits and subsequently proposing new products, those responsible for research and development of new protein alternatives, and those responsible for marketing in each business division. In the years ahead, the Company seeks to make a profit with the delivery of value-added products and services. For instance, the Company is committed to enhancing food allergy-related products and implementing related educational activities, enhancing and expanding sales of plant-derived protein products, and developing technologies for producing meat alternatives. The Company will also deliver products catering to the needs overseas, as well as in Japan.</p>	

Risk item	Changes in the supply-demand balance for food, driven by global population growth
Probability of occurrence: Medium	Degree of impact: High
Description of the risk	
<p>The global population is projected to grow especially in developing countries going forward. In line with population growth, diversified diet, and economic growth, the world's demand for grains and other agricultural crops for human consumption is expected to increase. The demand for meat, which uses a lot of feed crops, mainly grains, for production, is also expected to surge in tandem with the above trends. Such increasing demand for grains, etc. is posing a risk of food shortage for the future. This risk could have a material impact in the future on the stable procurement and supply of the Group which plays an important role in food infrastructure.</p>	
Responses to the risk	
<p>As this risk comprises many uncontrollable factors for the Group, such as changes in the world demographics and demand for food, we surveyed the demographics and demand for fresh meat in the future as part of the environmental analysis used in formulating our Medium-term Management Plan. We also used the results of the survey as underlying data for developing business strategies.</p> <p>How we respond to the growing demand for fresh meat and other food is one of the social issues the Group should address through its business activities. Specifically, we have strived to build a stable procurement & supply structure by improving the efficiency of fresh meat production, diversifying the regions/routes of procuring products/raw materials, and developing new suppliers. In addition, as a measure to realize a stable procurement/supply of proteins, we have worked on development of plant-based protein products and research and development of new proteins. However, we cannot guarantee that the Group can completely avoid this risk.</p>	

Risk item	Surge in prices of/difficulty procuring raw materials
Probability of occurrence: Medium	Degree of impact: High
Description of the risks	
<p>The Group is exposed to a risk of fluctuations in livestock prices as it mainly deals in fresh meats and fresh meat-related processed products and fresh meats are used as raw materials for our products including hams, sausages, and processed foods, not to mention fresh meats for sale. Our domestic and overseas production and breeding businesses, which supply fresh meats, are also affected by fluctuations of feed and crude oil prices, as well as the conditions of product markets. Our dairy products and auxiliary raw materials for processed products (e.g. flour and marine products) are also exposed to a risk of fluctuations in product markets and prices of raw materials. Further, the outbreak of livestock diseases (such as BSE, avian influenza, foot-and-mouth disease, porcine epidemic diarrhea, swine fever, and African swine fever) and the invocation of safeguards against such livestock diseases (emergency import restriction) could affect the entire livestock industry and ultimately the Group's operating results and financial position.</p>	
Responses to the risks	
<p>These risks comprise many uncontrollable factors for the Group, such as the global supply-demand trends and economic fluctuations, and constantly manifest themselves in both positive and negative contexts. To mitigate negative impacts beyond our expectations to the extent possible, we have diversified the procurement routes of products, raw materials, and feed, developed high value-added products, and moved forward with the branding of these products, for instance. We have also strived to ensure stable procurement of raw materials in anticipation of fluctuations in product demand; strengthen disease prevention systems and improve productivity of the production and breeding business; and maintain appropriate meat inventory levels. However, we cannot guarantee that the Group can avoid these risks.</p>	

Risk item	Shortage of human resources
Probability of occurrence: High	Degree of impact: Medium
Description of the risk	
<p>With a decline in the working age population, diversification of work ethics and lifestyles, and increasing mobility of human resources, it has become increasingly difficult for companies to secure human resources. The acquisition, development and retention of talented and diverse human resources are essential to new value creation and innovation. The failure to secure such human resources as expected could affect the Group's operating results and financial position.</p>	
Responses to the risk	
<p>The Group has presented the ideal image as the Ideal Human Resources Sought and has placed the image at the root of its human resources measures. Specifically, we have strived to acquire talented human resources through the recruitment of new graduates and mid-career talent, develop them through systematic education programs and succession plans, and retain them by holding career counselling, etc. We have also worked to promote flexible workstyles catering to the needs of the time and creation of a pleasant workplace environment for our employees. However, we cannot guarantee that the Group can completely avoid this risk.</p>	

Risk item	Product quality accident (health hazards)
Probability of occurrence: Medium	Degree of impact: Medium
Description of the risk	
<p>The Group deals in a wide array of products ranging from fresh meats, fresh meat-related processed products, dairy and marine products. As such, quality or safety problems caused by contamination or incorrect labeling, for instance, or its non-compliance with the Food Sanitation Act or other related laws and regulations could ultimately incur product recall costs, claims for damages, or suspension of business operations. Any of these situations could affect the Group's operating results and financial position.</p>	
Responses to the risk	
<p>For the purpose of preventing and mitigating the risk to the extent possible, we have established a group-wide quality assurance system that assesses whether the Group complies with laws and regulations on labeling and specifications, audits production plants in Japan and overseas, inspects for harmful microorganisms and veterinary drug residues, and continues to provide education on quality assurance. In addition, we have obtained third-party certifications at our production plants to drive our food safety initiatives. Further, to advance to the next stage of quality assurance in response to changes and demands of the times, we have revised our quality policy during the fiscal year ended March 31, 2023. We will promote our food safety initiatives under the new quality policy so we can deliver safer and better quality products and services to our customers.</p> <p>In the event any of our offerings, including products, are discovered to have problems, the Group will promptly disclose the information and implement thorough-going measures to prevent the spread of such problems, with the utmost emphasis on our customers, and mitigate reputational risk. However, when an event that is too severe to be resolved by these measures or a problem that impacts society as a whole (e.g. a problem that threatens food safety) takes place, it is difficult to predict the probability and timing of such event or problem occurring and the magnitude of its impact. In such cases, we cannot guarantee that the Group can completely avoid this risk.</p>	

Risk item	Large-scale natural disasters/pandemics
Probability of occurrence: Medium	Degree of impact: High
Description of the risks	
<p>The Group has production, manufacturing, logistics, sales, R&D, and other business locations in Japan and overseas to operate business globally. In the event of an earthquake, fire, a large-scale natural disaster resulting from climate change, or an outbreak of infectious disease such as COVID-19, our facilities may be damaged or we may have difficulty securing necessary personnel, which could cause a shutdown of our business activities, a delay in production and shipment, or restriction of sales activities. Any of these situations could affect the Group's operating results and financial position.</p>	
Responses to the risks	
<p>The Group periodically enhances and revises its disaster prevention and BCP manuals, and establishes measures to enable key operations to continue even in the event of a crisis, with employee safety as the highest priority.</p> <p>Current BCP primarily anticipates the occurrence of large-scale natural disasters, pandemics, and emergency situations overseas. We are building a framework that will facilitate steady recovery measures, including formulating scenarios that could have a big impact on our business, and preparing an initial response through the selection of priority business operations. However, in cases where emergencies that are too severe to be coped with by these measures take place, it is difficult to predict the probability and timing of such emergencies occurring and the magnitude of their impact. In such cases, we cannot guarantee that the Group can completely avoid this risk.</p>	

Risk item	Country risk
Probability of occurrence: Low	Degree of impact: High
Description of the risk	
<p>In countries overseas where the Group operates business, natural disasters from extreme weather, the outbreak of infectious diseases, heightened geopolitical tensions, and drastic changes in the economic environment could put its business continuity at risk. Also, sudden changes in the legal systems of the countries where the Group operates business or which it imports from or exports to could affect its operating results and financial position.</p>	
Responses to the risk	
<p>To prepare against emergency situations overseas, we have determined how we initially respond to such situations, including our decisions as to our business continuity, while placing a priority on the safety of our employees. Also, in the event of sudden changes in the legal framework of countries in which the Group operates business or which it imports from or exports to, the Company or the Group companies in these countries will promptly gather information, and consider and implement countermeasures. However, we cannot guarantee that the Group can completely avoid this risk.</p>	

Risk item	Livestock diseases
Probability of occurrence: Medium	Degree of impact: High
Description of the risk	
<p>The Group produces or procures livestock both in Japan and overseas. The outbreak of livestock diseases (such as BSE, avian influenza, foot-and-mouth disease, porcine epidemic diarrhea, swine fever, and African swine fever) could affect the results of the Group's fresh meats and processed foods businesses and its financial position.</p>	
Responses to the risk	
<p>While the Group has strived to strengthen its disease prevention systems in the production and breeding business, the livestock disease risk comprises many uncontrollable factors, and thus, we cannot guarantee that the Group can completely avoid this risk. In addition, to mitigate the negative impact of this risk on our procurement beyond our expectations, both in Japan and overseas, we have sought to diversify our procurement routes by decentralizing regions of its suppliers. In the event of an outbreak of livestock diseases in Japan or overseas, we will make every effort to supplement the shortage with domestically produced raw materials when it is difficult to import them, or supplement the shortage with imported raw materials when it is difficult to procure them domestically.</p>	

Risk item	Foreign currency exchange rate risk
Probability of occurrence: Medium	Degree of impact: Medium
Description of the risk	
<p>Expenses and revenues arising from our foreign currency-denominated transactions and foreign currency-denominated receivables and payables, translated into the Japanese yen, are exposed to the impact of foreign exchange rate fluctuations. The risk constantly becomes apparent in both positive and negative contexts. In addition, there is a risk that the total equity attributable to owners of the parent on the consolidated financial statements varies depending on the translation differences when the financial statements of overseas consolidated subsidiaries prepared in foreign currencies are translated into the Japanese yen. As a consequence, this may affect the Group's operating results and financial position through other comprehensive income.</p>	
Responses to the risk	
<p>The Group has established the "currency risk management policies" to hedge risks associated with such foreign currency-denominated transactions, to continually monitor foreign exchange rates, and to periodically assess risks associated with foreign exchange rate fluctuations. All hedge transactions using derivatives, such as foreign currency forward exchange contracts, are conducted based on currency risk management policies and internal regulations that specify transaction authority and transaction amount limits.</p> <p>To reduce the risk of fluctuations in future cash flows from foreign currency-denominated transactions due to fluctuations in foreign exchange rates, the Group has hedged the risk using derivatives, such as foreign currency forward exchange contracts. However, we cannot guarantee that the Group can completely avoid this risk. In the event of exchange rate fluctuations beyond our expectations, such hedge transactions aimed at reducing the risk could pose other risks such as a loss of opportunity.</p>	

Risk item	Funding and changes in interest rates
Probability of occurrence: Medium	Degree of impact: Low
Description of the risk	
<p>The Group has raised the majority of its necessary funds with interest-bearing liabilities, including borrowings from outside lenders. As of March 31, 2023, the majority of our interest-bearing liabilities totaling about ¥242.1 billion are borrowings at fixed interest rates. Although we believe that the direct impact of rises in interest rates on the Group is minimal at the moment, a sustained rally in interest rates in the future could incur a higher interest cost in funding, and as a result, could affect the Group's operating results and financial position.</p>	
Responses to the risk	
<p>With a view to diversifying funding costs and the risk, the Group has sought to secure stable funding at low cost by combining direct and indirect funding, while taking into account the balance between long-term and short-term borrowings. In addition, the Group has established committed lines of credit so that it can secure working capital in the near term in case of a sudden change in the funding environment. At the same time, the Group has introduced a cash management system (CMS) in Japan and considers expanding the system overseas with the aim of improving its funding efficiency and reducing financing costs.</p> <p>However, in the event that the funding environment deteriorates beyond our expectations in the wake of a financial crisis or other events, we cannot guarantee that the Group can completely avoid this risk.</p>	

Risk item	Risk of impairment of non-current assets
Probability of occurrence: Low	Degree of impact: High
Description of the risk	
<p>In the event that the value of the non-current assets owned by the Group declines due to deteriorated profitability or changes in economic and other conditions, it will apply impairment accounting as necessary. As of March 31, 2023, the total carrying amount of property, plant and equipment, right-of-use assets, intangible assets and goodwill, and investment property included in other non-current assets amounted to approximately ¥427.6 billion. In the event of impairment of non-current assets, the impairment losses are recognized in other expenses, which could affect the Group's operating results and financial position.</p>	
Responses to the risk	
<p>For investments above a certain amount, the Group makes efforts to raise the accuracy of the estimated return on investments by analyzing assumptions and anticipated risks, and discussing the appropriateness of its income and expenditure plan and the collectability of its investments at management committees based on the set amount and the importance of investments.</p> <p>After investments are made, in cases where the returns on investments are expected to significantly fall short of the forecasts, the Group seeks to mitigate the risk by discussing improvement measures and implementing such measures, given that the status of investments must be reported periodically to bodies responsible for approval.</p> <p>However, in the event that business conditions deteriorate or economic conditions change beyond our expectations, we cannot guarantee that the Group can completely avoid this risk.</p>	

Risk item	Information security
Probability of occurrence: Medium	Degree of impact: High
Description of the risk	
<p>In operating business, the Group uses information systems for production, sales, accounting, and other operations. These information systems may become unavailable in the wake of an earthquake or other natural disaster, equipment failure, advanced cyberattacks, and other security issues that may result in the leakage of personal or confidential information, or its shutdown for a certain period of time. Any of such situations could affect the Group's operating results and financial position.</p>	
Responses to the risk	
<p>Recognizing that information security is a major challenge for us in operating our business, we assess the risk across the Group and systematically implement appropriate information security measures. However, as it is difficult to fully prevent cyberattacks and other threats, we cannot guarantee that the Group can completely avoid this risk.</p>	

Risk item	Human rights risk
Probability of occurrence: Medium	Degree of impact: Medium
Description of the risk	
<p>The Group recognizes that human rights issues in its business and supply chain could pose a significant risk. In the event that human rights issues arise in its business or supply chain and the Group fails to adequately cope with these issues, the Group may lose its social credibility. This, as a result, could affect its operating results and financial position.</p>	
Responses to the risk	
<p>The Group implements human rights due diligence and has designated occupational accidents (occupational safety and health), harassment, and long working hours as priority risks. Each Group company has selected and worked to prevent at least one risk out of these priority risks. In the event that any of these risks manifest themselves, we will make every effort to prevent their recurrence as a priority issue – not to mention promptly address them. In addition, we are strengthening our engagement with suppliers through sustainable procurement initiatives.</p> <p>Although we have sought to prevent human rights issues from materializing, we cannot guarantee that the Group can completely avoid the risk in the event that issues beyond our expectations occur.</p>	

Risk item	Misconduct by corporate officers and employees
Probability of occurrence: Low	Degree of impact: Medium
Description of the risk	
<p>Aiming to be a corporate group with a high level of transparency and integrity, the Group has continuously strived to ensure and entrench the awareness of compliance. However, in the event of compliance issues, such as violations of laws and regulations by individual corporate officers or employees, punishment under laws and regulations or social sanctions could undermine the Group's brand value, and as a result, could affect its operating results and financial position.</p>	
Responses to the risk	
<p>For compliance issues, the Compliance Committee, consisting of Directors and Executive Officers appointed by President and Representative Director, supervises the entire Group. Also, the Compliance Department of the Company has continued to implement measures that help raise awareness of compliance among all our corporate officers and employees at all Group companies. In addition, we have set up whistleblowing channels both in Japan and overseas, and have set forth matters regarding the framework for dealing with and protecting whistleblowers properly, to ensure early detection and correction of misconduct.</p> <p>To prevent bribery, the Group prohibits the provision of entertainment and gifts to public officials under the NH Foods Group Action Standards (Japan version) in Japan and the NH Foods Group Overseas Governance Policy for Group companies overseas.</p>	

Risk item	Climate change
Probability of occurrence: Low	Degree of impact: High
Description of the risk	
<p>Production/manufacturing activities may stagnate due to extreme weather conditions, such as drought and torrential rains; environmental pollution may be caused by accidents or negligence, and subsequent restoration activities or liability for damages may arise; and there may be a surge in environmental investments due to revisions of related laws and regulations. Any of these situations could affect the Group's operating results and financial position.</p>	
Responses to the risk	
<p>The Group recognizes that a rise in feed prices caused by climate change is an important risk, and thus, has sought to mitigate its impact by improving the feed conversion ratio (the amount of feed consumed per unit weight of livestock), formulating feed in-house, and strengthening collaboration with feed companies, for instance.</p> <p>For details, refer to “Basic Views About and Approach to Sustainability, (2) Responses to TCFD recommendations.”</p>	

Shareholdings

1) Criteria and approach to classification of investment shares

Shares held by the Company are classified into two categories: those held for “pure investment purposes” and those held for “other than pure investment purposes.” Shares held for “pure investment purposes” are held exclusively to gain profit from changes in the value of the shares or receipt of dividends. In contrast, other shares are classified as those held for “other than pure investment purposes.” Shares held for “other than pure investment purposes” include shares for which the Company has the “authority to exercise voting rights” in accordance with trust agreements, other contracts, or legal provisions. As of the submission date, no shares are held for “pure investment purposes.”

2) Investment shares held for other than pure investment purposes

a. Methods for verifying holding policies and rationality of holdings, and details of verification by the Board of Directors, etc., regarding the appropriateness of holding individual issues

Although the Company’s principle is not to hold shares in cross-shareholdings, in cases where it is recognized that cross-shareholding is essential for sustainable growth of the Group or improvement of the corporate value, such as for reinforcement of alliances in order to maintain business transactions and to expand our business, and for smooth fund raising, the Company may hold shares in cross-shareholdings. The Company reviews all of our invested shares once a year and closely examines whether the benefit of holding shares, risk of stock price fluctuation and credit risk, etc. of the issuing companies are worth the capital cost, and comprehensively determines whether holding such shares is appropriate or not. If the Company determines that the necessity of holding certain shares has become lower, the Company implements disposal of such shares as appropriate having regard to the stock price and market trends, etc. However, there are cases where even if the significance of holding certain shares is recognized, disposal of such shares may be implemented upon agreement with an issuing company. The total market value of the Company’s shares in cross-shareholdings as of March 31, 2023 was approximately 22.9 billion yen, or 2.4% of the Company’s total consolidated assets, which is not a large ratio. However, the Company will continue to periodically review all of its invested shares to reduce the number of shares held.

b. Number of issues and carrying amount on the balance sheet

	Number of issues	Total carrying amount on the balance sheet (millions of yen)
Unlisted shares	28	2,866
Shares other than unlisted shares	54	15,818

(Issues for which the number of shares increased during the fiscal year)

	Number of issues	Total acquisition cost related to the increase in the number of shares (millions of yen)	Reasons for the increase in the number of shares
Unlisted shares	-	-	-
Shares other than unlisted shares	12	30	Regular market purchases through the partner shareholding association

(Issues for which the number of shares decreased during the fiscal year)

	Number of issues	Total acquisition cost related to the decrease in the number of shares (millions of yen)
Unlisted shares	1	253
Shares other than unlisted shares	16	953

(Changes in the number of issues and carrying amount on the balance sheet)

Year	74th	75th	76th	77th	78th
Fiscal year-end	March 2019	March 2020	March 2021	March 2022	March 2023
Number of issues	101	101	97	93	82
Total carrying amount on the balance sheet (millions of yen)	18,586	17,213	21,430	19,803	18,684

c. Information on the number of shares and carrying amount on the balance sheet for each issue of specified investment shares and shares deemed to be held

Specified investment shares

Name of issue	Fiscal year ended March 31, 2023	Fiscal year ended March 31, 2022	Purpose of holding the shares, overview of the business alliance, etc., quantitative holding effect, and reason for the increase in the number of shares	Shareholding in the Company

- (Notes)
- At the stage of selecting the top issues in the carrying amount on the balance sheet, specified investment shares and shares deemed to be held are not combined.
 - Regarding 44 issues of specified investment shares, including HEIWADO CO., LTD. in the fiscal year and 51 issues, including HEIWADO CO., LTD. and Takashimaya Company, Limited in the previous fiscal year, the carrying amount on the balance sheet is 1/100 or less of the Company's capital stock. The table lists the top 60 issues, including specified investment shares and shares deemed to be held.
 - "—" indicates that the Company does not hold such shares. "*" indicates that the description is omitted because the carrying amount on the balance sheet of the shares is 1/100 or less of the Company's capital stock and that the issue is not one of the top 60 issues in order of the carrying amount on the balance sheet.
 - The Company reviews all of our invested shares once a year and closely examines whether the benefit of holding shares, risk of stock price fluctuation, and credit risk, etc. of the issuing companies are worth the capital cost, and comprehensively determines whether holding such shares is appropriate or not.
 - TOMONY Holdings, Inc. does not hold the Company's shares, while The Kagawa Bank, the company's subsidiary, does.
 - Sompo Holdings, Inc. does not hold the Company's shares, while Sompo Japan Insurance Inc., the company's subsidiary, does.
 - Mitsubishi UFJ Financial Group, Inc. does not hold the Company's shares, while MUFG Bank, Ltd., Mitsubishi UFJ Trust and Banking Corporation, and Mitsubishi UFJ Morgan Stanley Securities Co., Ltd., subsidiaries of the company, do.
 - Sumitomo Mitsui Trust Holdings, Inc. does not hold the Company's shares, while Sumitomo Mitsui Trust Bank, Limited, the company's subsidiary, does.
 - Mebuki Financial Group, Inc. does not hold the Company's shares, while JOYO BANK, Ltd., the company's subsidiary, does.
 - Dai-ichi Life Holdings, Inc. does not hold the Company's shares, while The Dai-ichi Life Insurance Company, Limited, the company's subsidiary, does.
 - Sumitomo Mitsui Financial Group, Inc. does not hold the Company's shares, while Sumitomo Mitsui Banking

Corporation and SMBC Nikko Securities Inc., subsidiaries of the company, do.

