2. Reason for adjustment to the forecast of business results

Net sales are expected to be at the level of the previous forecast.

With regard to business profit, the forecast is higher than the previous forecast due to improve in line with the increase in demand for dining out in the processed foods business.

With regard to profit before tax and profit attributable to owners of the parent, the forecast is lower than the previous forecast due to weak performance of overseas equity method affiliates and other factors despite the factors that increase business profit.