Financial Information

1. Preparation of consolidated financial statements and non-consolidated financial statements

(1) The consolidated financial statements of NH Foods Ltd. (the “Company”) have been prepared in accordance with International Financial Reporting Standards (“IFRS”), pursuant to the provisions of Article 93 of the “Regulation on Terminology, Forms, and Preparation Methods of Consolidated Financial Statements” (Ministry of Finance Order No. 28 of 1976, the “Regulation on Consolidated Financial Statements”).

(2) The non-consolidated financial statements of the Company have been prepared based on the “Regulation on Terminology, Forms, and Preparation Methods of Financial Statements” (Ministry of Finance Order No. 59 of 1963, the “Regulation on Financial Statements”).

The Company falls under the category of special companies submitting financial statements and has prepared the non-consolidated financial statements pursuant to the provisions of Article 127 of the Regulation on Financial Statements.

2. Audit certification

Pursuant to the provisions of Article 193-2, Paragraph 1 of the Financial Instruments and Exchange Act of Japan, the consolidated and non-consolidated financial statements for the fiscal year ended March 31, 2023 (from April 1, 2022 to March 31, 2023) have been audited by Deloitte Touche Tohmatsu LLC.

3. Special measures to ensure fair presentation of the consolidated financial statements and other public filings as well as internal system to appropriately prepare the consolidated financial statements and other public filings in accordance with IFRS

The Company has taken special measures to ensure the fair presentation of the consolidated financial statements and other public filings and has developed an internal system to appropriately prepare the consolidated financial statements and other public filings in accordance with IFRS as follows:

(1) In order to have an appropriate understanding of the contents of the accounting standards and other principles and to develop a system so that the Company can properly respond to the changes in the accounting standards and other principles, the Company has become a member of the Financial Accounting Standards Foundation and participates in seminars held by organizations and bodies with expertise.

(2) In order to appropriately apply IFRS, the Company keeps itself updated about the latest IFRS by obtaining press releases and standards disclosed by the International Accounting Standards Board.

1. Reporting company

NH Foods Ltd. (the “Company”) is a stock company incorporated in Japan. The address of its registered office is Kita-ku, Osaka-shi, Osaka-fu. The main businesses of the Company and its subsidiaries (the “Group”) and the affiliated companies of the Group are processing and packaging ham, sausage, and other processed food products; production and distribution of fresh meat; and production and distribution of marine products, dairy products, etc.

2. Basis of preparation of consolidated financial statements

(1) Matters on compliance with IFRS

The consolidated financial statements of the Group meet the requirements of “Specified Company Complying with Designated International Accounting Standards” set forth in Article 1-2 of the Regulation on Consolidated Financial Statements (the “Regulation”) and thus have been prepared in compliance with IFRS as stipulated in Article 93 of the Regulation.

(2) Basis of measurement

Unless indicated in “Note 3. Significant accounting policies” and “32. Hyperinflation adjustment,” the consolidated financial statements of the Group are prepared at cost.

(3) Functional currency and presentation currency

The consolidated financial statements are presented in Japanese yen, which is the Company’s functional currency. Amounts are rounded to the nearest million yen.

(4) Change in presentation

(Consolidated Statements of Financial Position)

“Assets held for sale,” which was included in “Other current assets” in the consolidated financial statements as of March 31, 2022, has been presented separately in the fiscal year ended March 31, 2023 because the amounts became material. To reflect this change in presentation, the consolidated statement of financial position as of March 31, 2022 has been reclassified.

As a result, ¥15,532 million presented as “Other current assets” in the consolidated statement of financial position as of March 31, 2022 has been reclassified as “Other current assets” of ¥15,096 million and “Assets held for sale” of ¥436 million.

3. Significant accounting policies

The following accounting policies shall be considered the same as the accounting policies applied throughout the period indicated in the consolidated financial statements, unless stated otherwise.

(1) Basis of consolidation

1) Subsidiaries

Subsidiaries are entities controlled by the Group. Control is achieved where the Company has power over the investee, is subject to the fluctuation of the return derived from the involvement with the investee, and has the ability to influence the return through the power which the Company has over the investee.

Financial statements of the subsidiaries are a part of the consolidation from the date the Group achieves control to the date the Group loses control. If the accounting policies adopted by the subsidiaries differ from those adopted by the Group, financial statements of these subsidiaries are adjusted as necessary. Significant intergroup transactions and balances are eliminated in preparing the consolidated financial statements.

Changes in interest of subsidiaries which do not result in loss of control are accounted for as equity transactions. Carrying amounts of total equity attributable to owners of the parent and non-controlling interests are revised to reflect the relative fluctuation of the interests in the subsidiary. The difference in the amount of non-controlling interests and the paid amount or received amount is directly recognized in equity and is allocated as total equity attributable to owners of the parent. If control over subsidiaries is lost, the difference between (1) the total of fair value of compensation received and fair value of the remaining interest and (2) assets (including goodwill) and liabilities of the subsidiary and the original carrying amount of the non-controlling interests is recognized as profit or loss. As of the date when control is lost, the fair value of the remaining investment is deemed to be the fair value at the first recognition as accounted for pursuant to IFRS 9 “Financial Instruments” (“IFRS 9”) or as the cost initially recognized for investment in associates.

If it is not acceptable for a subsidiary to settle on the consolidated closing date under the local laws where the subsidiary is located, financial statements based on provisional settlement of accounts carried out on the consolidated closing date are used for the financial statements of subsidiaries with different closing dates.

2) Associates

Associates are entities on whose finance and management policies the Group has significant influence, but has no control or joint control. If the Group possesses 20% to 50% of voting rights of another entity, the Group is presumed to hold significant influence over such entity.

Associates are accounted for using the equity method from the date the Group starts to have significant influence until the date such influence is lost. If the accounting policies adopted by the associates differ from those adopted by the Group, the financial statements of such associates are adjusted as necessary. Under the equity method, the invested amount is first measured at cost and thereafter, the invested amount is adjusted according to the fluctuation of the Group’s interest after the acquisition in relation to net assets of the associate.

The consolidated financial statements include the financial statements of associates with different closing dates since unification of the closing date is impracticable due to relationships with other shareholders. With regard to the financial statements of such associates, significant transactions or events which occur during the period between the different closing dates are adjusted.

(2) Business combinations

Business combinations are accounted for by applying the acquisition method. The purchase price is measured by adding up the fair values of the assets transferred in exchange of control of the acquired company, the assumed liabilities and the equity instruments issued by the Company at the acquisition date.

Assets and liabilities that can be identified as of the acquisition date are recognized at their fair values as of the acquisition date, excluding the following items:

- Deferred tax assets (or deferred tax liabilities) and liabilities (or assets) related to employee benefit arrangements are each recognized and measured in accordance with IAS 12 “Income Taxes” and IAS 19 “Employee Benefits.”
- Assets or disposal groups classified as for sale in accordance with IFRS 5 “Non-current Assets Held for Sale and Discontinued Operations” (“IFRS 5”) are recognized and measured under such standard.

If the purchase price exceeds the fair value of the identifiable assets and liabilities, it is accounted for as goodwill in the consolidated statement of financial position. In contrast, if the compensation is less than the fair value, it is promptly recognized as profit or loss in the consolidated statement of income.

For each transaction, the Group chooses to measure the non-controlling interests either at fair value or at the proportionate share of the recognized amount of the identifiable net assets.

Acquisition-related costs which are generated in relation to the business combination are accounted for as expenses at the time of incurrence.

If the initial accounting of the business combination is not completed by the consolidated closing date when the business combination occurred, incomplete items are measured at a provisional amount based on the best estimate. Thereafter, if the new information obtained during the measurement period within one year from the acquisition date influences the measurement of the amount recognized as of the acquisition date, the provisional amount recognized as of the acquisition date is retrospectively revised.

(3) Foreign currency translation

The consolidated financial statements of the Group are presented in Japanese yen, which is the Company’s functional currency. Also, each entity within the Group has designated its functional currency and transactions of each entity are measured based on such functional currency.

Transactions denominated in foreign currencies are converted into the Company’s functional currency at the exchange rate as of the date of transaction or an approximate rate thereof. Monetary assets and liabilities in foreign currency are converted into the Company’s functional currency based on the exchange rate as of the closing date. Translation differences which arise due to such conversion or settlement are recognized as profit or loss.

Assets and liabilities of foreign operations are converted into yen, based on the exchange rate as of the closing date and income and expenses are converted at the average exchange rate of a period unless the exchange rate during such period significantly fluctuates. Such translation differences are recognized as other comprehensive income. When the foreign operations are subject to disposal, the cumulative translation difference related to such foreign operations is recognized as profit or loss in the period of disposal. However, income and expenses of a subsidiary in the Republic of Turkey, which is in a hyperinflationary economy, are converted into yen based on the exchange rate as of the closing date due to the application of hyperinflationary accounting.

(4) Financial instruments

1) Non-derivative financial assets

(i) Initial recognition and measurement

The Group initially recognizes trade and other receivables as of the occurrence date. All the other financial assets are initially recognized as of the transaction date on which the Group becomes a contracting party of such financial instrument.

When the Group initially recognizes the non-derivative financial assets, they are classified into financial assets measured at amortized cost or financial assets measured at fair value through other comprehensive income or profit or loss. A summary of each classification and measurement model is as follows:

Financial assets measured at amortized cost

If the financial asset meets both of the following conditions, it is classified as financial assets at amortized cost.

- The financial asset is held within the Group's business model whose objective is to hold financial assets in order to collect contractual cash flows
- The contractual terms of the financial asset give rise on specified dates to cash flows that are solely payments of principal and interest on the principal amount outstanding

Financial assets at amortized cost are initially measured by adding the transaction cost to the fair value.

Financial assets measured at fair value through other comprehensive income

(a) Debt instruments measured at fair value through other comprehensive income

If the financial asset meets both of the following conditions, it is classified as a debt instrument measured at fair value through other comprehensive income.

- The financial asset is held within the Group's business model whose objective is achieved by both collecting contractual cash flows and selling financial assets
- The contractual terms of the financial asset give rise on specified dates to cash flows that are solely payments of principal and interest on the principal amount outstanding

(b) Equity instruments measured at fair value through other comprehensive income

Among financial assets other than financial assets at amortized cost and debt instruments measured at fair value through other comprehensive income, those equity instruments which made an irrevocable option at initial recognition to display subsequent fluctuation of fair value as other comprehensive income are classified as financial assets measured at fair value through other comprehensive income.

Financial assets measured at fair value through other comprehensive income are initially measured by adding the transaction cost to the fair value.

Financial assets measured at fair value through profit or loss

Financial assets other than financial assets at amortized cost and financial assets measured at fair value through other comprehensive income are classified as financial assets measured at fair value through profit or loss.

Financial assets measured at fair value through profit or loss are initially measured at fair value, and transaction costs are recognized as profit or loss at the time of occurrence.

(ii) Subsequent measurement

After the initial recognition, financial assets are measured as follows, according to classification:

Financial assets measured at amortized cost

Measured at amortized cost based on the effective interest method.

Financial assets measured at fair value through other comprehensive income

Measured at fair value, and changes in their fair values are recognized as other comprehensive income.

However, dividends from financial assets measured at fair value through other comprehensive income are recognized as profit or loss.

Financial assets measured at fair value through profit or loss

Measured at fair value, and changes in their fair values are recognized as profit or loss.

(iii) Derecognition

The Group derecognizes the financial assets if the contractual rights of cash flow generated from the financial assets expire, or if the said financial assets are assigned and all the risks and rewards of ownership are transferred. With regard to the transferred financial asset, the interests created by the Group or retained continuingly by the Group are recognized as separate assets or liabilities.

Financial assets measured at fair value through other comprehensive income

(a) Debt instrument measured at fair value through other comprehensive income

If such financial asset is derecognized, the cumulative amount of gain or loss recognized through other comprehensive income is reclassified to profit or loss.

(b) Equity instrument measured at fair value through other comprehensive income

If such financial asset is derecognized, the cumulative amount of gain or loss recognized through other comprehensive income is reclassified to retained earnings and is not recognized as profit or loss.

(iv) Impairment of financial assets

Financial assets measured at amortized cost and debt financial instruments measured at fair value through other comprehensive income are presented after deducting credit losses likely to occur in the future. The Group evaluates whether the credit risk of such financial assets has significantly increased or not since the initial recognition.

If such credit risk has not substantially increased since the initial recognition, allowance for credit losses of such financial assets is measured at the amount equivalent to 12-month expected credit losses. In contrast, if the credit risk has substantially increased since the initial recognition, allowance for credit losses of such financial asset is measured at an amount equivalent to lifetime expected credit losses.

However, with respect to trade and other receivables, allowance for credit losses is measured at an amount equivalent to lifetime expected credit losses and such measured amount is recognized as profit or loss.

2) Non-derivative financial liabilities

(i) Initial recognition and measurement

The Group initially recognizes debt securities issued by the Group as of such issuance date. All the other financial liabilities are recognized as of the transaction date in which the Group becomes a contracting party of such financial instruments.

The Group holds interest-bearing liabilities and trade and other payables as non-derivative financial liabilities. At initial recognition, those are measured by subtracting from the fair value the transaction costs which are directly attributable to the relevant issuance.

(ii) Subsequent measurement

After the initial recognition, financial liabilities are measured at amortized cost based on the effective interest method.

(iii) Derecognition

The Group derecognizes the financial liabilities if they are extinguished, i.e., when contractual obligations are performed, discharged, cancelled or expire.

3) Derivative and hedge accounting

The Group uses derivatives such as foreign currency forward exchange contracts and interest rate swap contracts to hedge currency risks and interest rate risks. These derivatives are initially measured at fair value at the time the agreement is concluded, and continue to be measured at fair value thereafter.

Changes in fair value of derivatives is recognized as profit or loss in the consolidated statement of income.

Further, the Group has not adopted hedge accounting.

4) Fair value of financial instruments

The fair value of financial instruments traded in active financial markets as of each closing date refers to prices such as a published price of the market. The fair value of financial instruments which do not have an active financial market is measured using an appropriate evaluation method.

5) Offsetting of financial assets and financial liabilities

If an enforceable legal right to offset the recognized amount of financial assets and financial liabilities currently exists, and there are intentions to settle based on net amount or to settle the liabilities simultaneously to the assets being realized, they are offset and presented at net amount in the consolidated statement of financial position.

(5) Cash and cash equivalents

Cash and cash equivalents consist of cash on hand, demand deposits and highly liquid short-term investments with original maturities of three months or less that are readily convertible to cash and are subject to insignificant risk of changes in value.

(6) Inventories

Inventories are measured at the lower of cost or net realizable value. For calculation of the cost, the average cost method is used. The cost of the inventories includes all costs of purchase, costs of conversion, and other costs incurred in bringing the inventories to their present locations and conditions.

Net realizable value is the estimated selling price in the ordinary course of business less the estimated costs of completion and the estimated costs necessary to make the sale.

(7) Agricultural accounting

Biological assets are measured at fair value less costs to sell on initial recognition and at the end of each reporting period, if the fair value can be reliably measured. Changes in fair value according to such accounting are recognized as profit or loss. In contrast, if the fair value measurements cannot be reliably measured, they are measured at cost less any accumulated depreciation and any accumulated impairment losses.

Harvested agricultural produce is reclassified from biological assets to inventories at the amount of fair value less costs to sell at the point of harvest.

(8) Property, plant and equipment

For measurement of property, plant and equipment, the cost model is adopted and they are carried at cost less any accumulated depreciation and any accumulated impairment losses. Property, plant and equipment are depreciated using the straight-line method over the estimated useful life of each asset.

Estimated useful lives of main property, plant and equipment are outlined as below:

Buildings: 20 – 40 years

Machinery and equipment: 5 – 15 years

Acquisition costs include any costs directly attributable to acquisition of such asset, initial estimated amount of costs for demolition, removal and restoration of the installation site, and borrowing cost which satisfies the conditions of asset capitalization.

Gains or losses incurred from derecognition of property, plant and equipment are included in profit or loss at the time of derecognition of such asset.

The depreciation method, the estimated useful life and the residual value are reviewed at the end of each fiscal year. If there are any changes, they are applied prospectively as changes in accounting estimates.

(9) Intangible assets and goodwill

1) Intangible assets

Intangible assets acquired separately are measured at cost on initial recognition. Intangible assets acquired in a business combination and recognized separately from goodwill are measured at the fair value at the acquisition date.

For measurement of intangible assets, the cost model is adopted and they are carried at cost less any accumulated depreciation and any accumulated impairment losses.

For amortization of intangible assets with finite useful lives, the straight-line method is used over each estimated useful life.

Except for intangible assets with indefinite useful lives, the estimated useful lives of main intangible assets are outlined as below:

Software: 5 – 10 years

Amortization method, estimated useful life and residual value are reviewed at the end of each fiscal year. If there are any changes, they are applied prospectively as changes in accounting estimates.

2) Goodwill

Measurement of goodwill on initial recognition is as described in “Note 3. Significant accounting policies (2) Business combinations.”

For goodwill, the acquisition cost less accumulated impairment losses is recorded.

(10) Leases

At the inception of a contract, the Group assesses whether the contract is or contains a lease if the contract conveys the right to control the use of an identified asset for a period of time in exchange for consideration.

For such lease contracts, the Group recognizes right-of-use assets and lease liabilities at the commencement date of the lease.

Lease liabilities are initially measured and recognized at the discounted present value of the total lease payments that are not paid at the commencement date. The interest rates implicit in the lease are used to measure the present value of the lease payments that are not paid if those rates can be readily determined. If those cannot be readily determined, the lessee’s incremental borrowing rates are used. Lease liabilities are included in “Interest-bearing liabilities” in Current Liabilities and Non-current Liabilities in the consolidated statement of financial position. Lease payments are allocated to interest expenses and repayments of lease liabilities under the interest method. Interest expenses on the lease liabilities are separately presented from the depreciation charges for the right-of-use assets in the consolidated statement of income. The Group initially measures the right-of-use assets by adding any initial direct costs, any lease payments made before the commencement date and any costs of obligations to restore the assets to the conditions required by the contracts to the amount of the initial measurement of the lease liabilities. The right-of-use assets are depreciated under the straight-line basis or another systematic basis over the lease terms.

However, the Group elects not to recognize right-of-use assets and lease liabilities for either short-term leases with a lease term of 12 months or less, or leases for which the underlying assets are of low value. The total lease payments of these leases are recognized as expenses under the straight-line basis or another systematic basis over the lease terms.

(11) Impairment of non-financial assets

For impairment of non-financial assets excluding inventories, biological assets, deferred tax assets and assets related to retirement benefits, the Group determines whether there is any indication of impairment at the end of the reporting period. If there is an indication of impairment, the recoverable amount of the asset is estimated. For goodwill and intangible assets with indefinite useful lives, the recoverable amount of the asset is estimated every year at the same time and at any time there is an indication of impairment.

Cash-generating units are considered as minimum asset groups which generate cash inflow independently of other assets or asset groups.

The recoverable amount of assets or cash-generating units is the higher of the fair value less costs of disposal or value in use. For calculation of value in use, estimated future cash flow is discounted to the present value by using the pre-tax discount rate which reflects the time value of money and specific risk of such asset.

If the recoverable amount of assets or cash-generating units is lower than the carrying amount, the carrying amount is reduced to the recoverable amount and impairment losses are recognized.

For impairment losses recognized in the past, the Group determines as of the closing date of each reporting period whether there is an indication of possible decrease or extinguishment of loss.

If there is an indication of reversal of impairment losses, recoverable amount of the asset is estimated. Further, if such recoverable amount is more than the carrying amount, impairment losses are reversed.

The maximum amount reversed is an amount which is not higher than the carrying amount less the depreciation cost or amortization cost if impairment losses are not recognized.

Impairment losses recognized in relation to goodwill are not reversed.

(12) Post-employment benefits

The Group adopted the defined benefit plan comprised of defined benefit corporate pension plan and retirement lump-sum severance plan, and defined contribution pension plan, as post-employment benefit plans.

1) Defined benefit plan

The liabilities or assets of the defined benefit plan are recognized at an amount representing the present value of the defined benefit obligations less the fair value of the plan assets (the effect of the asset ceiling may be taken into account if necessary).

The present value of the defined benefit obligations is calculated by using the projected unit credit method. The discount rate used in this calculation is determined by reference to market yields at the end of the reporting period on high-quality corporate bonds for the period until the expected date of future benefit payment.

Remeasurement of the net defined benefit liabilities or assets is recognized as other comprehensive income at the time of occurrence and is immediately reclassified as retained earnings. Past service cost and any gain or loss on settlement are recognized as profit or loss.

2) Defined contribution pension plan

Expenses related to post-employment benefits of the defined contribution pension plan are recognized as expenses at the time an employee provides the relevant service.

(13) Share-based payment

1) Stock Option Plan

The Group has adopted the Stock Option Plan as equity-settled share-based payment plan. The values of stock options are estimated based on fair value as of the grant date, which is recognized as expenses in the consolidated statement of income and a corresponding amount is recognized as an increase of equity in the consolidated statement of financial position. The fair value of the granted option is calculated using the Black Scholes Model and other models, by taking into account terms and conditions of the option.

2) Performance-Based Stock Compensation Plan

The Group has introduced the Performance-Based Stock Compensation Plan as an equity-settled share-based payment plan for officers. Under the Plan, services received are measured at the fair value of the Company's shares as of the grant date, and recognized as expenses in the consolidated statement of income throughout the vesting period. A corresponding amount is recognized as an increase of equity in the consolidated statement of financial position. The fair value of the Company's shares as of the grant date is measured based on observable market prices, and the expected dividends are incorporated in the measurement of the fair value.

3) Trust-type Employee Shareholding Incentive Plan

The Group has introduced the Trust-type Employee Shareholding Incentive Plan (hereinafter the “Plan”) as a cash-settled share-based payment plan. Under the Plan, services received are measured at the fair value of the liabilities incurred, and recognized as expenses in the consolidated statement of income from the grant date to the trust expiration date. A corresponding amount is recognized as an increase of liabilities in the consolidated statement of financial position. The fair value of the liabilities is remeasured as of the end of each period until settlement, and the changes in the fair value are recognized as profit or loss.

(14) Revenue

Pursuant to IFRS 15 “Revenue from Contracts with Customers,” the Group recognizes revenue based on the following five-step approach:

Step 1: Identify the contract(s) with a customer

Step 2: Identify the performance obligations in the contract

Step 3: Determine the transaction price

Step 4: Allocate the transaction price to the performance obligations in the contract

Step 5: Recognize revenue when (or as) the entity satisfies a performance obligation

The Group mainly engages in the sales of hams and sausages, processed food products, fresh meats, marine products and dairy products.

With respect to the sales contracts of products with customers, since control over the products transfers to the customer and the performance obligations are satisfied as of when the products are delivered to the customer, revenue is recognized at such time.

Revenue is determined as the amount of the consideration in the sales contract less the rebates and discounts based on the net sales or the sales amount, and the consideration expected to be refunded to the customer is reasonably estimated and is recognized as refund liabilities.

In addition, if the Group is involved in the sales of products as an agent, revenue is recognized as a net amount.

The consideration in a sales contract for products is primarily recovered within one year from when the products are delivered to the customer. Furthermore, significant financing components are not included.

(15) Government grants

Regarding government grants, if the conditions for government grants are met and there is a reasonable guarantee for receiving government grants, government grant income is recognized at fair value. Government grants for incurred expenses are recognized as a profit or loss in the same consolidated fiscal year. Regarding government grants for acquiring assets, the amount of such grants is deducted from the acquisition cost of the assets.

(16) Income tax

Income tax is composed of current tax and deferred tax. Excluding items relating to business combinations and direct equity or items recognized as other comprehensive income, they are recognized as a profit or loss.

1) Current tax

Current tax is determined with the amount expected to be paid to or refunded from the tax authorities. The determination of the tax amount is based on the tax rate and tax laws that are enacted, or are substantively enacted, by the closing date of the reporting period in the country where the Group conducts its business activities and the profit or loss subject to taxation is earned.

2) Deferred tax

Deferred tax assets and liabilities are recognized for temporary differences between the accounting carrying amount and the tax amount of assets and liabilities, unused tax losses and unused tax credits as of the closing date of the reporting period.

Deferred tax assets are recognized for deductible temporary differences, unused tax losses and unused tax credits, to the extent that it is probable that future taxable income will be available against such deferred tax assets. Deferred tax liabilities are, in principle, recognized for future taxable temporary differences.

The carrying amount of deferred tax assets is reviewed every year, and reduced to the extent that it is no longer probable that sufficient taxable profit will be available to allow the benefit of part or all of that deferred tax asset to be utilized. Unrecognized deferred tax assets are re-evaluated every year, and the Group recognizes deferred tax assets that were unrecognized in the past to the extent that future taxable income is highly likely to make the recovery of deferred tax assets possible.

Furthermore, deferred tax assets and liabilities are not recognized for the following temporary differences:

- Future taxable temporary differences arising from the initial recognition of goodwill
- Temporary differences that arise from the initial recognition of assets and liabilities incurred due to transactions that have no effect on accounting profits or taxable income for tax purposes, except for business combination transactions
- Taxable temporary differences on investment in subsidiaries and associates when the timing of the reversal of the temporary differences can be controlled and it is probable that the temporary differences will not reverse in the foreseeable future
- Deductible temporary differences on investment in subsidiaries and associates when it is probable that the temporary difference will not reverse in the foreseeable future

Deferred tax assets and liabilities are determined according to the tax rate that is expected to be applied to the year the asset is realized or the liability is settled, based on the tax rate and tax laws that are enacted, or are substantively enacted, by the closing date of the reporting period.

Deferred tax assets and liabilities are offset when there is a legally enforceable right to set off current tax liabilities and current tax assets and such deferred tax assets and liabilities are imposed on the same taxable entity by the same tax authorities.

If an uncertain tax position of income tax being incurred is highly possible, a reasonable estimated amount is recognized as an asset or liability.

In addition, the Group has applied a temporary exception to the amendments to IAS 12, “International Tax Reform—Pillar Two Model Rules.”

(17) Earnings per share

Basic earnings per share are calculated by dividing profit attributable to ordinary equity holders of the parent by the weighted-average number of shares of common stock outstanding during the period, adjusted for shares of treasury stock held.

Diluted earnings per share are calculated by adjusting for the effects of all dilutive potential common stocks.

(18) Equity

1) Common stock

Regarding shares of common stock issued by the Company, issue price is recorded in common stock and capital surplus, and direct issuance costs are excluded from the capital surplus.

2) Treasury stock

If shares of treasury stock are acquired, the consideration paid including direct transaction costs is recognized as an excludable item from equity. If shares of treasury stock are disposed of, the difference between the carrying value and consideration received is recognized as an increase in equity.

(19) Assets held for sale and discontinued operations

Non-current assets or disposal groups whose carrying amounts are recovered primarily through sale transactions rather than through continuing use are classified as held for sale. To be classified as held for sale, the assets must be available for immediate sale in the present condition and the sale must be highly probable. It is only if the Group's management is committed to the sale plan and the sale is expected to be completed, in principle, within one year. Once classified as held for sale, the non-current assets or disposal groups are measured at the lower of carrying amounts and fair value less costs to sell and are not depreciated or amortized.

Discontinued operations include components of an entity that either has been disposed of or is classified as held for sale. The Group recognizes them if they represent a separate major line of Group's business or a geographical area of operations and there is a plan to dispose of one of the businesses or geographical areas.

(20) Financial reporting in hyperinflation economies

From the fiscal year ended March 31, 2023, the Group has consolidated the financial statements of its subsidiary in the Republic of Turkey after making adjustments for hyperinflationary accounting in accordance with IAS 29 "Financial Reporting in Hyperinflationary Economies." The Group restated the financial statements of the subsidiary in terms of the measuring unit at the end of the reporting period and included them in the consolidated statements so as to reflect the effect of inflation in the Republic of Turkey. As required by IAS 21 "The Effects of Changes in Foreign Exchange Rates," the Group uses the exchange rate as of the closing date when consolidating cash flows and comprehensive income of the subsidiary.

4. Significant accounting estimates and judgments

The Group's consolidated financial statements include measurements of income and expenses and of assets and liabilities, and estimates and assumptions of management regarding disclosures of contingencies as of the closing date of the consolidated fiscal year. These estimates and assumptions are based on the best judgments of management considering past performance and various factors that can be thought to be reasonable as of the closing date of the consolidated fiscal year. Based on the nature of said assumptions, there is the possibility that the actual results will differ from these estimates and assumptions.

The estimates and assumptions are continuously reviewed by management. The effects of the review of these estimates and assumptions are recognized during the accounting period in which such estimates and assumptions are reviewed and future accounting periods thereafter.

The judgments and estimates performed by management that have significant effects on the amounts of the consolidated financial statements are as follows:

- Range of consolidated subsidiaries and associates (Note 3. Significant accounting policies (1) Basis of consolidation)
- Fair value of financial instruments (Note 3. Significant accounting policies (4) Financial instruments, Note 29. Financial instruments)
- Fair value of biological assets (Note 3. Significant accounting policies (7) Agricultural accounting, Note 9. Biological assets)
- Impairment of non-financial assets (Note 3. Significant accounting policies (11) Impairment of non-financial assets, Note 10. Property, plant and equipment, Note 11. Intangible assets and goodwill, Note 12. Investments accounted for using the equity method)
- Post-employment benefits (Note 3. Significant accounting policies (12) Post-employment benefits, Note 18. Post-employment benefit plans)
- Recoverability of deferred tax assets (Note 3. Significant accounting policies (16) Income tax, Note 13. Income taxes)
- Fair value of disposal groups constituting discontinued operations (Note 3. Significant accounting policies (19) Assets held for sale and discontinued operations, Note 31. Assets held for sale and discontinued operations)

5. Segment information

(1) Overview of reportable segments

The Group's reportable segments are parts of its organizational units whose financial information is individually available, and are subject to regular review by the chief operating decision maker for the purpose of deciding the allocation of its operating resources and evaluating its business performance.

The Group categorizes the business into the following three reportable segments according to the nature of products and providing services, and the geographical areas where it sells products or provides services. The Group manages its operations by the business segment.

Processed Foods Business Division	—	Mainly domestic production and sales of hams and sausages, processed foods, and dairy products
Fresh Meats Business Division	—	Mainly domestic production and sales of fresh meats
Overseas Business Division	—	Mainly production and sales of hams and sausages, processed foods, fresh meats and marine products at overseas subsidiaries and associates

Intersegment transaction prices are determined with reference to transaction prices with external customers.

The Company has classified the marine products business relating to The Marine Foods Corporation, its subsidiaries, etc. as discontinued operation from the fiscal year ended March 31, 2022. In addition, the Company has classified the beef business relating to Breeders & Packers Uruguay S.A. ("BPU") as discontinued operations from the year ended March 31, 2023. Therefore, the corresponding figures for the year ended March 31, 2022 have been reclassified accordingly. However, figures from discontinued operations, The Marine Foods Corporation, its subsidiaries, etc. included in the Processed Foods Business Division and BPU included in the Overseas Business Division, are included in the respective reportable segments.

(2) Information regarding the reportable segments

The reportable segment information for the years ended March 31, 2022 and 2023 is as follows:

Year ended March 31, 2022 (April 1, 2021 through March 31, 2022)

(millions of yen)

	Processed Foods Business Division	Fresh Meats Business Division	Overseas Business Division	Others	Total	Eliminations, adjustments and others	Consolidated (before adjustment for discontinued operations)	Transfer to discontinued operations	Consolidated (after adjustment for discontinued operations)
Net sales

Capital expenditures	10,730	19,273	4,000	20,619	54,622	12,897	67,519	(360)	67,159
Investments accounted for using the equity method	280	442	8,365	-	9,087	-	9,087	-	9,087

- (Notes)
1. “Others” refers to operating segments not included in the reportable segments, such as the Baseball and Ballpark Business and New Business, etc.
 2. “Eliminations, adjustments and others” includes unallocated items and intersegment eliminations.
 3. Except for a few unallocated items, corporate overhead expenses and profit or loss of certain subsidiaries are allocated to each reportable operating segment. These subsidiaries provide indirect services and operational support for the Group included in each reportable operating segment.
 4. “Segment profit (loss)” is calculated by deducting cost of goods sold and selling, general and administrative expenses from net sales, and accounting for foreign exchange gains and losses determined by the Group, while deducting adjustments in accordance with IFRS and non-recurring items.
 5. Segment assets included in “Eliminations, adjustments and others” mainly consist of adjustments to right-of-use assets and others in accordance with IFRS, cash and cash equivalents of the parent company, and investment securities.
 6. “Depreciation and amortization” represents depreciation and amortization expenses for property, plant and equipment, right-of-use assets, and intangible assets. “Depreciation and amortization” in each reportable segment does not include depreciation and amortization expenses included in corporate overhead expenses and profit or loss of certain subsidiaries stated in Note 3.
 7. “Capital expenditures” represents increases in property, plant and equipment, right-of-use assets, and intangible assets.
 8. The amounts of net sales, profits, and losses, and capital expenditures of The Marine Foods Corporation, its subsidiaries, etc. included in the Processed Foods Business Division and BPU included in the Overseas Business Division have been reclassified to “Transfer to discontinued operations.”

Reconciliations of the aggregate segment profit (loss) and profit before tax for the years ended March 31, 2022 and 2023 are as follows:

	(millions of yen)	
	Year ended March 31, 2022 (April 1, 2021 through March 31, 2022)	Year ended March 31, 2023 (April 1, 2022 through March 31, 2023)
Aggregate segment profit (loss)	48,116	25,596
IFRS adjustments (Note 1)	(746)	(6,992)
Foreign exchange gains and losses (Note 2)	(2,997)	(10,079)
Adjustments for discontinued operations (Note 3)	(2,010)	2,427
Other income	10,620	19,098
Other expenses	8,512	12,191
Financial income	2,200	3,360
Financial costs	3,935	1,830
Share of profit in investments accounted for using the equity method	9,024	2,773
Profit before tax	51,760	22,162

- (Notes)
1. The major IFRS adjustments are the changes in fair value of biological assets under IAS 41 “Agriculture” and the restatement in terms of the measuring unit at the end of the reporting period under IAS 29 “Financial Reporting in Hyperinflationary Economies.”
 2. Foreign exchange gains and losses arising from the settlement of business transactions are included in the reconciliations of “Segment profit (loss).”
 3. Adjustments for discontinued operations are to deduct amounts related to discontinued operations from aggregate segment profit (loss), IFRS adjustments in Note 1, and foreign exchange gains and losses in Note 2. However, corporate overhead expenses and profit or loss of certain subsidiaries are allocated to segment profit (loss), so they are not included in the items for adjustments.

(3) Information about geographical areas

Sales information about geographical areas for the years ended March 31, 2022 and 2023 is as follows:

(millions of yen)

	Year ended March 31, 2022 (April 1, 2021 through March 31, 2022)	Year ended March 31, 2023 (April 1, 2022 through March 31, 2023)
Japan	1,029,788	1,100,719
Other areas	122,098	159,073
Total	1,151,886	1,259,792

(Note) Sales are broken down by geographical area of the distributor's domicile.

Non-current assets (excluding financial assets, deferred tax assets and assets related to retirement benefits) by geographical area as of March 31, 2022 and 2023 are as follows:

(millions of yen)

	Year ended March 31, 2022 (as of March 31, 2022)	Year ended March 31, 2023 (as of March 31, 2023)
Japan	377,757	402,485
Other areas	33,622	28,009
Total	411,379	430,494

(4) Information about major customers

Disclosure is omitted because there were no sales to a single external customer exceeding 10% of net sales in the consolidated statement of income.

6. Cash and cash equivalents

Cash and cash equivalents consisted of the following:

(millions of yen)

	Year ended March 31, 2022 (as of March 31, 2022)	Year ended March 31, 2023 (as of March 31, 2023)
Cash and deposits	93,010	72,612
Time deposits with maturities over three months	(7,636)	(7,626)
Total	85,374	64,986

(Note) The balance of “Cash and cash equivalents” in the consolidated statement of financial position matches the balance of “Cash and cash equivalents” in the consolidated statement of cash flows.

7. Trade and other receivables

Trade and other receivables consisted of the following:

(millions of yen)

	Year ended March 31, 2022 (as of March 31, 2022)	Year ended March 31, 2023 (as of March 31, 2023)
Trade notes receivable	517	232
Accounts receivable—trade	132,811	141,218
Accounts receivable—other	3,122	5,503
Less: Allowance for doubtful receivables	(433)	(293)
Total	136,017	146,660

(Note) Trade and other receivables are classified into financial assets measured at amortized cost.

8. Inventories

Inventories consisted of the following:

(millions of yen)

	Year ended March 31, 2022 (as of March 31, 2022)	Year ended March 31, 2023 (as of March 31, 2023)
Finished goods and merchandise	94,782	111,338
Raw materials and work-in-process	20,805	25,720
Supplies	4,393	4,872
Total	119,980	141,930

The amount of inventories recognized as expenses in the fiscal years ended March 31, 2022 and 2023 was ¥940,715 million and ¥1,068,708 million, respectively.

The Group measured inventories at the net realizable value, resulting in the write-down of ¥924 million and ¥1,041 million as of March 31, 2022 and 2023, respectively.

There was no significant reversal of write-down of inventories for the fiscal years ended March 31, 2022 and 2023.

9. Biological assets

The Group produces and raises cattle, hogs and chickens mainly in Japan. Overseas, the Group raises cattle in Australia, and produces and raises chickens in Turkey.

Biological assets recorded in current assets mainly consisted of three livestock species—cattle, hogs, and chickens—reared for fresh meat production. Biological assets recorded in non-current assets mainly consisted of cattle and hogs raised for breeding.

Biological assets held by the Group consisted of the following:

	Year ended March 31, 2022 (as of March 31, 2022)		Year ended March 31, 2023 (as of March 31, 2023)	
	Amount (millions of yen)	Volume	Amount (millions of yen)	Volume
Cattle	22,656	68,382	16,663	54,744
Hogs	6,204	342,292	6,862	335,807
Chickens	5,135	18,238	5,976	15,862
Others	-	-	-	-
Biological assets measured at fair value	33,995		29,501	
Current	32,755		27,984	
Non-current	1,240		1,517	

The production volume of biological assets for the years ended March 31, 2022 and 2023 is as follows:

	Year ended March 31, 2022 (April 1, 2021 through March 31, 2022)		Year ended March 31, 2023 (April 1, 2022 through March 31, 2023)	
	Amount (millions of yen)	Volume	Amount (millions of yen)	Volume
Cattle	21,638	76,304	36,324	94,142
Hogs	22,049	618,562	24,180	606,294
Chickens	66,696	311,789	72,907	279,620
Others	415	2,479	-	-

Volume units are as follows:

Cattle: heads

Hogs: heads

Chickens: tons

Changes in biological assets for the years ended March 31, 2022 and 2023 are as follows:

(millions of yen)

Beginning of the year ended March 31, 2022 (as of April 1, 2021)	24,895
Increase due to birth, purchase and breeding	101,649
Decrease due to sale	(3,185)
Decrease due to slaughter	(88,575)
Gain or loss on changes in fair value	(44)
Changes due to changes in scope of consolidation	(934)
Exchange differences on translation	188
Total	33,995
Current	32,755
Non-current	1,240
End of the year ended March 31, 2022 (as of March 31, 2022)	33,995
Increase due to birth, purchase and breeding	113,876
Decrease due to sale	(2,364)
Decrease due to slaughter	(114,177)
Gain or loss on changes in fair value	(1,027)
Exchange differences on translation	(802)
Total	29,501
Current	27,984
Non-current	1,517
End of the year ended March 31, 2023 (as of March 31, 2023)	29,501

Gain (loss) on changes in the fair value of biological assets is included in “Cost of Goods Sold” of the consolidated statement of income.

With respect to cattle and hogs, which are the Group’s biological assets, the fair value is measured according to the valuation model based on the market approach, wherein the input is the sales price of similar types of assets, and since unobservable inputs are included, it is classified as Level 3. In addition, with respect to chickens, the fair value is measured according to the valuation model based on the cost approach, wherein the acquisition costs are inputs, and since unobservable inputs are included, it is classified as Level 3.

In the Group’s activities to produce biological assets, there is a time gap between cash-out for the costs of production/feeding and cash-in from sales to third parties. In order to manage such financial risk, the Group strives to maintain working capital at an appropriate level.

10. Property, plant and equipment

(1) Changes in carrying amount, acquisition cost, accumulated depreciation and accumulated impairment losses are as follows:

(millions of yen)

Carrying amount	Land	Buildings	Machinery and equipment	Construction in progress	Total
Beginning of the year ended March 31, 2022 (as of April 1, 2021)	53,317	139,237	103,354	29,721	325,629
Acquisition	212	4,248	8,649	37,004	50,113
Changes due to changes in scope of consolidation	(1,448)	(2,570)	(1,766)	(25)	(5,809)
Disposal	(92)	(309)	(578)	-	(979)
Reclassification	(1,101)	9,942	7,260	(17,312)	(1,211)
Depreciation	(4)	(9,588)	(12,347)	-	(21,939)
Impairment losses	(82)	(822)	(1,400)	(11)	(2,315)
Foreign exchange translation differences	102	917	684	67	1,770
Others	(25)	9	(14)	(207)	(237)
End of the year ended March 31, 2022 (as of March 31, 2022)	50,879	141,064	103,842	49,237	345,022
Acquisition	414	22,933	9,585	18,650	51,582
Disposal	(388)	(1,037)	(654)	-	(2,079)
Reclassification	380	47,022	9,502	(56,952)	(48)
Transfer to assets held for sale	(656)	(4,798)	(2,398)	(340)	(8,192)
Hyperinflation adjustment	451	1,320	666	19	2,456
Depreciation	(4)	(10,097)	(12,807)	-	(22,908)
Impairment losses	(75)	(621)	(678)	-	(1,374)
Foreign exchange translation differences	(1)	280	260	1	540
Others	(77)	9	(364)	(186)	(618)
End of the year ended March 31, 2023 (as of March 31, 2023)	50,923	196,075	106,954	10,429	364,381

(millions of yen)

Acquisition cost	Land	Buildings	Machinery and equipment	Construction in progress	Total
Beginning of the year ended March 31, 2022 (as of April 1, 2021)	53,933	328,989	264,218	29,721	676,861
End of the year ended March 31, 2022 (as of March 31, 2022)	51,073	333,860	269,378	49,248	703,559
End of the year ended March 31, 2023 (as of March 31, 2023)	51,141	395,850	278,366	10,440	735,797

(millions of yen)

Accumulated depreciation and accumulated impairment losses	Land	Buildings	Machinery and equipment	Construction in progress	Total
Beginning of the year ended March 31, 2022 (as of April 1, 2021)	616	189,752	160,864	-	351,232
End of the year ended March 31, 2022 (as of March 31, 2022)	194	192,796	165,536	11	358,537
End of the year ended March 31, 2023 (as of March 31, 2023)	218	199,775	171,412	11	371,416

Depreciation of property, plant and equipment is included in “Cost of Goods Sold” and “Selling, General and Administrative Expenses” in the consolidated statement of income.

The amount of expenditures for property, plant and equipment under construction is included in “Construction in progress” in the table above.

(2) Commitments

The amount of commitments for the acquisition of property, plant and equipment as of March 31, 2022 and 2023 was ¥40,780 million and ¥3,827 million, respectively. Commitments as of March 31, 2022 include the contract amount of ¥39,147 million for the design and construction of a new baseball stadium, which represents an expected maximum contract amount and does not mean the actual payment amount.

(3) Impairment losses

Impairment losses were included in “Other Expenses” in the consolidated statement of income.

The Group recognized impairment losses on property, plant and equipment of ¥2,259 million for the fiscal year ended March 31, 2022. The impairment losses were principally associated with business assets used for the Fresh Meats Business Division and business assets and idle assets related to the Processed Foods Business Division. The impairment losses of the business assets resulted mainly from expected disposal due to reorganization of production sites and expected decreases in profitability of some subsidiaries, respectively.

The Group recognized impairment losses on property, plant and equipment of ¥1,397 million for the fiscal year ended March 31, 2023. The impairment losses were principally associated with idle assets related to the Fresh Meats Foods Business Division and business assets used for the Overseas Business Division. The impairment losses of the business assets resulted mainly from expected decreases in profitability of some subsidiaries.

The fair value less costs of disposal, which formed the basis of calculation, was determined based on the appraisal value or market value of the assets, or by other means considered appropriate by management. The determined fair value falls under the Level 3 category of the fair value hierarchy.

(4) Borrowing costs

Borrowing costs capitalized during the fiscal years ended March 31, 2022 and 2023 were ¥51 million and ¥65 million, respectively. The capitalization rates used to determine the amount of borrowing costs eligible for capitalization for the fiscal years ended March 31, 2022 and 2023 were both 0.4%.

11. Intangible assets and goodwill

(1) Changes in carrying amount, acquisition cost, and accumulated amortization and accumulated impairment losses are as follows:

(millions of yen)

Carrying amount	Goodwill	Software	Software in progress	Other	Total
Beginning of the year ended March 31, 2022 (as of April 1, 2021)	193	4,738	4,883	794	10,608
Acquisition	-	472	5,908	7	6,387
Changes due to changes in scope of consolidation	-	(12)	-	(57)	(69)
Disposal	-	(15)	-	(1)	(16)
Reclassification	-	1,073	(1,075)	2	0
Amortization	-	(1,649)	-	(35)	(1,684)
Impairment losses	-	(3)	-	(76)	(79)
Exchange differences on translation	8	20	0	23	51
Others	-	(124)	178	17	71
End of the year ended March 31, 2022 (as of March 31, 2022)	201	4,500	9,894	674	15,269
Acquisition	-	373	6,324	203	6,900
Disposal	-	(17)	(1)	-	(18)
Reclassification	-	6,208	(6,144)	96	160
Transfer to assets held for sale	-	(10)	-	-	(10)
Hyperinflation adjustment	-	3	-	297	300
Amortization	-	(2,062)	-	(34)	(2,096)
Impairment losses	-	(2)	-	(196)	(198)
Exchange differences on translation	-	3	0	6	9
Others	-	1	43	(167)	(123)
End of the year ended March 31, 2023 (as of March 31, 2023)	201	8,997	10,116	879	20,193

(millions of yen)

Acquisition cost	Goodwill	Software	Software in progress	Other	Total
Beginning of the year ended March 31, 2022 (as of April 1, 2021)	5,875	30,127	4,883	3,919	44,804
End of the year ended March 31, 2022 (as of March 31, 2022)	5,771	29,686	9,894	4,067	49,418
End of the year ended March 31, 2023 (as of March 31, 2023)	1,257	35,225	10,116	2,714	49,312

(millions of yen)

Accumulated amortization and accumulated impairment losses	Goodwill	Software	Software in progress	Other	Total
Beginning of the year ended March 31, 2022 (as of April 1, 2021)	5,682	25,389	-	3,125	34,196
End of the year ended March 31, 2022 (as of March 31, 2022)	5,570	25,186	-	3,393	34,149
End of the year ended March 31, 2023 (as of March 31, 2023)	1,056	26,228	-	1,835	29,119

Amortization of intangible assets is included in “Cost of Goods Sold” and “Selling, General and Administrative Expenses” in the consolidated statement of income.

(2) R&D expenditures

The expenditures for the research and development activities expensed during the years ended March 31, 2022 and 2023 were ¥3,206 million and ¥3,339 million, respectively, which are included in “Cost of Goods Sold” and “Selling, General and Administrative Expenses” in the consolidated statement of income.

(3) Impairment test for cash-generating units including goodwill

1) Cash-generating units

The Group tests goodwill for impairment at least once by the end of each fiscal year, or whenever there is an indication that the goodwill may be impaired. The carrying amount of goodwill is as follows:

	(millions of yen)	
	Year ended March 31, 2022 (as of March 31, 2022)	Year ended March 31, 2023 (as of March 31, 2023)
Carrying amount of goodwill	201	201

2) Calculation basis on which the recoverable amount has been determined

For the years ended March 31, 2022 and 2023, a description is omitted because the amount of goodwill is insignificant.

(4) Impairment losses

Impairment losses are included in “Other Expenses” in the consolidated statement of income.

While the Group recorded impairment losses of ¥78 million and ¥196 million for intangible assets and goodwill for the fiscal years ended March 31, 2022 and 2023, respectively, descriptions on the factors behind such impairment losses are omitted because the amount of losses is insignificant.

The recoverable amount of the intangible assets used as the basis for calculation was measured at value in use. The value in use was estimated based on future cash flows in the business plan over the next five years reflecting the past results. When the estimated value in use is negative, the recoverable amount is assessed to be zero.

12. Investments accounted for using the equity method

Investments in associates were accounted for using the equity method. There were no individually significant associates.

The carrying amount of the Group's interest in associates which were not individually significant is as follows:

(millions of yen)

	Year ended March 31, 2022 (as of March 31, 2022)	Year ended March 31, 2023 (as of March 31, 2023)
Carrying amount of investments accounted for using the equity method	12,410	9,087

During the fiscal year ended March 31, 2023, the Company sold its investment in Panus Poultry Group Co., Ltd. in the Overseas Business Division, a chicken production and processing company in Thailand accounted for using the equity method. While impairment losses were recorded in a prior period on the investments accounted for using the equity method, there was an indication that the impairment losses would be reversed because the economic outcome of the sale was expected to exceed the carrying amount. Therefore, the Company estimated the recoverable amount of the investments and the recoverable amount exceeded the carrying amount. A gain on reversal of impairment losses of ¥1,919 million was recorded in "Other Income" in the consolidated statement of income. The recoverable amount is measured at the fair value based on the sale price less costs of disposal, which is categorizes as Level 3 in the fair value hierarchy.

The Group's interest in profit, other comprehensive income and comprehensive income of associates which were not individually significant is as follows:

(millions of yen)

	Year ended March 31, 2022 (April 1, 2021 through March 31, 2022)	Year ended March 31, 2023 (April 1, 2022 through March 31, 2023)
Profit	9,024	2,773
Other comprehensive income	991	660
Comprehensive income	10,015	3,433

13. Income taxes

(1) Deferred tax assets and deferred tax liabilities

The breakdown of deferred tax assets and deferred tax liabilities by major cause and changes thereof are as follows:

For the year ended March 31, 2022 (April 1, 2021 through March 31, 2022)

(millions of yen)

	Balance at beginning of the year (April 1, 2021)	Amount recognized in profit or loss	Amount recognized in other comprehensive income	Changes due to changes in scope of consolidation	Balance at end of the year (March 31, 2022)
Deferred tax assets:					
Inventories	1,107	(106)	-	(18)	983
Accrued enterprise taxes	804	61	-	(43)	822
Accrued bonuses	3,303	299	-	(172)	3,430
Property, plant and equipment and intangible assets	14,308	898	-	(312)	14,894
Retirement benefit liabilities	5,939	283	(815)	(532)	4,875
Unused tax losses and unused tax credits	246	665	-	-	911
Other temporary differences	4,201	315	-	(188)	4,328
Total	29,908	2,415	(815)	(1,265)	30,243
Deferred tax liabilities:					
Inventories	(525)	(1,035)	-	-	(1,560)
Property, plant and equipment and intangible assets	(81)	22	-	-	(59)
Financial assets	(3,789)	464	143	(202)	(3,384)
Investments in subsidiaries	(38)	32	-	-	(6)
Total	(4,433)	(517)	143	(202)	(5,009)
Net deferred tax assets (liabilities)	25,475	1,898	(672)	(1,467)	25,234

(Note) The difference between deferred income tax charges and the amount recognized in profit or loss is exchange differences on translation of foreign operations.

For the year ended March 31, 2023 (April 1, 2022 through March 31, 2023)

(millions of yen)

	Balance at beginning of the year (April 1, 2022)	Amount recognized in profit or loss	Amount recognized in other comprehensive income	Transfer to assets held for sale	Balance at end of the year (March 31, 2023)
Deferred tax assets:					
Inventories	983	226	-	-	1,209
Accrued enterprise taxes	822	(462)	-	-	360
Accrued bonuses	3,430	(267)	-	-	3,163
Property, plant and equipment and intangible assets	14,894	(881)	-	(408)	13,605
Retirement benefit liabilities	4,875	(611)	(426)	-	3,838
Unused tax losses and unused tax credits	911	517	-	-	1,428
Investments in subsidiaries	-	4,135	(279)	-	3,856
Other temporary differences	4,328	1,150	-	-	5,478
Total	30,243	3,807	(705)	(408)	32,937
Deferred tax liabilities:					
Inventories	(1,560)	794	-	-	(766)
Property, plant and equipment and intangible assets	(59)	43	-	-	(16)
Financial assets	(3,384)	10	1,435	-	(1,939)
Investments in subsidiaries	(6)	(17)	-	-	(23)
Total	(5,009)	830	1,435	-	(2,744)
Net deferred tax assets (liabilities)	25,234	4,637	730	(408)	30,193

(Note) The difference between deferred income tax charges and the amount recognized in profit or loss is exchange differences on translation of foreign operations.

Unused tax losses, unused tax credits and deductible temporary differences (other than those related to investments) for which deferred tax assets were not recognized are as follows:

(millions of yen)

	Year ended March 31, 2022 (as of March 31, 2022)	Year ended March 31, 2023 (as of March 31, 2023)
Unused tax losses and unused tax credits	19,448	19,826
Deductible temporary differences	10,719	6,167

The amount of deductible temporary differences related to investments in the Group's subsidiaries for which deferred tax assets were not recognized was ¥24,579 million and ¥27,629 million as of March 31, 2022 and 2023, respectively.

The amount and expiration of unused tax losses and unused tax credits for which deferred tax assets were not recognized are as follows:

(millions of yen)

	Year ended March 31, 2022 (as of March 31, 2022)	Year ended March 31, 2023 (as of March 31, 2023)
1 year	1,098	1,494
2 years	2,913	1,321
3 years	3,140	1,547
4 years	1,684	2,432
5 years	1,509	2,628
Over 5 years	9,104	10,404
Total	19,448	19,826

The amount of future taxable temporary differences related to investments in the Group's subsidiaries for which deferred tax liabilities were not recognized was ¥70,817 million and ¥80,348 million as of March 31, 2022 and 2023, respectively. This is because the Group is able to control the timing of reversing the temporary differences, and it is probable that temporary differences will not reverse in the foreseeable future.

(2) Income tax expense

Income tax expense consisted of the following:

	(millions of yen)	
	Year ended March 31, 2022 (April 1, 2021 through March 31, 2022)	Year ended March 31, 2023 (April 1, 2022 through March 31, 2023)
Current tax expense	14,885	6,431
Deferred tax expense	(1,930)	(1,661)
Total	12,955	4,770

Current tax expense includes the amount of the benefit arising from previously unrecognized tax losses, tax credits, or temporary differences of a prior period. Current tax expense decreased by ¥1,046 million due to these factors in the fiscal year ended March 31, 2022. The amount of such current tax expense for the fiscal year ended March 31, 2023 is immaterial.

Deferred tax expense includes the amount of benefit arising from previously unrecognized tax losses, tax credits, or temporary differences of a prior period. Deferred tax expense decreased by ¥1,298 million due to these factors in the fiscal year ended March 31, 2022. The amount of such deferred tax expense for the fiscal year ended March 31, 2023 is immaterial.

Deferred tax expense includes the amount of expenses arising from the write-down and the reversal of the previous write-down of deferred tax assets. Deferred tax expense increased by ¥191 million due to these factors in the fiscal year ended March 31, 2023. The amount of such deferred tax expense for the fiscal year ended March 31, 2022 is immaterial.

The Group is subject to income taxes, inhabitants taxes, and enterprise taxes. The effective statutory tax rate for income tax expense calculated based on these taxes was approximately 31.0% for the fiscal years ended March 31, 2022 and 2023. Foreign subsidiaries are subject to the tax rates of the countries in which they operate.

Factors that caused differences between the effective statutory tax rate and the average effective tax rate are as follows:

	(%)	
	Year ended March 31, 2022 (April 1, 2021 through March 31, 2022)	Year ended March 31, 2023 (April 1, 2022 through March 31, 2023)
Effective statutory tax rate	31.0	31.0
(Adjustments)		
Difference in tax rates of foreign subsidiaries	(1.6)	(2.4)
Change in recoverability of deferred tax assets	(3.0)	2.8
Permanently non-deductible expenses	(1.1)	(2.1)
Tax credit	(0.5)	(2.2)
Sale of equity method investments	-	(10.9)
Hyperinflation adjustment	-	3.1
Other	0.2	2.2
Average effective tax rate	25.0	21.5

14. Interest-bearing liabilities

Interest-bearing liabilities consisted of the following:

(millions of yen)

Category	Year ended March 31, 2022 (as of March 31, 2022)	Year ended March 31, 2023 (as of March 31, 2023)
Without collateral:		
Loans mainly from banks and insurance companies		
Maturing through 2032		
Interest rates: 0.12% to 4.27% (Year ended March 31, 2022)	100,665	
Interest rates: 0.04% to 6.73% (Year ended March 31, 2023)		126,581
Bonds with 0.934% coupon due September 2022	9,998	-
Bonds with 0.15% coupon due February 2024	9,982	10,000
Bonds with 0.25% coupon due February 2026	9,974	9,981
Bonds with 0.37% coupon due October 2027	-	19,891
Bonds with 0.36% coupon due February 2029	9,964	9,967
Bonds with 0.30% coupon due February 2031	9,950	9,953
Bonds with 0.60% coupon due August 2039	14,920	14,921
Lease liabilities:		
Maturing through 2047		
Interest rates: 0.0% to 25.31% (Year ended March 31, 2022)	45,954	
Maturing through 2047		
Interest rates: 0.0% to 26.95% (Year ended March 31, 2023)		40,761
Total	211,407	242,055
Current	90,056	102,199
Non-current	121,351	139,856

15. Leases

The Group leases assets including land, buildings, machinery and equipment as a lessee. Certain lease contracts have renewal or termination options, which are exercised as necessary. There are no important incidental matters such as restrictions or covenants imposed by lease contracts.

(1) Gains and losses related to leases are as follows:

	(millions of yen)	
	Year ended March 31, 2022 (April 1, 2021 through March 31, 2022)	Year ended March 31, 2023 (April 1, 2022 through March 31, 2023)
Depreciation charges for the right-of-use assets		
Land	422	416
Buildings	8,089	9,246
Machinery and equipment	3,435	3,278
Other	8	12
Total	11,954	12,952
Interest expense on lease liabilities	225	258
Lease expense applying the recognition exemption for short-term leases	1,543	1,583
Lease expense applying the recognition exemption for low-value assets	1,312	1,144
Variable lease payments not included in the measurement of lease liabilities	87	90

Depreciation charges for the right-of-use assets is included in “Cost of Goods Sold” and “Selling, General and Administrative Expenses” in the consolidated statement of income.

(2) The carrying amount of right-of-use assets is as follows:

	(millions of yen)	
	Year ended March 31, 2022 (as of March 31, 2022)	Year ended March 31, 2023 (as of March 31, 2023)
Land	2,238	1,945
Buildings	32,779	29,527
Machinery and equipment	11,044	9,245
Other	29	181
Total	46,090	40,898

The increase in right-of-use assets is described in “Note 28. Cash flow information (1) Significant non-cash transactions.”

The maturity analysis of lease liabilities is provided in “Note 29. Financial instruments (2) Financial risk management 3) Liquidity risk.”

(3) Total cash outflow for leases is as follows:

	(millions of yen)	
	Year ended March 31, 2022 (April 1, 2021 through March 31, 2022)	Year ended March 31, 2023 (April 1, 2022 through March 31, 2023)
Total cash outflow for leases	16,404	16,024

16. Trade and other payables

Trade and other payables consisted of the following:

(millions of yen)

	Year ended March 31, 2022 (as of March 31, 2022)	Year ended March 31, 2023 (as of March 31, 2023)
Trade notes payable	10,964	8,364
Accounts payable—trade	62,877	66,973
Accounts payable—other	22,934	23,124
Refund liabilities	6,944	7,566
Total	103,719	106,027

(Note) Trade and other payables are classified into financial liabilities measured at amortized cost.

17. Other current liabilities

Other current liabilities consisted of the following:

(millions of yen)

	Year ended March 31, 2022 (as of March 31, 2022)	Year ended March 31, 2023 (as of March 31, 2023)
Accrued expenses	26,901	26,947
Accrued consumption taxes	7,703	6,398
Contract liabilities	2,995	6,372
Other	1,995	1,633
Total	39,594	41,350

18. Post-employment benefit plans

(1) Overview of post-employment benefit plans

The Company has a retirement lump-sum severance plan and a defined benefit corporate pension plan based on a formula for determining benefits including a “point-based benefits system” under which benefits are calculated based on accumulated points allocated to employees each year according to their job classification, performance and years of service. Market-related interest is added to the benefit of the defined benefit corporate pension plan. The defined benefit corporate pension plan provides annuity payments for the periods of 10 to 20 years commencing with mandatory retirement. The Company also has a defined contribution pension plan.

The Company has a contract-type corporate pension plan based on pension rules. The Company has established rules on the defined benefit corporate pension plan stipulating the details of the pension plan, such as eligibility requirements, contents and method for determining benefit payments and burden of contributions, by agreement with its employees and has had these rules approved by the Minister of Health, Labour and Welfare. The Company maintains the plans by signing contracts such as with trust banks and insurance companies for the payment of contributions and the management of accumulated funds. The trust banks administer and manage the plan assets while they perform actuarial calculations and payments of annual and lump-sum benefits.

The Company is responsible for executing its duties faithfully for the participants in compliance with laws and regulations and any orders issued by the Minister of Health, Labour and Welfare. Furthermore, the Company is prohibited from entering into any contracts or giving any directions on the administration and management of the pension reserves for the purpose of looking after its own interests or the interests of third parties other than the participants.

Plan assets are legally separate from the Company. Asset management trustees are responsible for plan assets and have a duty of loyalty to pension plan participants, such management responsibilities as a dispersed investment obligation, and a duty to prevent conflicts of interest.

Plan assets are invested on the basis of soundness. However, financial instruments have inherent investment risks. Defined benefit obligations are measured based on various pension actuarial assumptions, such as discount rates. Accordingly, there exists a risk that these assumptions may change.

Certain subsidiaries have defined benefit corporate pension plans, retirement lump-sum severance plans and defined contribution pension plans. Assumptions used for those plans are generally the same as those used for the Company’s plans.

(2) Defined benefit plans

The amounts related to the defined benefit plans on the consolidated statement of financial position are as follows:

(millions of yen)

	Year ended March 31, 2022 (as of March 31, 2022)	Year ended March 31, 2023 (as of March 31, 2023)
Present value of defined benefit obligations	52,489	49,881
Fair value of plan assets	51,731	52,282
Funding position	758	(2,401)
Effect of the asset ceiling	2,586	3,907
Net defined benefit liabilities (assets)	3,344	1,506
Amounts on the consolidated statement of financial position		
Retirement benefit liabilities	12,951	12,394
Other non-current assets	9,607	10,888

1) Changes in the present value of defined benefit obligations

Changes in the present value of defined benefit obligations are as follows:

(millions of yen)

	Year ended March 31, 2022 (April 1, 2021 through March 31, 2022)	Year ended March 31, 2023 (April 1, 2022 through March 31, 2023)
Balance of defined benefit obligations at beginning of the year	54,510	52,489
Service cost	2,910	3,096
Interest cost	272	324
Remeasurement	(415)	(2,163)
Actuarial losses (gains) arising from changes in demographic assumptions	43	91
Actuarial losses (gains) arising from changes in financial assumptions	(458)	(2,254)
Past service cost and settlement	-	(79)
Benefits paid from the plan	(3,096)	(3,786)
Changes due to changes in scope of consolidation	(1,692)	-
Balance of defined benefit obligations at end of the year	52,489	49,881

The weighted-average duration of defined benefit obligations as of March 31, 2022 and 2023 was 10.8 years and 10.2 years, respectively.

2) Changes in the fair value of plan assets

Changes in the fair value of plan assets are as follows:

(millions of yen)

	Year ended March 31, 2022 (April 1, 2021 through March 31, 2022)	Year ended March 31, 2023 (April 1, 2022 through March 31, 2023)
Fair value of plan assets at beginning of the year	48,274	51,731
Interest income (Note)	280	352
Remeasurement	3,607	689
Return on plan assets (excluding the amount included in net interest cost)	3,607	689
Employer contribution	887	884
Benefits paid from the plan	(1,317)	(1,374)
Fair value of plan assets at end of the year	51,731	52,282

(Note) Interest income is measured as the fair value of plan assets multiplied by the discount rate.

The Group plans to contribute ¥895 million to the defined benefit corporate pension plan during the fiscal year ending March 31, 2024.

3) Changes in the effect of the asset ceiling

Changes in the effect of the asset ceiling are as follows:

(millions of yen)

	Year ended March 31, 2022 (April 1, 2021 through March 31, 2022)	Year ended March 31, 2023 (April 1, 2022 through March 31, 2023)
Balance at beginning of the year	851	2,586
Changes in the effect of the asset ceiling	1,735	1,321
Balance at end of the year	2,586	3,907

(Note) When the defined benefit plan is overfunded, defined benefit assets (other non-current assets) recognized in the consolidated statement of financial position are limited to the present value of future economic benefits available in the form of reductions in future contributions to the defined benefit plan.

4) Components of plan assets

The Group's plan assets as of March 31, 2022 and 2023 consisted of the following:

Year ended March 31, 2022 (as of March 31, 2022)

(millions of yen)

	Assets with quoted market prices in an active market	Assets without quoted market prices in an active market
Equity instruments:		
Domestic stocks	12,657	-
Foreign stocks	5,525	-
Debt instruments:		
Domestic public and corporate bonds	5,591	-
Foreign public and corporate bonds	2,880	-
Life insurance company general accounts	-	10,455
Others	6,208	8,415
Total	32,861	18,870

Year ended March 31, 2023 (as of March 31, 2023)

(millions of yen)

	Assets with quoted market prices in an active market	Assets without quoted market prices in an active market
Equity instruments:		
Domestic stocks	12,562	-
Foreign stocks	6,545	-
Debt instruments:		
Domestic public and corporate bonds	5,820	-
Foreign public and corporate bonds	1,553	-
Life insurance company general accounts	-	9,992
Others	6,507	9,303
Total	32,987	19,295

The Group's fundamental policy for the investment of plan assets is to secure the necessary profit on a long-term basis to enable the Group to fund the payments for future pension benefits to eligible participants. Plan assets are allocated in accordance with the plan assets allocation policy, which is established for the purpose of achieving a stable rate of return on a medium- to long-term basis, by taking into account the expected rate of return on each plan asset, a standard deviation and a correlation coefficient. The variance between expected long-term return and actual return on invested plan assets is evaluated on an annual basis. The plan assets allocation policy is revised, when considered necessary, to achieve the expected long-term rate of return.

The Group's portfolio consists of four major components. Equity instruments consist primarily of stocks that are listed on the stock exchanges. The Group investigates the business condition of the investee companies and appropriately diversifies investments by industry type and other relevant factors. The debt instruments consist primarily of government bonds, public bonds and corporate bonds. The Group investigates the quality of the bonds, including credit rating, interest rate and repayment dates, and appropriately diversifies the investments. Mutual funds are invested using the strategy consistent with equity instruments and debt instruments described above. As for the life insurance company general accounts, life insurance companies guarantee certain interest rates and repayment of principal.

5) Actuarial assumptions

Assumptions (weighted-average) used to measure the defined benefit obligations of the plans above are as follows:

	Year ended March 31, 2022 (as of March 31, 2022)	Year ended March 31, 2023 (as of March 31, 2023)
Discount rate	0.7%	1.1%

The Company has adopted the “point-based benefits system.” Accordingly, rate of increase in future compensation levels was not used to determine retirement benefit expenses for the fiscal years ended March 31, 2022 and 2023.

Assumptions used for the plans of subsidiaries were generally the same as those used for the Company’s plans.

6) Sensitivity analysis for significant actuarial assumptions

The effects of a change in discount rate on defined benefit obligations as of March 31, 2022 and 2023 are shown below. The sensitivity analysis is based on the assumption that there are no changes in other assumptions, however, changes in other assumptions may affect the sensitivity analysis.

(millions of yen)

		Year ended March 31, 2022 (as of March 31, 2022)	Year ended March 31, 2023 (as of March 31, 2023)
Discount rate	0.5% increase	(2,539)	(2,290)
	0.5% decrease	2,738	2,464

The method and assumptions used in the sensitivity analysis as of March 31, 2023 are the same as those used as of March 31, 2022.

(3) Defined contribution pension plans

The Group recognized that the expenses related to the defined contribution plan are ¥10,416 million and ¥10,715 million for the fiscal years ended March 31, 2022 and 2023, respectively.

19. Common stock and other equity items

(1) Number of shares authorized and shares issued

Changes in number of shares authorized and shares issued are as follows:

(shares)

	Year ended March 31, 2022 (April 1, 2021 through March 31, 2022)	Year ended March 31, 2023 (April 1, 2022 through March 31, 2023)
Number of shares authorized		
Common stock	285,000,000	285,000,000
Number of shares issued		
Balance at beginning of the year	102,958,904	102,958,904
Increase during the year	-	-
Decrease during the year	-	-
Balance at end of the year	102,958,904	102,958,904

(Note) All shares issued by the Company are common stock with no par value that has no limitation set on the rights of holders. The shares issued have been fully paid in.

(2) Treasury stock

Changes in number of shares of treasury stock are as follows:

(shares)

	Year ended March 31, 2022 (April 1, 2021 through March 31, 2022)	Year ended March 31, 2023 (April 1, 2022 through March 31, 2023)
Balance at beginning of the year	784,890	633,488
Increase during the year (Note 1)	402	759
Decrease during the year (Notes 2 and 3)	(151,804)	(179,788)
Balance at end of the year (Notes 4 and 5)	633,488	454,459

(Notes) 1. Increase is due to purchase of shares less than one unit.

2. Decrease during the fiscal year ended March 31, 2022 is due to delivery and payment to the Directors, etc. by the Board Incentive Plan Trust (the “BIP Trust”), sale to the Shareholding Association by the NH Foods Group Employee Shareholding Association Trust (the “Shareholding Trust”), and exercise of stock options.

3. Decrease during the fiscal year ended March 31, 2023 is due to delivery and payment to the Directors, etc. by the BIP Trust, sale to the Shareholding Association by the Shareholding Trust, exercise of stock options, and sale of shares in response to requests for additional purchase of shares less than one unit.

4. The balance as of March 31, 2022 includes 137,759 shares of the Company held by the BIP Trust and 466,200 shares of the Company held by the Shareholding Trust.

5. The balance as of March 31, 2023 includes 131,403 shares of the Company held by the BIP Trust and 313,400 shares of the Company held by the Shareholding Trust.

(3) Common stock and capital surplus

Under the Companies Act of Japan (the “Companies Act”), at least 50% of the payment or delivery upon issuance of shares shall be credited to common stock, and the remainder shall be credited to legal capital surplus included under capital surplus. The Companies Act permits, upon approval at the General Meeting of Shareholders, the transfer of legal capital surplus to common stock.

(4) Retained earnings

The Companies Act provides that 10% of the dividend of retained earnings paid shall be appropriated as legal capital surplus or as legal retained earnings until their aggregate amount equals 25% of common stock. The legal retained earnings may be appropriated for deficit disposition and also may be reversed upon approval at the General Meeting of Shareholders.

(5) Accumulated other comprehensive income

1) Remeasurement of defined benefit plans

A reassessment of defined benefit obligations that identifies the difference between actuarial assumptions at the beginning of the fiscal year and actual results, a return on plan assets at fair value (excluding the amount included in net interest cost) and other components.

2) Financial assets measured at fair value through other comprehensive income

Differences between the fair value and the acquisition price of financial assets measured at fair value through other comprehensive income, accumulated until derecognition.

3) Exchange differences on translation of foreign operations

Exchange differences attributable to the consolidation of the financial results of foreign operations whose financial statements are prepared in foreign currencies.

4) Share of other comprehensive income of investments accounted for using the equity method

The Company's share of exchange differences on translation of foreign operations accounted for using the equity method.

(6) Accumulated other comprehensive income of disposal groups classified as held for sale

In accordance with IFRS 5, any cumulative income or expense recognized in other comprehensive income relating to an asset or disposal group classified as held for sale are presented separately.

20. Dividends

Dividends paid for the fiscal years ended March 31, 2022 and 2023 are as follows:

Year ended March 31, 2022 (April 1, 2021 through March 31, 2022)

Resolution	Class of shares	Total amount of dividends (millions of yen)	Amount of dividend per share (yen)	Record date	Effective date
Meeting of the Board of Directors held on May 10, 2021	Common stock	9,675	94.00	March 31, 2021	June 2, 2021

(Note) The total amount of dividends includes dividends on the Company's shares held by the BIP Trust of ¥13 million and dividends on the Company's shares held by the Shareholding Trust of ¥57 million.

Year ended March 31, 2023 (April 1, 2022 through March 31, 2023)

Resolution	Class of shares	Total amount of dividends (millions of yen)	Amount of dividend per share (yen)	Record date	Effective date
Meeting of the Board of Directors held on May 10, 2022	Common stock	10,499	102.00	March 31, 2022	June 1, 2022

(Note) The total amount of dividends includes dividends on the Company's shares held by the BIP Trust of ¥14 million and dividends on the Company's shares held by the Shareholding Trust of ¥48 million.

Dividends for which the effective date is in the next fiscal year are as follows:

Year ended March 31, 2022 (April 1, 2021 through March 31, 2022)

Resolution	Class of shares	Source of dividends	Total amount of dividends (millions of yen)	Amount of dividend per share (yen)	Record date	Effective date
Meeting of the Board of Directors held on May 10, 2022	Common stock	Retained earnings	10,499	102.00	March 31, 2022	June 1, 2022

(Note) The total amount of dividends includes dividends on the Company's shares held by the BIP Trust of ¥14 million and dividends on the Company's shares held by the Shareholding Trust of ¥48 million.

Year ended March 31, 2023 (April 1, 2022 through March 31, 2023)

Resolution	Class of shares	Source of dividends	Total amount of dividends (millions of yen)	Amount of dividend per share (yen)	Record date	Effective date
Meeting of the Board of Directors held on May 10, 2023	Common stock	Retained earnings	11,324	110.00	March 31, 2023	June 2, 2023

(Note) The total amount of dividends includes dividends on the Company's shares held by the BIP Trust of ¥14 million and dividends on the Company's shares held by the Shareholding Trust of ¥34 million.

21. Share-based payment

(1) Stock Option Plan

1) Terms and conditions of stock options

The Company has previously adopted a Stock Option Plan. On May 9, 2008, however, the Board of Directors resolved to abolish the Stock Option Plan except for those stock options granted on or before March 31, 2008.

Title of grantees: Director, Executive Officer, Audit & Supervisory Board Member and Executive Officer of the Company

Settlement: Equity-settled

Exercise period: 20 years after grant date

Vesting conditions: Pursuant to the "Stock Acquisition Rights Allotment Agreement"

There were no existing stock options of the Company as of March 31, 2023.

2) Changes in stock options granted

Changes in stock options granted are as follows:

	Year ended March 31, 2022 (April 1, 2021 through March 31, 2022)		Year ended March 31, 2023 (April 1, 2022 through March 31, 2023)	
	Stock options (shares)	Average exercise price per share (yen)	Stock options (shares)	Average exercise price per share (yen)
Outstanding at beginning of the year	27,000	1	20,500	1
Exercised during the year	(6,500)	1	(20,500)	1
Outstanding at end of the year	20,500	1	-	-
Exercisable at end of the year	4,500	1	-	-

(Notes) 1. The number of stock options is translated into the number of shares.

2. The weighted-average share price at exercise of stock options during the year was ¥4,272 for the fiscal year ended March 31, 2022 and ¥3,736 for the fiscal year ended March 31, 2023.

3. The weighted-average remaining life of the outstanding stock options was 2.9 years for the fiscal year ended March 31, 2022. There were no outstanding stock options as of March 31, 2023.

(2) Performance-Based Stock Compensation Plan

1) Details of the Performance-Based Stock Compensation Plan

The Company has introduced the Performance-Based Stock Compensation Plan for Directors (excluding Outside Directors and non-residents of Japan; hereinafter the same) and Executive Officers (excluding non-residents of Japan; hereinafter together with Directors, the “Directors, etc.”) to further clarify the linkage between the compensations of the Directors, etc. and the business performance and shareholder value of the Company, and to provide incentives to encourage enhancement of the corporate value over the medium- to long-term in order to realize the Company’s corporate philosophy. The Performance-Based Stock Compensation Plan is accounted for as an equity-settled share-based payment transaction.

The Performance-Based Stock Compensation Plan has adopted a scheme called the Board Incentive Plan (BIP) Trust, which grants a certain number of points (1 point = 1 share) to the Directors, etc. depending on their position, achievement level of the performance goal, etc. for the fiscal years corresponding to the period of the Company’s medium-term management plan (the “Target Period”), on the condition they satisfy the prescribed beneficiary requirements, such as being the Directors, etc. during the Target Period. Thereafter, the Directors, etc. who satisfy each beneficiary requirement are entitled to receive delivery and payment of the shares of the Company and the amount of money equivalent to the proceeds from the disposal of the shares of the Company corresponding to the number of points granted by completing the prescribed procedures for determining beneficiaries.

2) Number of points granted during the year and weighted average fair value of points

The fair value of the Company’s shares as of the grant date of points is measured based on observable market prices, and the expected dividends are incorporated into the measurement of the fair value. The number of points granted during the year and the weighted average fair value of points are as follows:

	Year ended March 31, 2022 (April 1, 2021 through March 31, 2022)	Year ended March 31, 2023 (April 1, 2022 through March 31, 2023)
Number of points granted during the year (points)	23,944	4,868
Weighted average fair value (yen)	4,292	4,293

(3) Trust-type Employee Shareholding Incentive Plan

The Company has introduced the Trust-type Employee Shareholding Incentive Plan (the “Plan”) as an incentive plan for the Group’s employees to enhance the corporate value over the medium- to long-term, and accounts for the Plan as a cash-settled share-based payment transaction.

Under the Plan, the Company has established the NH Foods Group Employee Shareholding Association Trust (the “Shareholding Trust”) at a trust bank, and the Shareholding Trust has acquired the Company’s shares in advance for an amount expected to be acquired by the Shareholding Association over a certain period of time after the establishment. Thereafter, the Shareholding Trust makes sales of the Company’s shares to the Shareholding Association on a continuous basis. Upon the conclusion of the trust, if there are any accumulated gains on sales of shares within the Shareholding Trust, such gains on sales of shares will be allocated as residual assets to employees who meet eligibility requirements as beneficiaries. Such allocation is accounted for as a cash-settled transaction, and the fair value of the liability is measured at the discounted present value of the estimated cash flows as of the trust expiration date, taking into account the terms and conditions of the trust agreement, at the end of each fiscal year.

The fair value of the liability for the Plan is estimated using the Monte Carlo method, and the main underlying figures are as follows. The carrying amount of the liability for the Plan as of March 31, 2023 was ¥50 million and ¥11 million.

	Year ended March 31, 2022 (April 1, 2021 through March 31, 2022)	Year ended March 31, 2023 (April 1, 2022 through March 31, 2023)
The Company’s stock price (yen)	4,150	3,835
Remaining shares (shares)	466,200	313,400
Expected volatility (%)	26.9	20.7
Expected remaining period (years)	3.6	2.6
Risk-free interest rate (%)	(0.0)	(0.1)

(4) Share-based payment expense

The amounts recognized as share-based payment expenses are as follows and are included in “Selling, General and Administrative Expenses” in the consolidated statement of income.

	Year ended March 31, 2022 (April 1, 2021 through March 31, 2022)	Year ended March 31, 2023 (April 1, 2022 through March 31, 2023)
Expenses for the Performance-Based Stock Compensation Plan	103	25
Expenses for the Trust-type Employee Shareholding Incentive Plan	12	(39)
Total	115	(14)

22. Net sales

(1) Disaggregation of revenue

The Group disaggregates revenue from each of the three reportable segments, the “Processed Foods Business Division,” the “Fresh Meats Business Division,” and the “Overseas Business Division,” into the categories of “Hams and sausages,” “Processed foods,” “Fresh meats,” “Dairy products,” and “Others,” depending on the type of goods and services.

The Company has classified the marine products business relating to The Marine Foods Corporation, its subsidiaries, etc. as discontinued operation from the fiscal year ended March 31, 2022.

In addition, the Company has classified the beef business relating to BPU as discontinued operations from the fiscal year ended March 31, 2023. Therefore, the corresponding figures for the fiscal year ended March 31, 2022 have been reclassified accordingly. However, the Processed Foods Business Division, one of the reportable segments, includes the marine products business that has been classified as discontinued operations. In addition, the Overseas Business Division, another reportable segment, includes the beef business that has been classified as discontinued operations.

Net sales by product type for the fiscal years ended March 31, 2022 and 2023 are as follows:

Year ended March 31, 2022 (April 1, 2021 through March 31, 2022)

(millions of yen)

	Processed Foods Business Division	Fresh Meats Business Division	Overseas Business Division	Others	Total	Eliminations, adjustments and others	Consolidated (before adjustment for discontinued operations)	Transfer to discontinued operations	Consolidated (after adjustment for discontinued operations)
Hams and sausages	127,646	881	2,620	-	131,147	-	131,147	-	131,147
Processed foods	199,367	17,594	17,269	72	234,302	132	234,434	(9,458)	224,976
Fresh meats	26,872	590,918	104,489	-	722,279	564	722,843	(20,683)	702,160
Dairy products	35,212	-	-	-	35,212	2	35,214	-	35,214
Others	80,856	12,138	18,421	10,559	121,974	830	122,804	(64,415)	58,389
Total	469,953	621,531	142,799	10,631	1,244,914	1,528	1,246,442	(94,556)	1,151,886

Year ended March 31, 2023 (April 1, 2022 through March 31, 2023)

(millions of yen)

	Processed Foods Business Division	Fresh Meats Business Division	Overseas Business Division	Others	Total	Eliminations, adjustments and others	Consolidated (before adjustment for discontinued operations)	Transfer to discontinued operations	Consolidated (after adjustment for discontinued operations)
Hams and sausages	125,910	497	3,748	7	130,162	(1)	130,161	-	130,161
Processed foods	187,285	19,664	24,024	129	231,102	4,064	235,166	-	235,166
Fresh meats	29,321	651,797	135,219	3	816,340	3,417	819,757	(27,785)	791,972
Dairy products	36,190	-	4	-	36,194	-	36,194	-	36,194
Others	11,691	13,374	23,454	13,679	62,198	6,519	68,717	(2,418)	66,299
Total	390,397	685,332	186,449	13,818	1,275,996	13,999	1,289,995	(30,203)	1,259,792

(Note) The amounts of net sales of The Marine Foods Corporation, its subsidiaries, etc. included in the Processed Foods Business Division and BPU included in the Overseas Business Division have been reclassified to “Transfer to discontinued operations.”

(Change in presentation)

The Company transferred all of its shares of its consolidated subsidiary, The Marine Foods Corporation, to Sojitz Corporation during the fiscal year ended March 31, 2022. As a result, sales related to “Marine products” have become less significant to the Group and thus have been included in “Others” from the fiscal year ended March 31, 2023. Net sales by product type for the fiscal year ended March 31, 2022 have been reclassified based on the classification of such data for the fiscal year ended March 31, 2023.

(2) Balances from contracts with customers

Balances from contracts with customers are as follows:

(millions of yen)

	Year ended March 31, 2022 (as of March 31, 2022)	Year ended March 31, 2023 (as of March 31, 2023)
Contract liabilities	2,997	6,418
Refund liabilities	6,944	7,566

Of the contract liability balances above, the amount of those recognized as revenue for the fiscal years ended March 31, 2022 and 2023 is as follows:

(millions of yen)

	Year ended March 31, 2022 (April 1, 2021 through March 31, 2022)	Year ended March 31, 2023 (April 1, 2022 through March 31, 2023)
Amount included in the opening balance of contract liabilities	2,073	2,755

The Group receives payments from customers according to the contractual billing schedule.

Contract liabilities represent payments received prior to the performance under the contract. Accordingly, their balances vary depending on the Group's status of performance obligation in the contract.

The amount of income recognized from performance obligations satisfied in the fiscal years ended March 31, 2022 and 2023 is not material.

23. Selling, general and administrative expenses

Selling, general and administrative expenses consisted of the following:

(millions of yen)

	Year ended March 31, 2022 (April 1, 2021 through March 31, 2022)	Year ended March 31, 2023 (April 1, 2022 through March 31, 2023)
Labor costs	68,356	69,681
Distribution costs	41,376	42,775
Advertising expenses	4,539	5,096
Depreciation and amortization	14,235	15,452
Others	28,046	33,076
Total	156,552	166,080

(Change in presentation)

The Company revised the classification of expenses from the fiscal year ended March 31, 2023. Cargo handling and other expenses related to outsourcing, which were included in "Others" have been included in "Distribution costs." To reflect this change in presentation, ¥37,869 million in "Distribution costs" and ¥32,485 million in "Other" in the fiscal year ended March 31, 2022 have been reclassified.

24. Other income and other expenses

(1) Other income

Other income consisted of the following:

(millions of yen)

	Year ended March 31, 2022 (April 1, 2021 through March 31, 2022)	Year ended March 31, 2023 (April 1, 2022 through March 31, 2023)
Gain on sale of fixed assets	241	719
Foreign exchange gains	8,965	11,573
Subsidy income (Note)	435	3,237
Gain on reversal of impairment losses	-	2,202
Others	979	1,367
Total	10,620	19,098

(Note) The main source of subsidy income in the fiscal year ended March 31, 2023 was subsidies provided by the national and local governments for measures to combat rising feed prices.

(2) Other expenses

Other expenses consisted of the following:

(millions of yen)

	Year ended March 31, 2022 (April 1, 2021 through March 31, 2022)	Year ended March 31, 2023 (April 1, 2022 through March 31, 2023)
Impairment losses	2,339	1,594
Loss on sale and retirement of fixed assets	1,558	2,807
Foreign exchange losses	4,150	6,008
Others	465	1,782
Total	8,512	12,191

25. Financial income and financial costs

(1) Financial income

Financial income consisted of the following:

(millions of yen)

	Year ended March 31, 2022 (April 1, 2021 through March 31, 2022)	Year ended March 31, 2023 (April 1, 2022 through March 31, 2023)
Dividend income		
Financial assets measured at fair value through other comprehensive income	1,571	540
Interest income		
Financial assets measured at amortized cost	435	1,727
Gain on valuation of derivatives		
Financial assets and financial liabilities measured at fair value through profit or loss	35	17
Foreign exchange gains	155	791
Hyperinflation adjustment – gain on net monetary position (Note)	-	280
Others	4	5
Total	2,200	3,360

(Note) From the fiscal year ended March 31, 2023, the Group has consolidated the financial statements of its subsidiary in the Republic of Turkey after making adjustments for hyperinflationary accounting in accordance with IAS 29 “Financial Reporting in Hyperinflationary Economies.” The Group restated the financial statements of the subsidiary in terms of the measuring unit at the end of the reporting period and included them in the consolidated statements so as to reflect the effect of inflation in the Republic of Turkey. The effect of inflation on net monetary position is included in “Financial Income.”

(2) Financial costs

Financial costs consisted of the following:

(millions of yen)

	Year ended March 31, 2022 (April 1, 2021 through March 31, 2022)	Year ended March 31, 2023 (April 1, 2022 through March 31, 2023)
Interest expenses		
Financial liabilities measured at amortized cost	1,087	1,690
Commission expenses		
Financial liabilities measured at amortized cost	98	96
Revaluation losses due to discontinuation of application of the equity method (Note 1)	1,247	-
Loss on change in ownership interest (Note 2)	1,485	-
Others	18	44
Total	3,935	1,830

(Notes) 1. During the fiscal year ended March 31, 2022, the Group lost significant influence over Lay Hong Berhad, an associate, following its issuance of new shares through a third-party allotment. Therefore, the application of the equity method was discontinued and the fair value measurement was performed, and as a result, the loss was incurred.

2. The loss was incurred due to the change in the Company’s interest in Nebraska Beef Ltd., an associate, as a result of the exercise of warrants against Nebraska Beef Ltd. during the fiscal year ended March 31, 2022.

26. Other comprehensive income

Changes in each item of other comprehensive income (loss) during the year are as follows:

(millions of yen)

	Year ended March 31, 2022 (April 1, 2021 through March 31, 2022)	Year ended March 31, 2023 (April 1, 2022 through March 31, 2023)
Items that will not be reclassified to profit or loss		
Remeasurement of defined benefit plans		
Amount recognized during the year	2,413	1,482
Before tax effects	2,413	1,482
Tax effects	(815)	(426)
After tax effects	1,598	1,056
Financial assets measured at fair value through other comprehensive income		
Amount recognized during the year	(179)	(3,372)
Before tax effects	(179)	(3,372)
Tax effects	143	1,435
After tax effects	(36)	(1,937)
Items that may be reclassified to profit or loss		
Exchange differences on translation of foreign operations		
Amount recognized during the year	4,141	7,557
Reclassification adjustments	(169)	20
Before tax effects	3,972	7,577
Tax effects	-	(279)
After tax effects	3,972	7,298
Share of other comprehensive income of investments accounted for using the equity method		
Amount recognized during the year	1,077	806
Reclassification adjustments	(86)	(146)
Before tax effects	991	660
Tax effects	-	-
After tax effects	991	660
Total	6,525	7,077

27. Earnings per share

(1) Earnings per share

Basic earnings per share are calculated by dividing profit attributable to ordinary shareholders of parent by the weighted-average number of shares of common stock outstanding during the fiscal years ended March 31, 2022 and 2023. The weighted-average number of shares of common stock outstanding does not include shares of common stock repurchased as shares of treasury stock. The Company's shares held by the BIP Trust and the Shareholding Trust are accounted for as treasury stock and accordingly are not also included in the weighted-average number of shares of common stock outstanding.

Diluted earnings per share are calculated by adjusting the profit and weighted-average number of shares of common stock outstanding on the assumption that all dilutive potential shares of common stock have been converted to shares of common stock. The Group holds stock options, which are dilutive potential shares of common stock. For stock options, the expected number of shares acquired at fair value (determined at the average share price of the Company's stock during the year) is calculated based on the exercise price of outstanding stock options granted, which is added to the weighted-average number of shares of common stock outstanding.

(2) Amount of basic earnings per share and basis of calculation

	Year ended March 31, 2022 (April 1, 2021 through March 31, 2022)	Year ended March 31, 2023 (April 1, 2022 through March 31, 2023)
Basic earnings per share (yen)	469.92	162.44
Continuing operations	381.91	176.27
Discontinued operations	88.01	(13.83)
Basis for calculation:		
Profit attributable to owners of the parent (millions of yen)	48,049	16,637
Amount not attributable to ordinary shareholders of the parent (millions of yen)	-	-
Profit used in the calculation of basic earnings per share (millions of yen)	48,049	16,637
Continuing operations	39,051	18,053
Discontinued operations	8,998	(1,416)
Weighted-average number of shares of common stock (thousands of shares)	102,251	102,419

(3) Amount of diluted earnings per share and basis of calculation

	Year ended March 31, 2022 (April 1, 2021 through March 31, 2022)	Year ended March 31, 2023 (April 1, 2022 through March 31, 2023)
Diluted earnings per share (yen)	469.81	162.42
Continuing operations	381.82	176.25
Discontinued operations	87.99	(13.83)
Basis for calculation:		
Profit used in the calculation of diluted earnings per share		
Profit used in the calculation of basic earnings per share (millions of yen)	48,049	16,637
Adjustment to profit (millions of yen)	-	-
Profit used in the calculation of diluted earnings per share (millions of yen)	48,049	16,637
Continuing operations	39,051	18,053
Discontinued operations	8,998	(1,416)
Weighted-average number of shares of common stock used in the calculation of diluted earnings per share		
Weighted-average number of shares of common stock used in the calculation of basic earnings per share (thousands of shares)	102,251	102,419
Dilutive effect of stock options granted (thousands of shares)	25	10
Weighted-average number of shares of common stock used in the calculation of diluted earnings per share (thousands of shares)	102,276	102,429

28. Cash flow information

(1) Significant non-cash transactions

Non-cash transactions (investing and financing transactions that do not require the use of cash or cash equivalents) are as follows:

(millions of yen)

	Year ended March 31, 2022 (April 1, 2021 through March 31, 2022)	Year ended March 31, 2023 (April 1, 2022 through March 31, 2023)
Acquisition of right-of-use assets under lease transactions	22,858	8,393

(2) Changes in liabilities arising from financing activities

Changes in liabilities arising from financing activities are as follows:

Year ended March 31, 2022 (April 1, 2021 through March 31, 2022)

(millions of yen)

	Balance at beginning of the year (April 1, 2021)	Changes associated with cash flows	Changes not associated with cash flows			Balance at end of the year (March 31, 2022)
			Exchange differences on translation	Changes arising from obtaining or losing control of subsidiaries or other businesses	Others	
Short-term bank loans (Note)	46,655	17,065	712	(398)	(4,699)	59,335
Long-term bank loans	43,901	(6,957)	(102)	(210)	4,699	41,331
Bonds	64,751	-	-	-	36	64,787
Lease liabilities	38,443	(13,071)	12	(1,639)	22,209	45,954
Total	193,750	(2,963)	622	(2,247)	22,245	211,407

Year ended March 31, 2023 (April 1, 2022 through March 31, 2023)

(millions of yen)

	Balance at beginning of the year (April 1, 2022)	Changes associated with cash flows	Changes not associated with cash flows			Balance at end of the year (March 31, 2023)
			Exchange differences on translation	Transfer to liabilities directly associated with assets held for sale	Others	
Short-term bank loans (Note)	59,335	36,504	(9,040)	(5,720)	(3,418)	77,661
Long-term bank loans	41,331	4,795	42	(665)	3,418	48,921
Bonds	64,787	9,880	-	-	45	74,712
Lease liabilities	45,954	(12,911)	(13)	(5)	7,736	40,761
Total	211,407	38,268	(9,011)	(6,390)	7,781	242,055

(Note) "Increase (decrease) in short-term bank loans" in the consolidated statement of cash flows includes only short-term bank loans with a maturity of three months or less. Therefore, the balance of short-term bank loans with a maturity of more than three months is reclassified from long-term bank loans in "Others" under "Changes not associated with cash flows."

(3) Proceeds from sales of business

The major breakdown of assets and liabilities at the time of losing control of the companies that ceased to be subsidiaries, etc. due to the sales of shares, and the relationship between consideration received and cashflows from the sales are as follows.

(millions of yen)

	Year ended March 31, 2022 (April 1, 2021 through March 31, 2022)	Year ended March 31, 2023 (April 1, 2022 through March 31, 2023)
Breakdown of assets at the time of losing control		
Current assets	25,247	135
Non-current assets	10,105	3,595
Breakdown of liabilities at the time of losing control		
Current liabilities	26,749	16
Non-current liabilities	2,617	-

(millions of yen)

	Year ended March 31, 2022 (April 1, 2021 through March 31, 2022)	Year ended March 31, 2023 (April 1, 2022 through March 31, 2023)
Consideration received by cash	17,135	3,671
Cash and cash equivalents in assets at the time of losing control	507	92
Proceeds from sales of business	16,628	3,579

29. Financial instruments

(1) Capital management

Aiming for stable and sustainable growth of corporate value, the Group prioritizes the distribution of profit to shareholders as a key management issue. Therefore, the Group maintains an optimal capital structure that ensures capital efficiency improvement as well as financial soundness as its basic policy for capital management, ensuring a balance among cash and cash equivalents, interest-bearing liabilities, and capital. The Group is not subject to particular significant capital requirements (other than general rules such as the Companies Act of Japan).

The balances of cash and cash equivalents, interest-bearing liabilities, and capital (equity attributable to owners of the parent) as of March 31, 2022 and 2023 are as follows:

	(millions of yen)	
	Year ended March 31, 2022 (as of March 31, 2022)	Year ended March 31, 2023 (as of March 31, 2023)
Cash and cash equivalents	85,374	64,986
Interest-bearing liabilities	211,407	242,055
Capital (equity attributable to owners of the parent)	479,069	492,913

(2) Financial risk management

In the normal course of business, the Group is exposed to financial risks, including market risk, credit risk, and liquidity risk. In order to mitigate these risks, the Group conducts risk management in accordance with certain policies. The Group uses derivative transactions in order to mitigate risks described hereafter, and not for speculative purposes.

1) Market risk

(i) Currency risk

The Group also operates businesses overseas, and thus is exposed to foreign currency exchange rate risk in relation to its transactions conducted in currencies other than the functional currency as well as its net investments in foreign operations. In order to mitigate this risk, the Group uses derivatives, such as foreign currency forward exchange contracts. In addition, the Group continually monitors the foreign exchange markets and periodically assesses foreign currency exchange rate risk in accordance with its currency risk management policies. All derivative transactions are conducted in accordance with the currency risk management policies and the internal regulations that specify transaction authority and transaction amount limits.

The major net exposures to currency risk of the Group (excluding exposures hedged by such means as forward exchange contracts) as of March 31, 2022 and 2023 are as follows:

	(millions of yen)	
	Year ended March 31, 2022 (as of March 31, 2022)	Year ended March 31, 2023 (as of March 31, 2023)
U.S. dollar	44,836	40,410
Chilean peso	9,190	16,402

Sensitivity analysis of currency risk

For the fiscal years ended March 31, 2022 and 2023, if the U.S. dollar and the Chilean peso each appreciated against the functional currency by 1%, the effects on profit before tax in the consolidated statement of income would be as follows. This analysis assumes that all other variables remain unchanged and does not include the effects of translation into the presentation currency of financial instruments denominated in the functional currency, income and expenses as well assets and liabilities of foreign operations.

	(millions of yen)	
	Year ended March 31, 2022 (April 1, 2021 through March 31, 2022)	Year ended March 31, 2023 (April 1, 2022 through March 31, 2023)
Profit before tax		
U.S. dollar	448	404
Chilean peso	92	164

(ii) Share price risk

The Group holds shares in companies, such as business partners, to promote smooth business operations in relation to maintaining and developing business relationships. As such, the Group is exposed to share price risk. In order to mitigate the risk, the Group reviews all holdings of shares annually. Only when the Group determines that a holding of shares contributes to closer cooperation for stable transactions and business expansion and is thus indispensable for its sustainable growth, the Group continues the holding of shares. If there is less need for a holding of shares, the holding of shares is disposed of appropriately in light of share prices and market conditions.

Sensitivity analysis of share price risk

If the prices of shares in companies, such as business partners, held by the Group as of March 31, 2022 and 2023 increased by 1%, the effects on other comprehensive income (before tax effects) in the consolidated statement of income would be as follows. This analysis assumes that all other variables remain unchanged.

	(millions of yen)	
	Year ended March 31, 2022 (April 1, 2021 through March 31, 2022)	Year ended March 31, 2023 (April 1, 2022 through March 31, 2023)
Effects on other comprehensive income	221	200

(iii) Interest rate risk

The Group holds interest-bearing liabilities with floating interest rates. As such, the Group is exposed to interest rate risk. In order to mitigate the risk, the Group uses interest rate swap contracts. Accordingly, the Group's exposure to interest rate risk is limited, and the effect on profit before tax in the consolidated statement of income is immaterial.

2) Credit risk

The Group holds trade and other receivables. As such, the Group is exposed to credit risk. In order to mitigate the risk, the Group controls due dates and balances in accordance with sales management policies and other regulations and also ensures regular monitoring of the credit standing of business partners. The Group is not exposed to credit risk that is excessively concentrated in a particular counterparty. Derivative transactions entered into to mitigate currency risk and interest rate risk are exposed to the credit risk of the counterparty financial institutions. Those financial institutions are creditworthy, and therefore the credit risk is considered to be extremely limited. The carrying amount of financial assets less impairment losses in the consolidated statement of financial position represents the maximum credit risk exposure. The amount of receivables that are past due but not impaired is immaterial.

3) Liquidity risk

The Group raises funds necessary for its business operations through bank loans and issuance of bonds, and accordingly is exposed to liquidity risk, which is the risk of failure to meet payment obligations at due dates. The Company manages financial plans by continually monitoring and updating them through the cash management system and reports from the subsidiaries. The Group strives to reduce the liquidity risk by maintaining the level of necessary working capital under this framework as well as by entering into commitment line agreements with financial institutions.

The balance of financial liabilities by settlement date is as follows:

(millions of yen)

	Year ended March 31, 2022 (as of March 31, 2022)				
	Carrying amount	Contractual amount	Within 1 year	1 to 5 years	Over 5 years
Non-derivative financial liabilities					
Short-term bank loans	59,335	59,335	59,335	-	-
Trade and other payables	103,719	103,719	103,719	-	-
Bonds	64,788	67,274	10,243	20,714	36,317
Long-term bank loans	41,331	41,934	9,549	29,875	2,510
Lease liabilities	45,954	46,912	11,649	22,244	13,019
Derivative financial liabilities					
Derivatives	378	378	378	-	-
Total	315,505	319,552	194,873	72,833	51,846

(millions of yen)

	Year ended March 31, 2023 (as of March 31, 2023)				
	Carrying amount	Contractual amount	Within 1 year	1 to 5 years	Over 5 years
Non-derivative financial liabilities					
Short-term bank loans	77,661	77,661	77,661	-	-
Trade and other payables	106,027	106,027	106,027	-	-
Bonds	74,712	77,393	10,262	30,970	36,161
Long-term bank loans	48,921	49,427	3,338	25,950	20,139
Lease liabilities	40,761	41,156	11,606	18,171	11,379
Derivative financial liabilities					
Derivatives	2,370	2,370	2,370	-	-
Total	350,452	354,034	211,264	75,091	67,679

(Note) The Group entered into commitment line agreements with financial institutions totaling ¥75,000 million as of March 31, 2022 and 2023, of which ¥66,904 million and ¥65,087 million are unused and readily available.

(3) Derivatives and hedging activities

The Group is exposed to certain risks relating to its ongoing business operations. The primary risks managed by using derivatives are foreign currency exchange rate risk (principally in U.S. dollars and Chilean pesos) and interest rate risk. The Group uses foreign currency forward exchange contracts to mitigate foreign currency exchange rate risk. In addition, the Group uses interest rate swap contracts to mitigate interest rate risk.

The Group documents its risk management policies including strategies for the purpose of undertaking hedge transactions. All derivatives are entered into under the purpose, strategies and related rules which regulate transactions.

Derivatives which do not qualify for hedge accounting

These derivatives are used to mitigate foreign currency exchange rate risk and interest rate risk. Changes in fair value of derivatives which do not qualify for hedge accounting are recognized in profit or loss immediately.

As of March 31, 2022 and 2023, the contract amounts or notional principal amounts of derivatives held by the Group that did not qualify for hedge accounting are as follows:

	(millions of yen)	
	Year ended March 31, 2022 (as of March 31, 2022)	Year ended March 31, 2023 (as of March 31, 2023)
Interest rate swap contracts	3,000	-
Foreign currency forward exchange contracts	110,324	115,998

The Group also has a policy that derivatives are not to be used for purposes other than for hedging. The Group's derivatives contain no provisions that require such derivatives to maintain an investment grade credit rating from each of the major credit rating agencies.

(4) Fair value of financial instruments

1) Measurement of fair value

The Group measures the fair value of financial assets and financial liabilities as follows:

(Cash and cash equivalents, trade and other receivables, trade and other payables, short-term bank loans)

The carrying amounts of these items approximate the fair values because of their short maturities.

(Investment securities)

The fair values of marketable investment securities are based on quoted prices. The fair values of unlisted investment securities are measured by using valuation techniques, such as the market approach and the income approach.

(Other financial assets)

The fair values of foreign currency forward exchange contracts are determined by the discounted cash flow model for the contract term using observable market data such as forward exchange rates.

(Bonds and long-term bank loans)

The fair values of bonds and long-term bank loans are measured by discounting the future cash flows to present value at a rate that would be applied to a similar new contract.

(Other financial liabilities)

The fair values of foreign currency forward exchange contracts and interest rate swap agreements are determined by the discounted cash flow model for the contract term using observable market data such as forward exchange rates and market interest rates.

2) Financial instruments measured at amortized cost

The carrying amounts and fair values of financial instruments measured at amortized cost are as follows.

The table below does not include financial instruments measured at fair value or financial instruments whose carrying amounts approximate the fair value.

(millions of yen)

	Year ended March 31, 2022 (as of March 31, 2022)		Year ended March 31, 2023 (as of March 31, 2023)	
	Carrying amount	Fair value	Carrying amount	Fair value
Financial liabilities				
Financial liabilities measured at amortized cost				
Bank loans	41,331	41,504	48,921	48,716
Bonds	64,788	64,257	74,712	71,799

Financial liabilities measured at amortized cost are classified as Level 2.

3) Financial instruments measured at fair value

The table below shows analytical results on financial instruments measured at fair value. Each level is defined as follows.

There are no financial instruments measured at fair value on a non-recurring basis.

Level 1: Fair value measured at quoted prices in active markets

Level 2: Fair value determined, either directly or indirectly, by using observable inputs other than Level 1

Level 3: Fair value determined using valuation techniques based on unobservable inputs

The Group recognizes transfers between the levels of the fair value hierarchy at the date when the event or the change in circumstances resulting in the transfer occurred.

There were no transfers between Level 1, Level 2 and Level 3 of the fair value hierarchy for the fiscal years ended March 31, 2022 and 2023.

(millions of yen)

Year ended March 31, 2022 (as of March 31, 2022)	Level 1	Level 2	Level 3	Total
Financial assets				
Financial assets measured at fair value through profit or loss				
Derivative assets	-	5,795	-	5,795
Debt financial assets	-	216	1,674	1,890
Financial assets measured at fair value through other comprehensive income				
Equity financial assets	22,078	-	7,729	29,807
Total financial assets	22,078	6,011	9,403	37,492
Financial liabilities				
Financial liabilities measured at fair value through profit or loss				
Derivative liabilities	-	378	-	378
Total financial liabilities	-	378	-	378

(millions of yen)

Year ended March 31, 2023 (as of March 31, 2023)	Level 1	Level 2	Level 3	Total
Financial assets				
Financial assets measured at fair value through profit or loss				
Derivative assets	-	1,241	-	1,241
Debt financial assets	-	220	767	987
Financial assets measured at fair value through other comprehensive income				
Equity financial assets	20,041	-	2,370	22,411
Total financial assets	20,041	1,461	3,137	24,639
Financial liabilities				
Financial liabilities measured at fair value through profit or loss				
Derivative liabilities	-	2,370	-	2,370
Total financial liabilities	-	2,370	-	2,370

Reconciliation for financial instruments classified as Level 3

The reconciliation from the opening balances to the closing balances of financial instruments classified as Level 3 in fair value measurements is as follows:

(millions of yen)

	Year ended March 31, 2022 (April 1, 2021 through March 31, 2022)	Year ended March 31, 2023 (April 1, 2022 through March 31, 2023)
Balance at beginning of the year	5,051	9,403
Profit or loss	-	(387)
Other comprehensive income	3,579	(4,106)
Acquisition	907	1
Disposal	(29)	(1,774)
Changes due to changes in scope of consolidation	(105)	-
Balance at end of the year	9,403	3,137

Financial assets classified as Level 3 mainly consist of unlisted shares, whose fair values are measured using valuation techniques based on market prices of peer companies and other methods.

Fair value measurements of unlisted shares use unobservable inputs, such as a valuation multiple. The fair value increases (decreases) as an operating income multiple rises (declines).

(5) Financial assets measured at fair value through other comprehensive income

The Group designates investments in equity financial assets held for maintaining and enhancing business relationships as financial assets measured at fair value through other comprehensive income, in light of the purpose of holding the assets.

1) Fair value by issuer of shares

The fair value of investments in equity financial assets designated as financial assets measured at fair value through other comprehensive income is as follows:

Year ended March 31, 2022 (as of March 31, 2022)

(millions of yen)	
Issuer of shares	Amount
MOS FOOD SERVICES, INC.	4,166
Luohe Shuanghui Wanzhong Poultry Processing Co., Ltd.	3,868
Chubu Shiryō Co., Ltd.	2,082
FOOD & LIFE COMPANIES LTD.	1,907
Luohe Shuanghui Wanzhong Poultry Development Co., Ltd.	1,884

Year ended March 31, 2023 (as of March 31, 2023)

(millions of yen)	
Issuer of shares	Amount
MOS FOOD SERVICES, INC.	2,889
Chubu Shiryō Co., Ltd.	2,204
FOOD & LIFE COMPANIES LTD.	1,910
AEON CO., LTD.	1,732
AXYZ Co., Ltd.	1,480

2) Dividend income

(millions of yen)		
	Year ended March 31, 2022 (April 1, 2021 through March 31, 2022)	Year ended March 31, 2023 (April 1, 2022 through March 31, 2023)
Investments derecognized during the year	14	31
Investments held at end of the year	1,557	509
Total	1,571	540

3) Equity financial assets measured at fair value through other comprehensive income derecognized during the year

(millions of yen)		
	Year ended March 31, 2022 (April 1, 2021 through March 31, 2022)	Year ended March 31, 2023 (April 1, 2022 through March 31, 2023)
Fair value upon derecognition	899	4,644
Accumulated gain upon derecognition	412	1,778

These were sold primarily as a result of reviewing business relationships.

4) Transfer to retained earnings

The Group transfers an accumulated gain or loss arising from changes in fair value of financial assets measured at fair value through other comprehensive income to retained earnings when the investment is disposed of or when its fair value declines significantly.

Accumulated income (after tax) in other comprehensive income that were transferred to retained earnings for the fiscal years ended March 31, 2022 and 2023 were ¥280 million and ¥1,233 million, respectively.

30. Related parties

Compensation for major management executives is as follows:

(millions of yen)

	Year ended March 31, 2022 (April 1, 2021 through March 31, 2022)	Year ended March 31, 2023 (April 1, 2022 through March 31, 2023)
Basic compensation	199	197
Performance-based compensation	89	77
Performance-based stock compensation	35	19
Total	323	293

31. Assets held for sale and discontinued operations

(1) Assets held for sale

Assets held for sale of ¥436 million for the fiscal year ended March 31, 2022 consisted of property, plant and equipment such as land.

The breakdown of assets held for sale and liabilities directly associated with such assets as of March 31, 2023 is as follows:

(millions of yen)

	Year ended March 31, 2023 (as of March 31, 2023)		Year ended March 31, 2023 (as of March 31, 2023)
Assets held for sale		Liabilities directly associated with assets held for sale	
Cash and cash equivalents	809	Interest-bearing liabilities	6,390
Trade and other receivables	2,240	Trade and other payables	3,969
Inventories	2,875	Other	1,000
Property, plant and equipment	8,198		
Other	516		
Loss recognized on the measurement to fair value less costs to sell of a disposal group constituting the discontinued operation	(2,449)		
Total	12,189	Total	11,359

Assets held for sale and liabilities directly associated with them as classified above in the fiscal year ended March 31, 2023 mainly relates to BPU. The above classification has been made following the decision to sell shares of the company. An overview of discontinued operations is provided in “(2) Discontinued operations, 2) Transfer of shares of Breeders & Packers Uruguay S.A. (i) Overview of discontinued operations” within this note.

The disposal group classified as held for sale relating to BPU is measured at fair value less costs to sell because the fair value less costs to sell is lower than the carrying amount. The loss of ¥2,449 million recognized as a result of this transaction is included in “Profit (loss) from Discontinued Operations” in the consolidated statement of income. The fair value is based on the sale price, which is categorized as Level 3 in the fair value hierarchy.

(2) Discontinued operations

1) Transfer of shares of The Marine Foods Corporation

(i) Overview of discontinued operations

The Company, at the meeting of its Board of Directors held on February 9, 2022, determined to transfer all of its shares and related assets of its consolidated subsidiary, The Marine Foods Corporation (“Marine Foods”), to Sojitz Corporation, and the share transfer was completed on March 31, 2022.

As a result, the marine products business relating to Marine Foods has been classified as discontinued operations from the year ended March 31, 2022.

(ii) Name and nature of business of the subsidiary and the segment that included the divested business

Name of the subsidiary	The Marine Foods Corporation
Nature of business	Manufacturing and sale of processed marine food products and import and sale of marine raw materials
Applicable segment	Processed Foods Business Division

(iii) Number of shares sold and percentage of ownership after the sale

Number of shares owned before the sale	22,666,000 shares (Number of voting rights: 22,666,000) (Percentage of voting rights held: 100.0%)
Number of shares sold	22,666,000 shares (Number of voting rights: 22,666,000)
Percentage of ownership after the sale	– share (Number of voting rights: –) (Percentage of voting rights held: –%)

(iv) Profit (loss) from discontinued operations

Details of profit (loss) from discontinued operations are as follows.

(millions of yen)

	Year ended March 31, 2022 (April 1, 2021 through March 31, 2022)	Year ended March 31, 2023 (April 1, 2022 through March 31, 2023)
Net sales	72,053	-
Gain (loss) on sales of business (Note 1)	12,037	(408)
Other profit (loss)	(70,951)	-
Profit (loss) before tax from discontinued operations	13,139	(408)
Income tax expense (Note 2)	(4,190)	127
Profit (loss) from discontinued operations	8,949	(281)

- (Notes) 1. Gain (loss) on sales of business classified as discontinued operations for the year ended March 31, 2023 was due to an adjustment to the transfer price of the shares of The Marine Foods held by the Company pursuant to the share transfer agreement.
2. Income tax expense for the year ended March 31, 2022 includes income tax of ¥3,448 million on the gain on sales of business.

(v) Cash flows from discontinued operations

Cash flows from discontinued operations are as follows.

(millions of yen)

	Year ended March 31, 2022 (April 1, 2021 through March 31, 2022)	Year ended March 31, 2023 (April 1, 2022 through March 31, 2023)
Cash flows from operating activities	2,003	-
Cash flows from investing activities (Notes 1 and 2)	16,721	(3,047)
Cash flows from financing activities	(2,170)	-
Total	16,554	(3,047)

- (Notes) 1. Cash flows from investing activities for the fiscal year ended March 31, 2022 include ¥16,628 million of proceeds from sales of business.
2. Cash flows from investing activities for the fiscal year ended March 31, 2023 include income tax paid of ¥3,166 million related to proceeds from sales of business recorded in the fiscal year ended March 31, 2022.

2) Transfer of shares of Breeders & Packers Uruguay S.A.

(i) Overview of discontinued operations

The Company, at the meeting of its Board of Directors held on January 31, 2023, determined to transfer all of its shares of its consolidated subsidiary, BPU, to Minerva S.A.

As a result, for the year ended March 31, 2023, the beef business relating to BPU has been classified as discontinued operations, and it has been reclassified and restated as discontinued operations for the previous fiscal year as well.

(ii) Name and nature of business of the subsidiary and the segment that included the divested business

Name of the subsidiary	Breeders & Packers Uruguay S.A.
Nature of business	Meat processing and sales (beef)
Applicable segment	Overseas Business Division

(iii) Number of shares to be sold, sale price, and percentage of ownership after the sale

Number of shares owned before the sale	1,797,343,133 shares (Number of voting rights: 1,797,343,133) (Percentage of voting rights held: 100.0%)
Number of shares to be transferred	1,797,343,133 shares (Number of voting rights: 1,797,343,133)
Sale price (Note)	The sale price will be determined based on the enterprise value of 40 million USD (5.2 billion JPY), and the price adjustments stipulated in the stock purchase agreement, including net debt and working capital of BPU.
Percentage of ownership after the sale	– share (Number of voting rights: –) (Percentage of voting rights held: –%)

(Note) The yen equivalent is a reference value calculated at a rate of 130 yen to the U.S. dollar.

(iv) Profit (loss) from discontinued operations

Details of profit (loss) from discontinued operations are as follows.

(millions of yen)

	Year ended March 31, 2022 (April 1, 2021 through March 31, 2022)	Year ended March 31, 2023 (April 1, 2022 through March 31, 2023)
Net sales	22,503	30,203
Loss recognized on the measurement to fair value less costs to sell of a disposal group constituting the discontinued operation	-	(2,449)
Other profit (loss)	(22,897)	(32,831)
Loss before tax from discontinued operations	(394)	(5,077)
Income tax expense (Note)	287	3,942
Loss from discontinued operations	(107)	(1,135)

(Note) Income tax expense for the year ended March 31, 2023 includes ¥3,916 million of deferred tax assets for temporary differences, arising from gains and losses recognized in prior years on investment in BPU and loss recognized on the measurement to fair value less costs to sell of a disposal group constituting the discontinued operation.

(v) Cash flows from discontinued operations

Cash flows from discontinued operations are as follows.

(millions of yen)

	Year ended March 31, 2022 (April 1, 2021 through March 31, 2022)	Year ended March 31, 2023 (April 1, 2022 through March 31, 2023)
Cash flows from operating activities	913	(2,961)
Cash flows from investing activities	(68)	(357)
Cash flows from financing activities	(517)	2,345
Total	328	(973)

32. Hyperinflation adjustment

During the cumulative first quarter of the fiscal year, the national wholesale price index of the Republic of Turkey indicated that the country's three-year cumulative inflation rate exceeded 100%, and the Group determined that its subsidiary in the Republic of Turkey, whose functional currency is the Turkish lira, is operating in a hyperinflationary economy.

The Group has, therefore, made accounting adjustments to the financial statements of its subsidiary in the Republic of Turkey in accordance with the requirements set forth in IAS 29 "Financial Reporting in Hyperinflationary Economies."

IAS 29 requires that the financial statements of the subsidiary in the Republic of Turkey be restated in terms of the measuring unit at the end of the reporting period before being included in the consolidated financial statements of the Group.

The Group uses conversion factors calculated from the Consumer Price Index (CPI) of the Republic of Turkey published by the Turkish Statistical Institute (TUIK) to adjust the financial statements of its subsidiary in the Republic of Turkey.

The CPI and corresponding conversion factors since March 2003 are as follows.

Balance sheet date	National Consumer Price Index (CPI) (Based at 100 as of June 2003)	Conversion factor
March 31, 2003	98.12	12.94
March 31, 2004	106.36	11.94
March 31, 2005	114.81	11.06
March 31, 2006	124.18	10.23
March 31, 2007	137.67	9.22
March 31, 2008	150.27	8.45
March 31, 2009	162.12	7.83
March 31, 2010	177.62	7.15
March 31, 2011	184.70	6.87
March 31, 2012	203.96	6.23
March 31, 2013	218.83	5.80
March 31, 2014	237.18	5.35
March 31, 2015	255.23	4.97
March 31, 2016	274.27	4.63
March 31, 2017	305.24	4.16
March 31, 2018	336.48	3.77
March 31, 2019	402.81	3.15
March 31, 2020	450.58	2.82
March 31, 2021	523.53	2.43
March 31, 2022	843.64	1.51
March 31, 2023	1,269.75	1.00

For the subsidiary in the Republic of Turkey, non-monetary items such as property, plant and equipment presented at cost are restated using conversion factors based on the acquisition date.

Monetary and non-monetary items stated at current cost are not restated as they are considered to be already expressed in terms of the measuring unit current as of the end of the reporting period.

The effect of inflation on net monetary position is included in "Financial Income" in the consolidated statement of income.

The statement of income and statement of cash flows of the subsidiary in the Republic of Turkey for the fiscal year ended March 31, 2023 have been restated by applying the conversion factors shown in the table above.

The financial statements of the subsidiary in the Republic of Turkey are converted at the exchange rate as of the closing date and reflected in the consolidated financial statements of the Group.

In accordance with paragraph 42 (b) of IAS 21 "The Effects of Changes in Foreign Exchange Rates," the comparative amounts in the consolidated financial statements are not restated.

33. Significant subsidiaries

Significant subsidiaries of the Group are as described in “I Overview of the Company, 4 Overview of affiliated entities.” However, “I Overview of the Company, 4 Overview of affiliated entities” is not included in the English translation.

There were no subsidiaries that had individually significant non-controlling interests as of March 31, 2022 and 2023.

34. Contingent liabilities

There were no significant contingent liabilities.

35. Significant subsequent events

There were no applicable items.

36. Approval of consolidated financial statements

These consolidated financial statements were approved by Nobuhisa Ikawa, President and Representative Director, and Masahito Kataoka, CFO, as of June 28, 2023.

(2) Other

Quarterly information for the fiscal year ended March 31, 2023

(Cumulative period)	Three months ended June 30, 2022 (April 1, 2022 through June 30, 2022)	Six months ended September 30, 2022 (April 1, 2022 through September 30, 2022)	Nine months ended December 31, 2022 (April 1, 2022 through December 31, 2022)	Fiscal year ended March 31, 2023 (April 1, 2022 through March 31, 2023)
Net sales (millions of yen)	302,378	618,688	962,609	1,259,792
Profit before tax (millions of yen)	14,720	23,600	27,206	22,162
Profit attributable to owners of the parent (millions of yen)	10,182	15,480	19,219	16,637
Basic earnings per share (yen)	99.49	151.21	187.70	162.44

(Accounting period)	First quarter (April 1, 2022 through June 30, 2022)	Second quarter (July 1, 2022 through September 30, 2022)	Third quarter (October 1, 2022 through December 31, 2022)	Fourth quarter (January 1, 2023 through March 31, 2023)
Basic earnings (loss) per share (yen)	99.49	51.72	36.49	(25.26)

(Note) At a meeting of its Board of Directors held on January 31, 2023, the Company determined to transfer all of its shares of its consolidated subsidiary, BPU, to Minerva S.A. As a result, for the year ended March 31, 2023, the beef business relating to BPU has been classified as discontinued operations. Accordingly, the amounts of net sales and profit before tax for the cumulative first, second and third quarters of the fiscal year have been reclassified into the amounts of the continuing operations excluding discontinued operations.

NOTE TO READERS:

Following is an English translation of management's report on internal control over financial reporting filed under the Financial Instruments and Exchange Act of Japan. Readers should be aware that this report is presented merely as supplemental information.

Management's Report on Internal Control

1. Matters relating to the basic framework for internal control over financial reporting

Nobuhisa Ikawa, President and Representative Director, and Masahito Kataoka, Director and Managing Executive Officer in charge of Accounting & Finance Department, are responsible for designing and operating effective internal control over financial reporting of our company (the "Company") and have designed and operated internal control over financial reporting of the consolidated financial statements in accordance with the basic framework for internal control set forth in "The Standards and Practice Standards for Management Assessment and Audit of Internal Control Over Financial Reporting" published by the Business Accounting Council.

The internal control is designed to achieve its objectives to the extent reasonable through the effective function and combination of its basic elements. Therefore, there is a possibility that misstatements may not be completely prevented or detected by internal control over financial reporting.

2. Matters relating to the scope of assessment, the basis date of assessment and the assessment procedures

The assessment of internal control over financial reporting was performed as of March 31, 2023, which is the end of this fiscal year. The assessment was performed in accordance with assessment standards for internal control over financial reporting generally accepted in Japan.

In conducting this assessment, we evaluated internal controls which may have a material effect on our entire financial reporting on a consolidation basis ("entity-level controls") and based on the results of this assessment, we selected business processes to be tested. We analyzed these selected business processes, identified key controls that may have a material impact on the reliability of the Company's financial reporting, and assessed the design and operation of these key controls. These procedures have allowed us to evaluate the effectiveness of the internal controls of the Company.

We determined the required scope of assessment of internal control over financial reporting for the Company, as well as its consolidated subsidiaries and equity-method affiliated companies, based on significance that may affect the reliability of their financial reporting. The significance that may affect the reliability of the financial reporting is determined based on quantitative and qualitative impacts on financial reporting. Based on the results of the assessment of entity-level controls conducted for the Company and its consolidated subsidiaries, we reasonably determined the scope of assessment of internal control over business processes. Regarding certain consolidated subsidiaries that did not fall within the top 95% in terms of potential financial impact, calculated using net sales and other financial indicators, we concluded that they do not have any material impact on the consolidated financial statements, and thus, did not include them in the scope of assessment of entity-level controls.

Regarding the scope of assessment of internal control over business processes, we selected locations and business units to be tested based on the previous year's consolidated net sales and cost of sales (after elimination of inter-company transactions), and the top sixteen companies whose net sales and cost of sales reach two-thirds of the total sales and cost of sales on a consolidation basis, were selected as "significant locations and/or business units." We included in the scope of assessment, at the selected significant locations

and/or business units, business processes leading to sales, accounts receivable and inventories as significant accounts that may have a material impact on the business objectives of the Company. Further, in addition to selected significant locations and/or business units, we also selected two locations and/or business units for testing, as business processes being significant, business processes relating to (i) greater likelihood of material misstatements and/or (ii) significant accounts involving estimates and the management's judgment and/or (iii) a business or operation dealing with high-risk transactions, taking into account their impact on the financial reporting.

3. Matters relating to the results of the assessment

As a result of the assessment described above, as of the end of this fiscal year, we concluded that the Company's internal control over financial reporting of the consolidated financial statements was effectively maintained.

Audit of Financial Statements

Opinion

Pursuant to the first paragraph of Article 193-2 of the Financial Instruments and Exchange Act, we have audited the consolidated financial statements of NH Foods Ltd., and its consolidated subsidiaries (the "Group") included in the Financial Section, namely, the consolidated statement of financial position as of March 31, 2023, and the consolidated statement of income, consolidated statement of comprehensive income, consolidated statement of changes in equity and consolidated statement of cash flows for the fiscal year from April 1, 2022 to March 31, 2023, and the notes to the consolidated financial statements.

In our opinion, the accompanying consolidated financial statements present fairly, in all material respects, the consolidated financial position of the Group as of March 31, 2023, and its consolidated financial performance and its consolidated cash flows for the year then ended in accordance with International Financial Reporting Standards pursuant to the provisions of Article 93 of the Ordinance on Terminology, Forms and Preparation Methods of Consolidated Financial Statements.

Basis for Opinion

We conducted our audit in accordance with auditing standards generally accepted in Japan. Our responsibilities under those standards are further described in the Auditor's Responsibilities for the Audit of the Consolidated Financial Statements section of our report. We are independent of the Group in accordance with the provisions of the Code of

Professional Ethics in Japan, and we have fulfilled our other ethical responsibilities as auditors. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

Key Audit Matter

A key audit matter is a matter that, in our professional judgment, was of most significance in our audit of the consolidated financial statements of the current period. The matter was addressed in the context of our audit of the consolidated financial statements as a whole, and in forming our opinion thereon, and we do not provide a separate opinion on the matter.

Identification of impairment indicators in fixed assets
Key Audit Matter Description
<p>The Group recorded 364,381 million yen of Property, plant and equipment and 20,193 million yen of Intangible assets and goodwill in the consolidated statement of financial position as of March 31, 2023, which accounted for approximately 39% and 2% of consolidated total assets, respectively. These assets included domestic meat production and breeding facilities, processing facilities, and processed food production facilities, as well as overseas meat production and breeding facilities and processing facilities.</p> <p>As described in Note 3. (11) to the consolidated financial statements, the Group determines whether there is any indication of impairment at the end of the reporting period in each asset or cash-generating unit for Property, plant and equipment and Intangible assets and goodwill. If there is an indication of impairment, an impairment loss is recognized by estimating the recoverable amount of the asset or cash-generating unit. For the fiscal year ended March 31, 2023, impairment losses on Property, and equipment and Intangible assets and goodwill in the amount of 1,397 million and 196 million, respectively, were recognized.</p> <p>The financial performance of the Group is expected to be affected by extreme weather events, such as droughts and torrential rains, livestock diseases, fluctuations in commodity prices, and adverse effects on product quality and safety. As a result, there may be an indication of impairment in Property, plant and equipment and Intangible assets and goodwill if business plans are not achieved or the financial performance deteriorates.</p> <p>When assessing whether such a failure to meet business plans or a deterioration in the financial performance constitutes an indication of impairment, it is necessary to analyze the cause of such failure by considering the various factors described above, which involves management's judgment. In addition, Property, plant and equipment and Intangible assets and goodwill are quantitatively material. Based on the above, we identified the identification of impairment indicators in Property, plant and equipment and Intangible assets and goodwill as a key audit matter.</p>
How the Key Audit Matter Was Addressed in the Audit
<p>Our audit procedures related to the identification of impairment indicators in Property, plant and equipment and Intangible assets and goodwill included the following, among others:</p> <ul style="list-style-type: none"> • We understood and tested the design and operating effectiveness of internal controls over management's identification of impairment indicators in Property, plant and equipment and Intangible assets and goodwill. • We tested the accuracy of the analysis of changes in operating income and loss related to each asset or cash-generating unit by comparing it to supporting documents used in the preparation of the consolidated financial statements and related disclosures of segment information. • We assessed whether there were any changes in the financial performance of each asset or cash-generating unit that could be indicative of impairment by inspecting the analysis of changes in operating income and loss related to each asset or cash-generating unit. We performed additional procedures, such as inquiries of management and person in charge of responsible departments and accounting department and inspection of the financial performance analysis prepared by management as well as commodity market data, in order to evaluate the following: <ul style="list-style-type: none"> ➢ The completeness of management's review extent for indications of impairment, ➢ The reasonableness and the consistency with the internal and external business environment of the analysis of changes in the financial performance used by management in identifying impairment indicators, and ➢ The consistency of management's conclusion on the identification of impairment indicators with the results of the analysis of changes in the financial performance and the business plan.

Other Information

Management is responsible for the other information. Audit & Supervisory Board members and the Audit & Supervisory Board are responsible for overseeing the Directors' execution of duties relating to the design and operating effectiveness of the controls over the other information. The other information comprises the information included in the Annual Securities Report, but does not include the consolidated financial statements and our auditor's report thereon.

Our opinion on the consolidated financial statements does not cover the other information and we do not express any form of assurance conclusion thereon.

In connection with our audit of the consolidated financial statements, our responsibility is to read the other information and, in doing so, consider whether the other information is materially inconsistent with the consolidated financial statements or our knowledge obtained in the audit or otherwise appears to be materially misstated.

If, based on the work we have performed, we conclude that there is a material misstatement of this other information, we are required to report that fact. We have nothing to report in this regard.

Responsibilities of Management and Audit & Supervisory Board Members and the Audit & Supervisory Board for the Consolidated Financial Statements

Management is responsible for the preparation and fair presentation of the consolidated financial statements in accordance with International Financial Reporting Standards, and for such internal control as management determines is necessary to enable the preparation of consolidated financial statements that are free from material misstatement, whether due to fraud or error.

In preparing the consolidated financial statements, management is responsible for assessing the Group's ability to continue as a going concern, disclosing, as applicable, matters related to going concern in accordance with International Financial Reporting Standards.

Audit & Supervisory Board members and the Audit & Supervisory Board are responsible for overseeing the Directors' execution of duties relating to the design and operating effectiveness of the controls over the Group's financial reporting process.

Auditor's Responsibilities for the Audit of the Consolidated Financial Statements

Our objectives are to obtain reasonable assurance about whether the consolidated financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinion. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these consolidated financial statements.

As part of an audit in accordance with auditing standards generally accepted in Japan, we exercise professional judgment and maintain professional skepticism throughout the audit. We also:

- Identify and assess the risks of material misstatement of the consolidated financial statements, whether due to fraud or error, design and perform audit procedures responsive to those risks. The procedures selected depend on the auditor's judgment. In addition, we obtain audit evidence that is sufficient and appropriate to provide a basis for our opinion.
- Obtain, when performing risk assessment procedures, an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Group's internal control.
- Evaluate the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made by management.
- Conclude on the appropriateness of management's use of the going concern basis of accounting and, based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on the Group's ability to continue as a going concern. If we conclude that a material uncertainty exists, we are required to draw attention in our auditor's report to the related disclosures in the consolidated financial statements or, if such disclosures are inadequate, to modify our opinion. Our conclusions are based on the audit evidence obtained up to the date of our auditor's report. However, future events or conditions may cause the Group to cease to continue as a going concern.

- Evaluate whether the overall presentation and disclosures of the consolidated financial statements are in accordance with International Financial Reporting Standards, as well as the overall presentation, structure and content of the consolidated financial statements, including the disclosures, and whether the consolidated financial statements represent the underlying transactions and events in a manner that achieves fair presentation.
- Obtain sufficient appropriate audit evidence regarding the financial information of the entities or business activities within the Group to express an opinion on the consolidated financial statements. We are responsible for the direction, supervision and performance of the group audit. We remain solely responsible for our audit opinion.

We communicate with Audit & Supervisory Board members and the Audit & Supervisory Board regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in internal control that we identify during our audit.

We also provide Audit & Supervisory Board members and the Audit & Supervisory Board with a statement that we have complied with relevant ethical requirements regarding independence, and communicate with them all relationships and other matters that may reasonably be thought to bear on our independence, and where applicable, related safeguards.

From the matters communicated with Audit & Supervisory Board members and the Audit & Supervisory Board, we determine those matters that were of most significance in the audit of the consolidated financial statements of the current period and are therefore the key audit matters. We describe these matters in our auditor's report unless law or regulation precludes public disclosure about the matter or when, in extremely rare circumstances, we determine that a matter should not be communicated in our report because the adverse consequences of doing so would reasonably be expected to outweigh the public interest benefits of such communication.

Audit of Internal Control

Opinion

Pursuant to the second paragraph of Article 193-2 of the Financial Instruments and Exchange Act, we have audited management's report on internal control over financial reporting of NH Foods Ltd. as of March 31, 2023.

In our opinion, management's report on internal control over financial reporting referred to above, which represents that the internal control over financial reporting of NH Foods Ltd. as of March 31, 2023, is effectively maintained, presents fairly, in all material respects, the results of the assessment of internal control over financial reporting in accordance with assessment standards for internal control over financial reporting generally accepted in Japan.

Basis for Opinion

We conducted our internal control audit in accordance with auditing standards for internal control over financial reporting generally accepted in Japan. Our responsibilities under those standards are further described in the Auditor's Responsibilities for the Internal Control Audit section of our report. We are independent of the Group in accordance with the provisions of the Code of Professional Ethics in Japan, and we have fulfilled our other ethical responsibilities as auditors. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

Responsibilities of Management and Audit & Supervisory Board Members and the Audit & Supervisory Board for Report on Internal Control

Management is responsible for designing and operating effective internal control over financial reporting and for the preparation and fair presentation of its report on internal control in accordance with assessment standards for internal control over financial reporting generally accepted in Japan. Audit & Supervisory Board members and the Audit & Supervisory Board are responsible for overseeing and verifying the design and operating effectiveness of internal control over financial reporting. There is a possibility that misstatements may not be completely prevented or detected by internal control over financial reporting.

Auditor's Responsibilities for the Internal Control Audit

Our objectives are to obtain reasonable assurance about whether management's report on internal control over financial reporting is free from material misstatement and to issue an auditor's report that includes our opinion.

As part of an audit in accordance with auditing standards for internal control over financial reporting generally accepted in Japan, we exercise professional judgment and maintain professional skepticism throughout the audit. We also:

- Perform audit procedures to obtain audit evidence regarding the results of the assessment of internal control over financial reporting in management's report on internal control. The procedures selected depend on the auditor's judgment, including the significance of effects on reliability of financial reporting.
- Examine representations on the scope, procedures and results of the assessment of internal control over financial reporting made by management, as well as evaluating the overall presentation of management's report on internal control.
- Obtain sufficient appropriate audit evidence regarding the results of the assessment of internal control over financial reporting. We are responsible for the direction, supervision and performance of the internal control audit. We remain solely responsible for our audit opinion.

We communicate with Audit & Supervisory Board members and the Audit & Supervisory Board regarding, among other matters, the planned scope and timing of the internal control audit, result of the internal control audit, including any identified material weakness which should be disclosed and the result of remediation.

We also provide Audit & Supervisory Board members and the Audit & Supervisory Board with a statement that we have complied with relevant ethical requirements regarding independence, and communicate with them all relationships and other matters that may reasonably be thought to bear on our independence, and where applicable, related safeguards.

Interest Required to Be Disclosed by the Certified Public Accountants Act of Japan

Our firm and its designated engagement partners do not have any interest in the Group which is required to be disclosed pursuant to the provisions of the Certified Public Accountants Act of Japan.

Notes to the Readers of Independent Auditor's Report

This is an English translation of the independent auditor's report as required by the Financial Instruments and Exchange Act of Japan for the conveniences of the reader.
